

## HT705GR Tier 2 APS QUICK START GUIDE

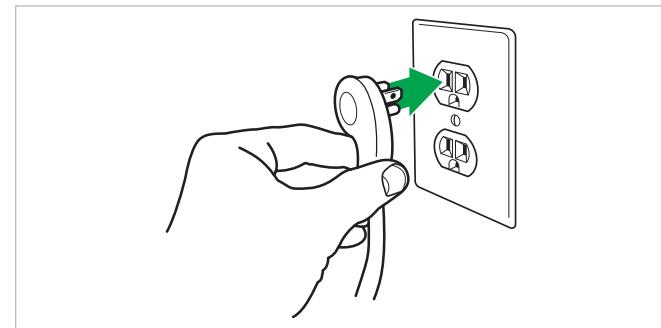

### SETUP:

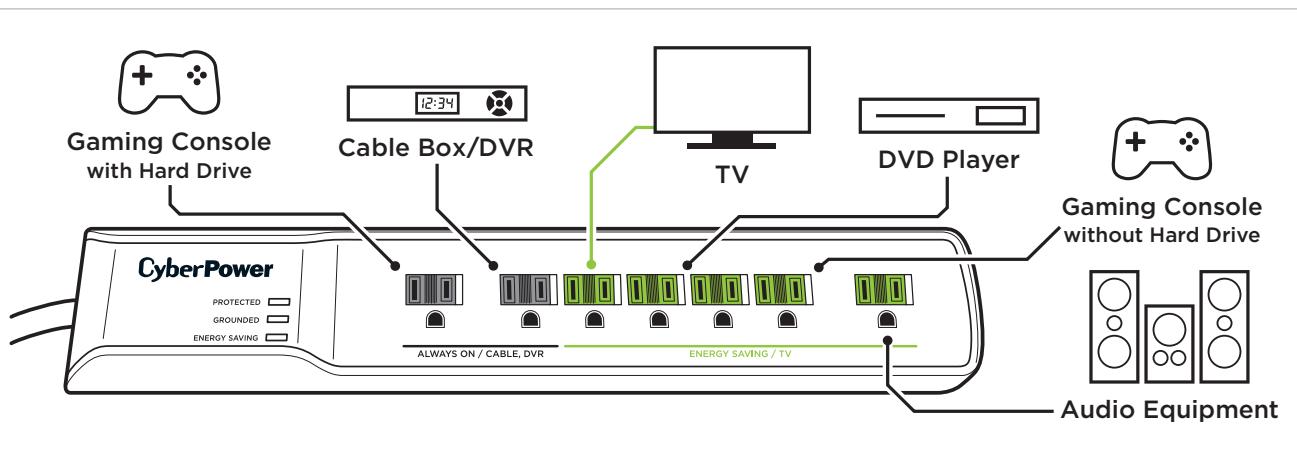

1. Turn power switch to **OFF**.

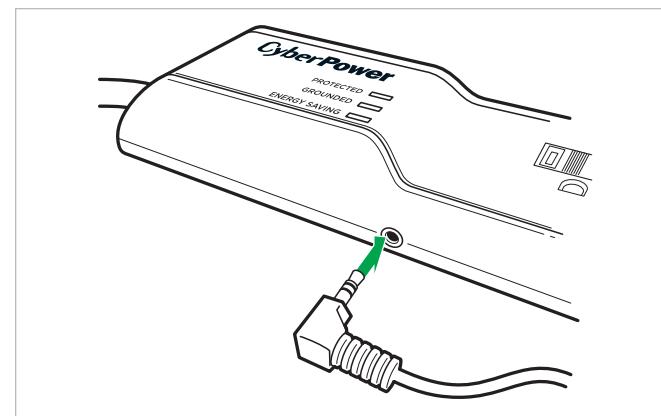

2. Plug surge protector into wall.

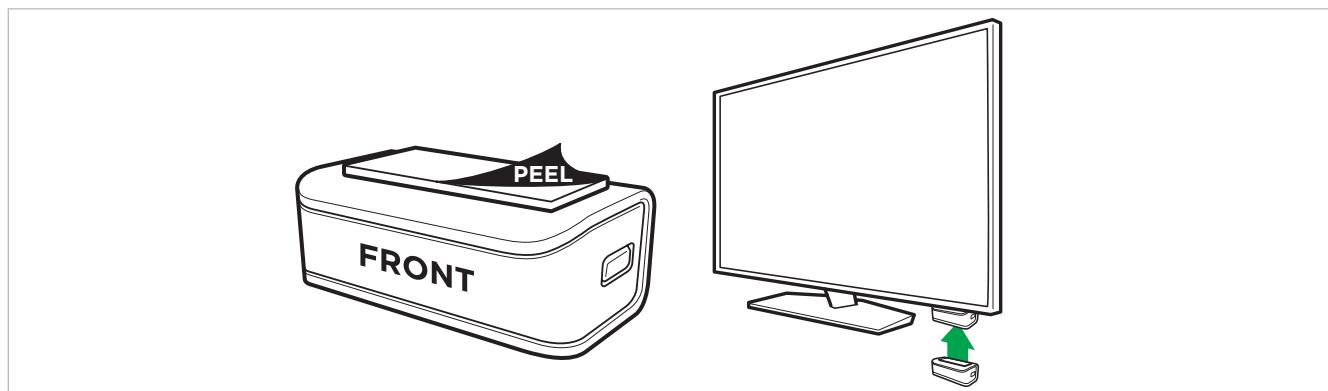

3. Plug powered-down electronic devices in to appropriate outlets.

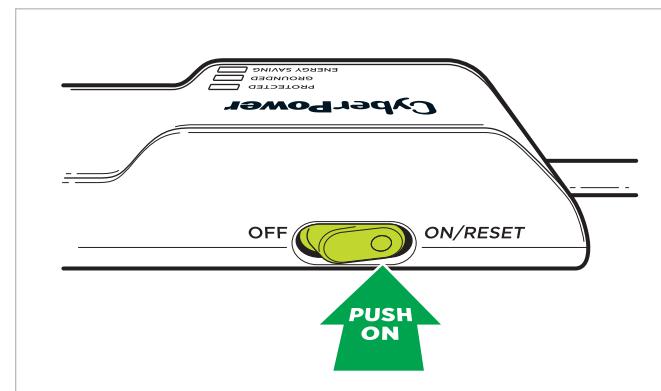

4. Connect infra-red (IR) sensor to surge protector into small input jack.

5. Place glossy side of IR sensor in sightline of remotes.

6. Turn power switch to **ON**.

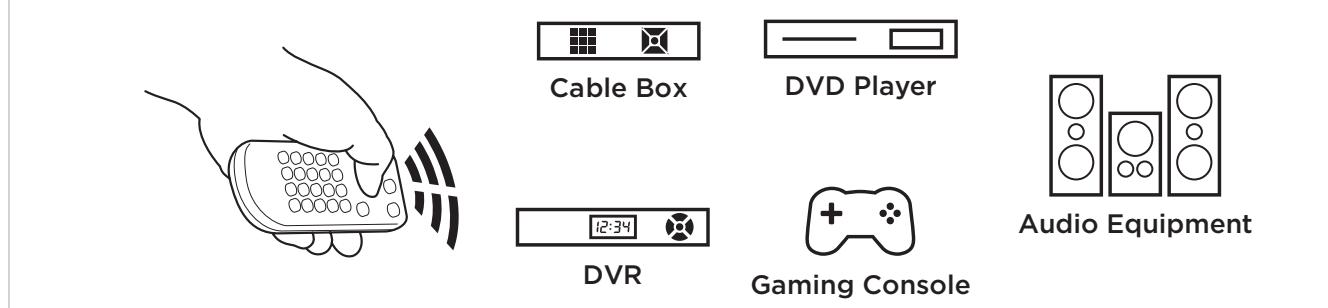

## OPERATION:

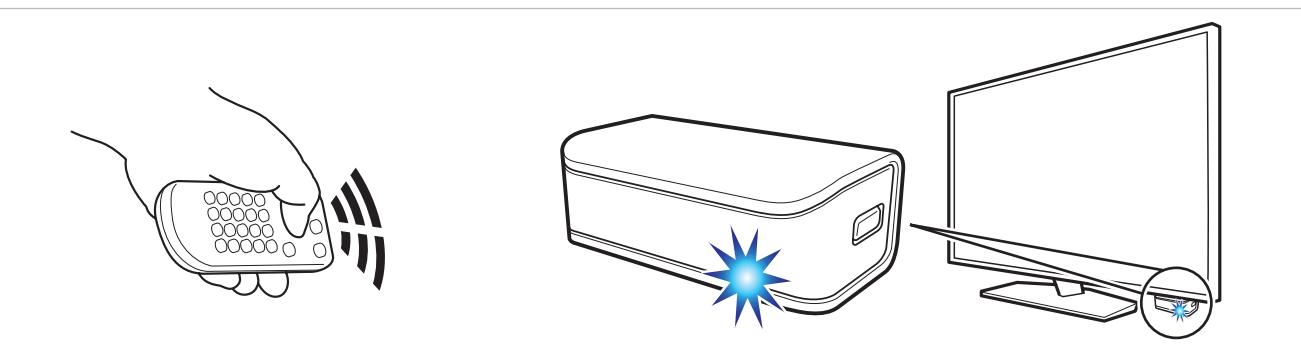

1. Power TV **ON**.

2. Power **ON** DVD player, game console, speakers, etc.

3. Energy saving timer's default setting is 1 hour. The IR sensor's blue LED light will blink for 15 minutes after one hour of last click of remote. Click any button on a TV remote or the volume button on a cable provider's remote to restart energy saving timer at zero. Blue LED light will stop blinking for another hour.

4. Power **OFF** when done watching.

**NOTE:** IR sensor blinks for 1 minute after TV powers off. Power strip will turn off energy saving outlets.

## CHANGING ENERGY SAVING TIMER

### One Hour:

1. Hold the IR sensor button down for 7 seconds.
2. LED light will flash 3 times, release.
3. Press IR sensor 1 time.
4. LED light will flash 1 time, and timer will be 1 hour.

### Two Hours:

1. Hold the IR sensor button down for 7 seconds.
2. LED light will flash 3 times, release.
3. Press IR sensor 2 times, pausing in between.
4. LED light will flash 2 times, and timer will be 2 hours.
