HP V24 FHD Monitor

Featuring

FHD display / 1080p display

Be prepared for brilliant visuals and crisp images with the unforgettable quality of this stunning FHD display.¹

1-millisecond response time with Overdrive

How fast your pixels can react to changing frames is critical for fast-paced gaming, and a 1-millisecond response time ensures even the most action-packed moments are fluid, crisp, and free of motion blur.²

Adjust your view

Adjust the screen to your personal preference with a 5-degree forward or 20-degree backward tilt.

75Hz refresh rate

Uncap your in-game frame rate, because with a 75Hz refresh rate this display is capable of clearer, high-resolution details, smoothly moving from frame to frame allowing for faster split-second reaction time.²

Low blue light

Using the Low Blue Light mode subtly shifts your display's colors to a warmer spectrum, while making whites more natural and putting less strain on your eyes.

TN panel

Enjoy the latest action movie or high-octane video game with the low pixel latency and snappy response times of this TN panel.

¹ Full high-definition (FHD) content is required to view FHD images.

Messaging Footnotes

¹ AMD FreeSync™ is only available when it is connected on DisplayPort™ or HDMI. FreeSync is an AMD® technology enabled on FHD or QHD monitors and is designed to eliminate stuttering and/or tearing in games and videos by locking a monitor's refresh rate to the frame rate of the graphics card. AMD Radeon Graphics and/or AMD A-Series APU-compliant monitors with DisplayPort™/HDMI Adaptive-Sync required. AMD 15.11 Crimson driver (or newer) required to support FreeSync over HDMI. Adaptive refresh rates vary by monitor. More information is available at www.amd.com/freesync.
