

SFP-4330 Version: 2

1.25Gbps Single-mode BIDI Industrial SFP Transceiver, 20km, TX 1310nm / RX 1550nm, -40°C to 85°C

The LevelOne SFP-4330 is a high performance, cost-effective SFP transceiver. It provides up to 1.25 Gbps bi-directional data transfer rate at distances up to 20km on a single fiber core. These bi-directional SFP Transceivers allow data transfer in either direction through a single optical fiber by employing separate wavelengths travelling in either direction.

The SFP-4330 transmits using a wavelength of 1310nm and receives using a wavelength of 1550nm. When coupled with the LevelOne SFP-4340 transceiver which transmits at and receives at the opposite rates (1550nm TX and 1310nm RX) you get bi-directional data communication on a single fiber core.

This Hot-swappable SFP transceiver offers the latest Industrial standard in full-duplex Ethernet connectivity and withstands under wide range temperature operation.
