

HP 950 4K Webcam

All your streams come true

When you go live, you want to look and sound good from every angle. Turn on the HP 4K Webcam's wide field-of-view (FOV) with AI face tracking¹ and let the world see you at your best, wherever you are. The versatile camera clips on anywhere to keep up with you and your stream.

Look good from every angle

Feel confident to share the real you on this streaming webcam. In 1080p or 4K - up to you. Capture more of you and your environment with up-to-103° field-of-view. Now you can see even more of your background, just adjust the FOV to determine how much. Plus, you will never have to worry about your background stealing the show, this webcam has AI face-framing technology¹ that follows you ensuring you always stay in focus.

Adapt to the action

AI face framing¹ ensures your face is always in focus. Amazing integrated HP Webcam Control Center² lets you dial it all in, from video controls to filter effects. Plus, lighting auto adjusts. You're ready to roll.

Pick your setup

Versatile mounting allows you to pick your streaming setup, whether on a monitor, laptop or tripod - it's your choice. It can swivel 360° if you want your audience to look around and tilts downward to present what's on your desk. And Keystone Correction¹ autofocuses documents for viewing or scanning.

Share when you want to

Ensure your privacy with a built-in shutter that blocks your webcam from uninviting eyes. And be confident that it will work with platforms such as Zoom, Teams, Twitch and YouTube Live.

HP 950 4K Webcam
