

**MAINSTREAM COMPUTING FOR A  
VARIETY OF BUSINESS USES**

Our smallest desktop series is built to be energy-efficient and has an ultra-compact footprint 5X smaller than a 14" laptop.

## ThinkCentre M75n Thin Client

Smarter  
technology  
for all

Lenovo

Deploy devices at a lower cost and secure company data with this miniature Thin Client solution. Choose from Windows IoT Enterprise or Linux-based Lenovo Terminal Operation System which supports Microsoft, VMware, Citrix and XenDesktop web applications. Our smallest PC delivers all the functionalities of a regular desktop in a device not much bigger than a smartphone. Place it anywhere – on the desk, mounted on a wall or behind a display.

### REASONS TO BUY

No compromises on security. Built-in AMD Memory Guard provides full memory encryption to help protect sensitive data if the device is ever lost or stolen. Smart USB Protection can disable data transfer capabilities of individual USB ports while a Kensington lock slot protects against physical theft.

With 6x USB ports and other connectors, users can connect to all essential peripherals and displays. It is also our most energy-efficient desktop PC, with around 30% less energy consumption than a ThinkCentre Tiny.

Our most power-efficient desktop with a 15W CPU and features like Modern Standby that further reduce power consumption.
