

## PROFESSIONAL MACHINES FOR ADVANCED USERS

Step up to a dual-processor workstation with the ThinkStation P7 Series, designed for advanced computing with large memory and storage arrays.

## ThinkStation P720

Smarter  
technology  
for all

Lenovo

A dual-processor workstation supporting up to 52 cores in total, 12 memory DIMMs and three PCIe x16 slots for the most powerful graphics cards available today. Our patented Tri-Channel cooling directs airflow over key components using an air baffle inside the machine. This separates the air into 3 zones, reducing the need for additional fans, which increase the risk of system failures if they break down.

### REASONS TO BUY

Supports up to 12 storage drives and has RAID configurations to optimize performance and provide redundancy. If using high-end processors, install up to 9x M.2 PCIe SSD storage modules.

Certified or recommended for use with: Adobe Photoshop, Adobe After Effects, Adobe Premiere Pro

Scalable multicore processing and error-free ECC memory capacity ensure that this workstation can handle even the most demanding data analysis workloads.
