

ThinkCentre M7 Series desktops offer enterprise security features, a wide range of configurations and expansion options, and reliability trusted by leading businesses across the globe.

All-new compact design has an intelligent cooling system which improves airflow through critical components, potentially lengthening the lifecycle and enabling improved performance or 3-5dB noise reduction, depending on the mode selected. 128GB memory capacity, space to install up to 3 storage devices (1x PCIe SSD and 2x HDD) and a graphics card, mean this desktop can be configured for a wide range of usage scenarios.

### **REASONS TO BUY**

Security features include an optional Chassis eLock which locks the computer from the inside preventing unauthorized removal of components, a cable retention system preventing removal of wired peripherals, and the ability to disable individual USB ports or prevent data transfer through them.

Despite its smaller size, this desktop has 9x USB ports, including a front-facing USB-C connector with 15W power output, that can be used for charging mobile devices.

This device is highly energyefficient, with Energy Star and **EPEAT Silver certifications**, ensuring you save money and reduce environmental impact. TCO certified and TUV low noise certified on some configurations.
