## Dimensions

- Packaging dimensions (W x H x D): 172 x 238 x 614 mm
- Product dimensions (W x H x D): 95 x 105 x 110 mm
- Weight: 0.8 kg
- Weight incl. Packaging: 5.5 kg

## Power

- Battery type: AA, LR6
- Battery voltage: 1.5 V
- Mains power
- Number of batteries: 4

# Highlights

## Time Projection

Time Projection lets you project the time on any surface at any angle. The innovative projection system ensures that the time will always be positioned and orientated correctly. Unlike conventional LCD displays, the negative LCD display allows light to pass through without significant distortion. A powerful LED luminously lights up the negative LCD to project the light within a certain distance. With its accurate lens, the clock projects the image and even adjusts the focus to your satisfaction. No need to get up and check the time - just open your eyes!

## Rotate & reverse the image

Rotate & reverse the projection image for easy viewing

## Large backlit LCD display

Backlit LCD display ensures easy viewing and operation in low light conditions, and provides clear information at a glance.

## Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

## Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

## Sleep Timer

Sleep timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 2 hours) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.

## Repeat alarm

To counter oversleeping, the Philips Clock radio has a snooze feature. Should the alarm ring and you wish to continue sleeping a bit longer, simply press the Repeat Alarm button once and go back to sleep. Nine minutes later the alarm will ring again. You can continue to press the Repeat Alarm button every nine minutes until you turn off the alarm altogether.
