

# Heat Shrink End Cap for PE Cable

Item no.: LVN125470

## PRODUCT OVERVIEW

Heat shrink end caps are essential for situations that call for extra protection against abrasion, moisture, chemicals and corrosion.

Heat shrink end caps are most commonly used to insulate and seal off networking cables, especially useful for securing PE cables for outdoor use during the installation process. The high crimp ratio ensures a perfect seal.

## SPECIFICATIONS

<b>Use for</b>	For Ø4-8 mm PE network cables
<b>Material</b>	Polyolefin
<b>Color</b>	Black
<b>Temperature</b>	Crimping temperature +135°C
