Highlights

Our packages are small
We make our packaging as small as possible to minimise materials used in production as well as fuel during transportation.

Keep time with fun clocks
Switch to the clock mode when you don't need to view photos. Instantly, your PhotoFrame become a clock.

Automatic slideshow startup
Slideshow of photos starts automatically once you insert the memory card.

imagen Pro for vibrant colours
The unique Philips imagen enhancement technology automatically analyses your photos to correct colour and adjust for optimal contrast. imagen Pro is a more advanced image enhancement which includes the 3 essential elements from imagen to have more colour accuracy, colour depth and smart contrast. On top of these, imagen Pro offers enhanced skin colour, sharper images and flicker-free photo viewing which is very important for still pictures.

RadiantColor
RadiantColor is an exclusive Philips technology for displaying smaller photos in the optimal 4:3 ratio by extending the colour on the edges of a less-than-full-screen photo to the sides of the screen, eliminating black bars and aspect ratio distortion.
