Wired mechanical gaming keyboard
Rainbow backlight Dual mode switchable, Magnetic wrist rest, Metallic alloy surface

SPK8614/00

Highlights

Full n-key rollover

Fast complex gaming key strokes demand advanced performance. With full N-key rollover every key is registered independently without confusion so that each keystroke is correctly registered regardless of how many other keys are being pressed or held down at the time.

50 million keystroke lifespan

How long does it take to get to 50 million keystrokes? A long time. Familiar and reliable this keyboard is built to last for many years of fast action.

Alloy surface design

Everything about this keyboard is built to last for rugged high performance use, even down to the keyboard surface. The Alloy surface is designed for high durability, superior rigidity and looks great too.

Fast mechanical switches

The most popular mechanical switches for gaming keyboards, Cyan mechanical switches offer gamers a light tactile clicky key for rapid activation and performance.

Dual-mode switchable

Cool rotary controller, you can easily switch between gaming and work modes. Quickly adapt backlight and volume to any atmosphere.

Detachable palm rest

This magnetic palm rest can be easily connected to or detached from the keyboard as needed. It gently protects your wrists, so that you are free of exhaustion even after a long time gaming.

Rainbow backlight

Cool rainbow backlight gives you more immersive gaming experience, secure your victory every time.
