

### An everyday monitor that's easy on you.

Browse the web, stream your shows, play games, and get some work done on the large-screen, AMD FreeSync<sup>™</sup>-certified<sup>1</sup> HP V24 FHD Monitor that adjusts to your comfort needs and delivers stunning picture quality in highly affordable style.

#### Crisp image clarity for all your content.

Get lifelike color and sharp details for everything you do, from answering e-mails, checking your social feeds, and gaming to watching the latest shows, on a 24" diagonal Full HD screen.

#### Elevate your game.

Keep your action smooth, crisp, and free of motion blur with a 75Hz refresh rate and 1 ms response time<sup>2</sup>. This AMD FreeSync<sup>™</sup>-certified monitor<sup>1</sup> eliminates stutter, input lag, and screen tears when you synchronize the refresh rate with your GPU.

#### Modern connectivity.

Quickly connect to your devices and additional monitors through the HDMI and VGA ports and get smooth visuals, no dongles required.

### Featuring

#### FHD display / 1080p display

Be prepared for brilliant visuals and crisp images with the unforgettable quality of this stunning FHD display.<sup>1</sup>

#### 1-millisecond response time with Overdrive

How fast your pixels can react to changing frames is critical for fast-paced gaming, and a 1-millisecond response time ensures even the most action-packed moments are fluid, crisp, and free of motion blur.<sup>2</sup>

#### Adjust your view

Adjust the screen to your personal preference with a 5-degree forward or 20-degree backward tilt.

#### 75Hz refresh rate

Uncap your in-game frame rate, because with a 75Hz refresh rate this display is capable of clearer, high-resolution details, smoothly moving from frame to frame allowing for faster split-second reaction time.<sup>2</sup>

#### Low blue light

Using the Low Blue Light mode subtly shifts your display's colors to a warmer spectrum, while making whites more natural and putting less strain on your eyes.

#### TN panel

Enjoy the latest action movie or high-octane video game with the low pixel latency and snappy response times of this TN panel.

<sup>&</sup>lt;sup>2</sup> All performance specifications represent the typical specifications provided by HP's component manufacturers; actual performance may vary, either higher or lower.

| Product number   | 9SV73AA   |
|--|---|
| UPC number   | 194721890153  |
| Swivel   | No swivel   |
| Tilt   | -5 to +20°  |
| Display size   | 61 cm (24*)   |
| Aspect ratio   | 16:9  |
| Display type   | TN  |
| Pixel pitch  | 0.276 mm  |
| Response time  | 1ms GtG (with overdrive)  |
| Brightness   | 250 nits  |
| Contrast ratio   | 1000:1  |
| Display contrast ratio (dynamic)   | 1000000:1<br>Black;   |

#### Messaging Footnotes

<sup>1</sup> AMD FreeSync<sup>™</sup> is only available when it is connected on DisplayPort<sup>™</sup> or HDMI. FreeSync is an AMD<sup>®</sup> technology enabled on FHD or QHD monitors and is designed to eliminate stuttering and/or tearing in games and videos by locking a monitor's refresh rate to the frame rate of the graphics card. AMD Radeon Graphics and/or AMD A-Series APU-compliant monitors with DisplayPort<sup>™</sup>/HDMI Adaptive-Sync required. AMD 15.11 Crimson driver (or newer) required to support FreeSync over HDMI. Adaptive refresh rates vary by monitor. More information is available at www.amd.com/freesync.
<sup>2</sup> All performance specifications represent the typical specifications provided by HP's component manufacturers; actual performance may vary either higher or lower.
