# MFXKIT COOLING FANS
USER MANUAL

The MFXKIT provides 3 ARGB cooling fans with a 1100 RPM cooling performance and a powerful lighting system that gives up to 220 effects.

Follow this sheet to enjoy all its features.

Remote Control functions

- S+/S−: Increase/Decrease the speed of the fans
- M+/M−: Next/Previous lighting mode
- ⬆ ⬇ : Increase/Decrease lighting brightness
- ● Predefined colors
- Switch between Remote Control mode and Motherboard Control mode
- AUTO: Lighting effect automatic change

Lighting control

- **RF remote control system**
  Choose between 220 default lighting modes thanks to a quick and easy controller

- **ARGB motherboard connection system**
  1. Hold the M/B button in the controller to switch between Remote Control mode to Motherboard Control mode. (NOTE: The controller won't work in this mode)
  2. Press M/B again for 5 seconds to switch back to RC.

Note to user: Check for ARGB compatibilities on your motherboard's user manual. Please keep this sheet for future reference. Visit our website **www.marsgaming.eu** for more info about your product.

*LED1/LED2: Compatible with 3PIN PH2.0 connector LED strips
*Change preset light effects with Reset SW of the case (Optional)
