

MPN: MMLE085-8GB

## 8GB Memory Module BGA, DDR4 PC4 25600, 260PINS, SO-DIMM

In CoreParts you will find a wide range of alternative RAM modules all using original chip sets, that match the performance of your original RAM modules with different sizes, and capacities, manufactured by high-end, certified and trusted suppliers.

- High Quality
- Tested and certified
- Matching Performance
- Reliable with 10 years Warranty

## Specifications

|                    |                                |                 |
|--------------------|--------------------------------|-----------------|
| Features           | Component for                  | Notebook        |
|                    | ECC                            | No              |
|                    | Internal memory                | 8 GB            |
|                    | Internal memory type           | DDR4 PC4 25600  |
|                    | Memory clock speed             | 3200 MHz        |
|                    | Memory form factor             | 260PINS SO-DIMM |
|                    | Memory layout (modules x size) | 1 x 8 GB        |
|                    | Memory voltage                 | 1.2 V           |
|                    | Module configuration           | 1024M x 8       |
| Other features     | Capacity                       | 8 GB            |
|                    | Chips organisation             | 1024*8          |
|                    | Number of pins                 | 260             |
| Vendor information | Brand Name                     | CoreParts       |
|                    | Warranty                       | 1 Year(s)       |
