MODEL NUMBER: U442-DOCK8-B

10-port USB-C docking station lets you mirror or extend video from your MacBook Pro or Windows laptop across as many as 3 different displays.

Features

USB-C Docking Station Turns Your Device's USB-C or Thunderbolt 3 Port into 10 New Ports

This universal USB-C dock with PD Charging expands the potential of your Windows laptop, Chromebook, MacBook Pro, smartphone or PC's USB-C or Thunderbolt 3 port. Connect the dock using the included USB-C cable, and add 10 ports to your device: 4K HDMI(2x) 4K DisplayPort RJ45 Gigabit Ethernet USB 3.2 Gen 2 Type-C(3x) USB 3.2 Gen 2 Type-A USB-C PD charging 3.5 mm mini stereo

Supports USB-C DisplayPort Alternate Mode for Transmitting Audio/Video Signals

By connecting the detachable USB-C cable to a source device that supports USB DisplayPort Alt Mode, you can output 4K video and digital audio to a compatible monitor, television or projector without installing special software drivers.

Transmits Crystal-Clear 4K Video and Digital Audio with 4:4:4 Color

The DisplayPort and HDMI outputs support single-monitor up to 3840 x 2160 at 60 Hz with 2.1-channel surround sound. HDCP 2.2 compliance allows you to stream 4K Amazon and Netflix content with no complications. This dock also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

Various DisplayPort Versions Allow Connection of Multiple Displays

By connecting the included USB-C cable to a source that supports DisplayPort 1.2 HBR2, DisplayPort 1.4 HBR3 or DisplayPort 1.4 HBR3 with DSC support, you may connect up to three displays simultaneously. This allows you to display the same image on all monitors, extend your host desktop across all with different windows open on each, or combine all into one large display as a video wall. **Note:** See **Cable Matrix** in the included Owner's Manual (also downloadable in PDF format from this page) for more information.

USB 3.2 Gen 2 Ports Connect Keyboards, Thumb Drives and Other Peripherals

Three USB-A ports and one USB-C port accept USB peripherals, such as flash drives, RAID storage, mice and keyboards. All four ports support USB 3.2 Gen 2 data transfer rates up to 10 Gbps and are backward compatible with previous USB generations. One USB-A port also supports 5V 1.5A (7.5W) of power dedicated to fast-charging your mobile device. **Note:** Host device must support USB OTG (On-the-Go).
