Double-conversion UPS with detachable PDU and maintenance bypass switch provides fulltime sine wave output for advanced network applications.

Features

Protects Mission-Critical Rack-Mounted Equipment against Damage, Downtime and Data Loss

Tripp Lite's SmartOnline® SU6KRT3UGMB Unity Power Factor UPS system with Maintenance Bypass Switch and Detachable Bypass PDU protects connected equipment against damage, downtime and data loss due to power outages, voltage fluctuations and transient surges. Unity Power Factor design enables full 6000VA / 6000W output capacity. In double-conversion mode, this UPS system maintains perfect output by continuously converting AC input to DC, then reconverts UPS output to fully regulated sine wave AC with $\pm 1\%$ voltage regulation and zero transfer time between online and battery modes. Featuring true on-line, double-conversion operation, Tripp Lite's SU6KRT3UGMB provides the highest level of UPS power protection for critical server, network and telecom equipment.

High Availability Configuration Offers Reliable, Expandable Battery Backup Included Maintenance Bypass Switch is mounted on a detachable Bypass PDU that securely mounts to the rear-rails of a 4 post rack enclosure and remains safely in-place powering your equipment during UPS maintenance. The UPS connects to the Bypass PDU using a sophisticated blind-mate connector set with self-aligning guide-pins to ensure safe and reliable whole-UPS replacement with zero downtime for connected equipment. UPS battery backup keeps connected equipment operational through short power failures, and provides time to save data and perform an orderly system shutdown in case of a prolonged blackout. The internal battery set provides 8.5 minutes of support at half load and 3 minutes at full load. During normal operation, incoming utility power keeps the battery fully charged so backup power will be available when needed. Advanced temperature-controlled battery charge management system provides efficient recharge and enhanced battery lifespan. For mission critical applications demanding continuous uptime, the 6kVA UPS can provide expandable runtime with optional BP192V12RT3US external battery pack (sold separately). Battery-independent restart ensures automatic UPS power-up after lengthy power outages, even with expired batteries.

Economy Mode Helps the Environment and Your Cash Flow Operates with >98% full-load efficiency in optional economy mode significantly reducing BTU heat output and operating energy costs.

Intuitive Front-Panel Interface offers Convenient Monitoring Front-panel LEDs indicate line power, AC output, On-battery mode, and Fault conditions. The LCD readout with scroll controls supports visual monitoring of a variety of control options to support advanced UPS settings and configurations. The panel
