

# VESA 75/100 Pole Mount, Top Screen Mount - High tension - 02

SPV1102-H-FX-02

The top mount is used when the solution requires space for the attachment of other peripherals such as a swing arm for a printer or payment terminal to the SpacePole – in addition to the screen. This type of mounting solution is particularly useful where the actual space on the counter itself is limited. Raising the technology above the counter frees up any space that is available.

Compatible with VESA 75 and VESA 100 mounting hole patterns  
Provides strong resistance, with a tension range of 7.5 to 10 kg, suitable for high-intensity applications or advanced strength training  
Enhances workstation productivity by enabling optimal screen placement within the operator's eyeline  
5-year warranty
