

Work better without spending more.

Eco-Friendly Monitor Series with Improved Image Quality

Presenting monitors for those who are both budget-conscious and quality-conscious. The Samsung SR35 series desktop monitors offer Full HD resolution in near bezel-less form factors. They're ideal for virtually seamless dual-monitor setups, and IPS panel technology ensures bright, vivid colors. The 178° viewing angles ensure greater collaboration, with all team members able to view the displays with no color washout, even from off-angles. And the SR35 series offers HDMI and VGA connectivity. They're the perfect monitors for doing ordinary tasks extraordinarily well.

Shown: 22" silver bottom bezel. Also available in 24" and 27" black bottom bezel.

Key Features

True Colors All Around

Now the whole team can see perfectly. The IPS panel preserves color vividness and clarity across every inch of the screen, while wide viewing angles of 178° aid collaboration. You can work comfortably on the productivity-boosting wide display and everyone can see accurate tones and shades from virtually every angle, with no color washing.

Less Bezel, Full Focus

A minimal bezel allows maximum concentration. The SR35 series' virtually bezel-less screen provides nearly gapless dual-monitor setups. See more at once with no distractions.

Easy HDMI and VGA Connectivity

The SR35 series offers HDMI for quick, high-speed connections, as well as VGA for legacy analog applications.

AMD FreeSync

AMD FreeSync technology helps avoid tearing and reduce stuttering, ensuring smoother video display and playback.

Easy on the Eyes

Eye Saver Mode and Flicker Free technology provide increased comfort. When Eye Saver Mode is active, blue light levels are lowered, for reduced eye strain during long work hours. Flicker Free technology adds further viewing comfort by eliminating flickering at all levels of brightness.
