Highlights

Countertop design

Countertop installation-free design, can be placed in anywhere in your house, such as kitchen, living room, bedroom.

Water tank

With 2.6L food-grade water tank to meet all-day water demand

Water temperature

There are many temperatures: room temperature, and 45 to 99 celsius. No matter if it is baby formula, tea or coffee, now you can always prepare with ease.

Water volume

You can choose 100-999ml (every 50ml) to suit different needs.

Anti-burn technology

When there is little/no water in the tank the system will automatically prevent hot water from being dispensed, protecting the system from dry-burn

Child lock

When the output water temperature is above 45 Celsius, the child lock will be automatically activated to prevent mis-operation or scalding

ECO mode

It automatically goes into standby mode if there is no operation within 60 seconds

Instant Heating

With advanced instant heating technology, Philips pipeline dispenser provides fresh hot water of different temperature and volumes within seconds.

Smart auto memorizing function

The machine automatically memorizes the last selected water temperature and volume.

Water and steam separation

With advanced water and steam separation technology, the hot steam is separated from the boiling water so that you won't get burnt when the machine is dispensing hot water.
