INTERFACE:

3.2

USB 3.2 GEN. 1

AVAILABLE CAPACITIES:

16 - 128 GB

### READY TO WORK

Type-C is becoming the most popular USB type used to transfer data between all electronic devices. The growing popularity of this solution is supported by the fact that manufacturers of next gen laptops, smartphones, PCs and other devices are increasingly equipping their products with an additional "C" next to the standard type A connector or choose only Type-C™. GOODRAM OTG ODA is an excellent solution that will work both with an old and new electronic devices generation laptops, smartphones and PCs. The ODA Flash drive is equipped with two fast USB 3.2 connectors: one standard type A and the Type-C™, which means that data transfer between devices of different generations has never been so easy and fast.

DESIGNED FOR DATA TRANSFER BETWEEN:

SMARTPHONE

TABLET

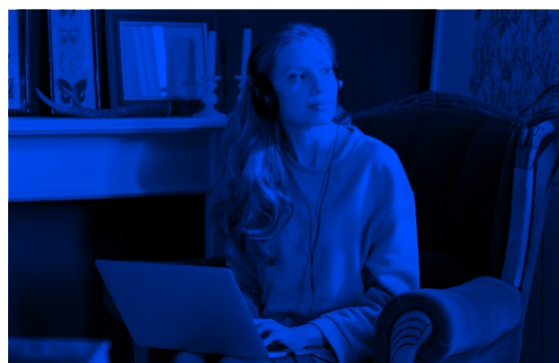

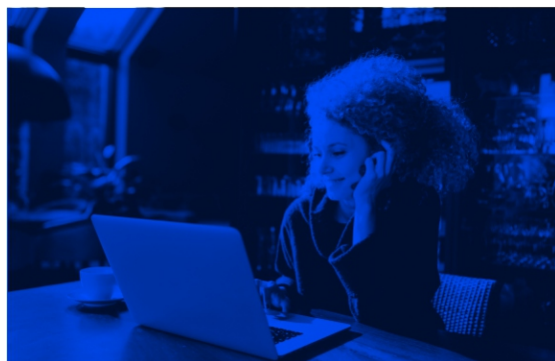

CAMERA

LAPTOP

PC

### HIGHEST QUALITY = LIFETIME WARRANTY

We manufacture ODA using only the best components and during the production process the product passes through multi-stage tests and rigorous quality control. Thanks to this, ODA is covered under lifetime manufacturer's warranty.
