

Epson PLQ-50

DATASHEET / BROCHURE

Fast and reliable 24-pin dot matrix printer series, with the capability to handle passbooks and an LCD screen for better usability.

Ideal for the banking sector and post offices, the PLQ-50 models are a dot matrix printer series that is ultra-reliable and has the capability to handle passbooks. It is fast, economical to run, and it features an LCD screen for user convenience.

When upgrading existing passbook printers, the premium performance of the PLQ-50 series makes it the ideal choice. With an improved mean time between failures of 35,000 hours and reliable dot matrix technology, you can depend on these printers to deliver high-quality output with minimal intervention.

Equally, when time is tight, the PLQ-50 series delivers fast printing of up to 560 characters per second (High-Speed-Draft, 10cpi), utilising 24-pins and 94 columns. Additionally, up to 6 copies can be produced simultaneously with the original.

The printer's performance is matched by its cost-effectiveness. The ribbon is compatible across all of the Epson Passbook range and represents a budget friendly printing solution.

An LCD screen also provides valuable user convenience.
