Classic Plus Series

The new Classic Plus Series of Whirlpool Professional upright cabinets is the perfect combination of functionality and design that can be adapted to a wide variety of individual needs.

All models are made in stainless steel AISI 304 both externally and internally.
All grids are plastic coated with stainless steel finishing and they move into stainless steel guides for a safe in-and-out sliding without risk of tilting down. Guides are fixed to robust stainless steel AISI 304 supports providing 23 different possible positions.
A 60mm insulation thickness grants best performance.

The range comes with digital display controls. All models feature a ventilated operating mode and a defrost system using electric heaters in freezers and a natural system in refrigerators. Cabinet cells have rounded internal corners to ensure easiest cleaning.
All products are environmentally friendly, using ecological R404a refrigerant gas.

The Whirlpool Classics Plus Series includes 700 lt and 1400 lt models, in both positive, negative and combi versions, either with solid doors in stainless steel AISI 304 or with glass doors (available on positive versions only).

Working temperature for the Refrigerator models (positive products) with solid doors go from –2°C up to +8°C, while for the Freezer models (negative products) with solid doors from –20°C to –18°C.
In the glass doors models range (positive only) the working temperature goes from +1°C up to +10°C.
All models with solid doors are tropicalized T1, thus granting the products to work properly in an ambient temperature up to 43°C

A complete line of accessories completes the Classic Plus Series of cabinets.
