Professional 4G LTE Router with Voice

The new 4G LTE Professional Router, result of Digicom's experience and capability to integrate technologies, represents the ideal solution for cellular network connectivity that includes a Voice port.

Through a single SIM it provides access to the Internet and the possibility of connecting an analog telephone for voice calls, without requiring an additional fixed telephone line. **Advanced functionalities** like Port Forwarding, DMZ, Firewall and remote management via SMS make it particularly suitable and flexible for several applications.

Easy installation and configuration via Web interface.

The Routers allows to connect all your network devices through a high performance 4G connection, thus replacing ADSL/VDSL lines.
