Legamaster whiteboards

Cleaning and maintenance

How to start using your Legamaster whiteboard

- Moisten the whole writing surface with Legamaster board cleaner.
- Wipe the board clean with a Micro fibre cloth.
- Make sure that your board is dry before you start writing on it.
- Always thoroughly clean the writing surface before writing on it.
- Use markers with sufficient ink in the reservoir and firmly replace caps after use.
- For best results store markers horizontally.
- The Legamaster Micro fibre cloth gives the best result for intensive wet wiping and cleaning.
- Original board erasers are a solution for quickly correcting and (dry) erasing while writing on the board.
- Eraser tissues are advised to be renewed regularly for an optimal result.
- Legamaster board cleaner spray is a solution for intensive cleaning and wet-erasing in combination with the Micro fibre cloth. Please ensure you do not over-moisten the writing surface. Thoroughly clean the writing surface until all the ink has been removed and there is no longer liquid visible on the surface.

Cleaning and maintenance

BOARD FRASERS

When using a whiteboard intensively; cleaning (older) ink stains can be a challenge. The cloth removes the "ghost writing" which occurs when the volatile components of the ink leave "ghost writing" on the board. Even when using a dry Micro fibre cloth this "ghost writing" mostly disappears. Additionally the cloth takes up the ink pigments; preventing them from being wiped over the board again. Last but not least: After usage the cloth can simply be washed in the washing machine!

- Best solution for intensive wet wiping and cleaning
- Even removes ghost writing and ink stains
- All you need is water or, for best result, use Legamaster whiteboard and glassboard cleaner - no other solvents required
- Dimensions 40 x 40 cm
- Withstands wash cycles up to 60 degrees
