- Single-sided USB headset for situational awareness and ideal comfort

Product promise

No min. or no max. characters

The single-sided design of the PC 7 USB brings numerous benefits. In only covering one ear, it lets you maintain keen awareness of your surroundings: a vital function in many work, educational and social settings. The design also keeps the headset remarkably lightweight and comfortable, while still delivering clear, precise conversation thanks to EPOS' dedication to high quality audio in all that we do. Furthermore, the single-sided form's elegance means the PC 7 USB is available at a highly competitive price point.

A USB connection brings simple plug-and-play connectivity to PC and Mac®, while a unidirectional noise-cancelling microphone cuts out background clatter, meaning you can be confident in speaking with clarity. The PC 7 USB is equally robust and durable, making it an investment that will last.

Single-sided USB headset

For those that want high-quality audio while still being aware of their immediate surroundings, the PC 7 USB is the perfect headset choice, whether working from home, studying via e-learning, or simply staying in touch.

The single-sided design delivers high-quality audio to one ear, while leaving the other free, so you can be sure of what is going on around you. The same single-sided format also ensures that the headset is comfortable and extremely light weight, and available at a highly competitive price point.

The USB connector makes connecting the headset to PC and Mac® simple and fast, and a unidirectional noise-cancelling microphone minimizes background noise so your voice can be heard clearly. Durable design, meanwhile, means the PC 7 USB is built to last.

sacrificing situational awareness.

Plug-and-play simplicity

A reliable USB connection lets you use the headset with both PC and Mac® quickly and easily, meaning you can get started with communicating straight away. If ease of use matters to you the PC 7 USB is ready to go straight from the box, with no need to download any software.

Noise-cancelling microphone

Featuring a rigorously engineered unidirectional passive noise-canceling microphone that you can rely on, the PC 7 USB single-sided headset cuts out background clatter while you speak, enabling clear communication that puts accuracy and understanding first.

Lightweight and comfortable

The elegant design of the PC 7 USB headset keeps it extremely lightweight, while careful engineering means it is so comfortable you will forget it is there, even if you are wearing it throughout a busy day working or studying remotely.

Designed to last

Manufactured to endure the rigors of daily life – including long days filled with important calls – the PC 7 USB is built to be highly robust. EPOS' meticulous design process means you can rely on the headset to be with you long into the future.
