

Getting Started Guide For D-LINK Unmanaged PoE switch

PRODUCT QUICK INSTALLATION GUIDE

DES-F1026P-E

26-Port 250m Long Reach PoE Switch with 24 Fast Ethernet PoE+ Ports and 2 Gigabit Uplink Ports with 1 Combo SFP/RJ45 Port

1.1 Package Contents

The package contains the following items:

- PoE Switch
- Power Cord
- 19" Rack Mounting Kit
- Quick Installation Guide

1.2 Safety Instructions

Use the following safety guidelines to ensure your own personal safety and to help protect your equipment from potential damage.

- The power cable should be disconnected from the mains during the installation process;
- Wear a grounded anti-static wrist band to avoid the build-up of static electricity;
- Power the product only from the type of external power source indicated on the electrical ratings label.
- Observe extension cable and power strip ratings. Make sure that the total ampere rating of all products plugged into the extension cable or power strip does not exceed 80 percent of the ampere ratings limit for the extension cable or power strip; To avoid the risk of electric shock, do not open the switch housing.
- Do not use damaged power cords. Do not modify power cables or plugs.

1.3 Connecting Power

Connect one end of the power cord to the rear of the switch, and the other end to the mains power outlet.

1.5 Product Installation

The DES-F1026P-E switch can be installed on a desktop, shelf or mounted in a standard 19-inch rack.

To install the switch in a rack, attach the supplied mounting brackets to the side of the switch and fasten the brackets to the sides of the switch using the screws from the switch mounting kit.

Align the brackets and rack holes. Fasten each bracket to the rack.

1.6 Product Ports Description

Port	Description
PoE 1-16	PoE Port: Support IEEE802.3af/at standard Power over Ethernet, used to connect PD devices;
	Ports 1 – 8 PoE support cable lengths up to 250m @ 10Mbps ("Extend" mode enabled); Ports 9 – 24 PoE, support cable lengths up to 100m.
Uplink	Non-PoE port: used to connect NVR, PC, Aggregation Switch etc.
AC Power Input	Connect power cord to the mains power outlet.

1.7 Product Specifications

Extend: Supports long reach PoE delivery, up to 250m. (Cat 5 or better cabling is recommended)VLAN: Isolates ports from each other. Adds security and improves network performance by constraining broadcast traffic.Switch ModesQOS: Introduces application prioritisation. Traffic with higher priority (e.g. Voice over IP) will be forwarded ahead of the queue.PoE: Automatically restarts a remote device by disabling and re-enable PoE on the port if it detects the remote device has locked up (no incoming traffic).Network Ports24 x 10/100Mbps PoE RJ45 ports (Port 1 – Port 24) 2 x Gigabit RJ45 Uplink ports with SFP (Combo) portTransfer Rate100Mbps full Duplex, 10 or 100Mbps Half Duplex (Downlink)Network ProtocolIEEE 802.3i, IEEE 802.3u, IEEE 802.3x, IEEE 802.3af, IEEE 802.3at
