

Filex Galaxy Modular Flex Dual

Suitable for 2 screens

The Filex Galaxy Modular Flex Dual is an ergonomically flexible monitor arm, suitable for 2 screens.

Each screen can be adjusted separately in both depth and height thanks to the gas springs. Rotating and tilting the screens is no longer a problem.

Placing the screen too low can lead to tension in the upper neck. Placing it too high (the top should not be above eye level) can also lead to problems.

Possibly even more important is the adjustability of the depth, ensuring an optimal viewing distance. This allows you to better take in information and puts the least amount of strain on the eyes. This optimal screen position works better, more comfortably and increases productivity with 10% when compared to an incorrect positioning (Sommerich et al, 1998).

Flexible and ergonomical

Using a monitor arm is important as an optimal screen position is more comfortable and increases productivity by 10% compared to an incorrect position (Sommerich et al, 1998).

An ergonomical work place increases the comfort and productivity of screen users. Monitor arms are an important part of this and create more space in your work place as well as improve your work posture.

The features of the Filex Galaxy Modular Flex Dual

Viewing angle

This Filex Galaxy setup is equipped with 2 monitor arms with a static straight part and a dynamic gas spring for an optimal height and depth. The VESA head allow the screen to tilt, rotate and turn for an optimal viewing angle.

Clamp

Because of the wide range of clamps, it is possible to mount the Filex Galaxy monitor arm onto most desktops. The desk clamp and cable space feeder are included.

Rotation stop

The integrated rotation stop in the Filex Galaxy monitor arm ensures a desk can be placed against a wall or other desk (desk-to-desk) without the arms or wall touching.

Modular

The modular system provides you an easy work place expansion in the future. Simply expand to multiple screens, extend your post or include a electrification unit or CPU holder.

Circular

All parts are 100% recyclable and made from 100% sustainable materials. Because of the extensive range from 2 to 12 kg, you will not need a new gas spring when you use a different weight screen.

Design

Cable management is included in the Filex Galaxy series. This ensures a neat and tidy and professional look. All parts are available in White, Silver or Black and have a 5 year warranty.

Knowledge Center

An ergonomic workstation promotes the comfort and productivity of DSE workers. It is easy to create the ideal workstation with a few minor adjustments. Monitor arms provide more space for your workstation and improve your posture.

In addition, the height and distance of monitor arms can be adjusted easily. Moreover, more and more people are working...
