I 38-series

The 38-series is designed for seamless integration and maximum flexibility with the Open Frame side mounting holes, landscape, portrait and face-up orientation and 24/7 operating time.

Engineered to last with the ball-drop proof, scratch resistant, edge-to-edge glass and PCAP touch technology; allowing you to build only the best kiosk and interactive experiences. Available in sizes from 32 to 65 inch.

The 38-series are perfect for businesses, retail, education and hospitality.

I 61-series

Choose maximum flexibility and safety for your retail installations.

The 61 series professional large format displays are the ideal interactive display solution for in-store communication. They can operate 24/7 both in landscape and portrait orientation, and thanks to the touch through-glass function you can be sure your installation is water and dust proof.

The extra 100x100 VESA mounting holes at the back allow you to easily mount an external computer (Android or NUC) directly onto the display, making it an all-in-one solution.

Available in 43" and 55".

I 03-series

The interactive 03-series displays feel right at home in every classroom and meeting room. They are ready to captivate your audience with stunning graphics, content-rich presentations and interactive whiteboard sessions.

The displays come standard with pre-installed software package for interactive learning and effective collaboration. Equipped with a 4K UHD (3840x2160) high-resolution IPS panel for life-like images and videos. The 4mm thick hardened glass, infrared touch and metal bezel ensure a trouble-free operation for years to come.

With WiFi module included as standard and the slot PC available as an option, the all new 03-series (TExx03MIS-B1AG) infrared touch screens can become your all-in-one solution bringing interactivity and collaboration to meeting rooms across industries.
