

BE Safety Screens U-Shape

Safety first

COVID19 will have a lasting impact on our office environments. The new normal of the "2 meter society" requires hygiene, discipline, sufficient distance and safety.

Sitting safely and securely behind your desk has become essential.

The plastic soup is a common and major problem. We therefore believe that it is our responsibility to make a contribution and tackle the plastic waste problem. BakkerElkhuizen does this by using as little plastic as possible and by recycling PET bottles and making them into new products.

PET bottles and acrylic are extremely suitable for reuse. A fair amount of PET bottles in circulation are returned and reused. Unfortunately a staggering amount end up as waste and in some cases dumped in to our oceans.

BE Safety Screens, for healthy and safe working

With the BE Safety Screens U-shape you can create a healthy workplace. You can choose to equip the screen with or without acrylic screens which can be removed for more thorough cleaning. The walls are made of Petvilt for privacy and noise reduction. The uniqueness of this product is that both the PET felt and the acrylic are 100% circular - Recycled and Recyclable.

The advantages at a glance

Safety first

With the BE Safety Screens you create a safe and healthy working environment in every office. These panels are made of 100% recycled material.

Improved privacy

Because PET felt is a solid material, users have more privacy. If desired, screens are also available with transparent, acrylic windows for increased interaction with colleagues.

Absorbing noise

PET is excellent at reducing noise pollution. Today, it is often used as an acoustic material to reduce noise levels and improve concentration.

Cable management

The BE Safety Screens include a brush-opening at the bottom of the back so that you can easily organise of all your cables and accommodate a monitor arm.

Easy installation

The BE Safety Screens are easy to unfold and place on the desk. With easy to use clamps these panels stay neatly in place.

Easy to clean

Contrary to most expectations, PET Felt is highly resistant to chemicals and can be easily cleaned with water or alcohol based products, just like acrylic. Water or quality detergent cannot damage PET Felt or acrylic. If a stain remains, it is advised to dab it with a dry cloth while the PET Felt is still wet. Do not rub!

Knowledge Center

Worldwide we speak of the era before and after the coronavirus. Experts agree that we are facing a big change, at least in the short term and maybe beyond.
