

Yealink MVC-BYOD-Extender

Immersive BYOD meetings
Bring UC anywhere

Yealink MVC-BYOD-Extender supports the transformation between Microsoft Teams Rooms (MTR) and different types of UC platforms. Bring your own device, plug the extender USB cable to the laptop, and start a video meeting whatever you want.

Users can enjoy the immersive video and audio experience with the dedicated devices, easy camera control on MTouch II touch panel, and wireless sharing through WPP20 presentation pod.

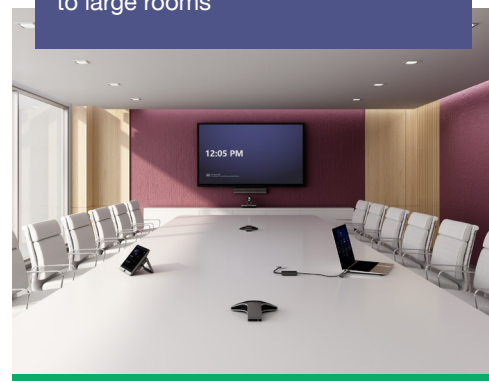

> Plug-and-play
easy and effective meetings

> Simple and flexible setup
one CAT5e cable connection,
easy to deploy and manage

> Up to 100-meter endurance
keep productivity from small
to large rooms
