Easily adjust the position of the door trays to suit your needs.

By using independent circulation systems for the freezer and fridge frost is prevented, as are odours from one section to the next.

Does your fridge fit in a perfect spot but never quite opens ideally? By switching which side the door opens your fridge becomes part of your kitchen not an obstacle.

This advanced air flow distribution circulates the cold air through the whole fridge meaning that no food is exposed to direct cold air which can dry food out.

No one wants a smell to creep from the fridge to the freezer, this makes sure that doesn't happen. Your ice cream is safe from your cheese.

Ergonomically designed, to save you space in your kitchen. The doors opens flush so they fit perfectly in your kitchen space.
