This printer is intended to work only with cartridges that have a new or reused HP chip, and it uses dynamic security measures to block cartridges using a non-HP chip. Periodic firmware updates will maintain the effectiveness of these measures and block cartridges that previously worked. A reused HP chip enables the use of reused, remanufactured, and refilled cartridges. More at: http://www.hp.com/learn/ds

[2] Very short start up times compared to alternative 126-inch dye-sublimation based textile printers under $250,000 USD available as of July, 2020. Preparation time including 40% less loading time, printhead cleaning, and warm up time. This is based on internal HP testing in July, 2020 and features including automatic media tension adjustment and easy, simple media path, automatic and optimized printhead cleaning, and warm up in parallel with loading. Testing was performed measuring the time from starting the printer loading process until the printer starts printing, and measuring time with a chronometer.

[3] Production-Economy print mode, 2-pass, 50%, for certain patterns of curtains land upholstery for interior décor applications. Based on internal HP testing in February, 2019 on transfer paper (Coldenhove Jet-X 57 grams, 126-in/3.2-m width).

[4] Individual services may be provided by HP or an HP-authorized partner. Some services depend on printer, service contract, and region availability.

[5] HP PrintOS is available in both web and mobile app view and needs the printer to be connected to the Internet. The HP PrintOS Mobile Application is compatible with Android™ 4.0 or later and iPhone mobile devices running iOS 8 or later.
