Ownership of all other trademarks is attributed to their due owner.

- An administration fee may be charged if either
 - a** an engineer is called out at your request and there is no defect in the product (i.e. where you have failed to read this user manual).
 - b** you bring the unit to a repair centre and there is no defect in the product (i.e. where you have failed to read this user manual).
- The amount of such administration charge will be advised to you before any work or home visit is carried out.

Symbols

WARNING

A serious or fatal injury may result if instructions are not followed.

CAUTION

Injury or damage to property may result if instructions are not followed.

Note

Instructions marked by this symbol must be followed.

Safety

Safety precautions

CAUTION

RISK OF ELECTRIC SHOCK! DO NOT OPEN THE PRODUCT.

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. (OR BACK)

THERE ARE NO USER SERVICEABLE PARTS INSIDE.

REFER ALL SERVICING TO QUALIFIED PERSONNEL.

Electricity and safety

The following images are for reference only.

WARNING

Do not use a damaged power cord or plug, or a loose power socket.

- An electric shock or fire may result.

Do not use multiple products with a single power socket.

- Overheated power sockets may cause a fire.

Do not touch the power plug with wet hands. Otherwise, an electric shock may result.

Insert the power plug all the way in so it is not loose.

- An unsecure connection may cause a fire.

Connect the power plug to a grounded power socket (type 1 insulated devices only).

- An electric shock or injury may result.

Do not bend or pull the power cord with force. Be careful not to leave the power cord under a heavy object.

- Damage to the cord may result in a fire or electric shock.

Do not place the power cord or product near heat sources.

- A fire or electric shock may result.

Clean any dust around the pins of the power plug or the power socket with a dry cloth.

- A fire may result.

CAUTION

Do not disconnect the power cord while the product is being used.

- The product may become damaged by an electric shock.

Only use the power cord provided with your product by Samsung. Do not use the power cord with other products.

- A fire or electric shock may result.

Keep the power socket where the power cord is connected unobstructed.

- The power cord must be disconnected to cut off power to the product when an issue occurs.
- Note that the product is not completely powered down by using only the power button on the remote.

Hold the plug when disconnecting the power cord from the power socket.

- An electric shock or fire may result.

Installation

WARNING

Do not place candles, insect repellants or cigarettes on top of the product. Do not install the product near heat sources.

- A fire may result.

Have a technician install the wall-mount hanger.

- Installation by an unqualified person can result in an injury.
- Only use approved cabinets.

Do not install the product in poorly ventilated spaces such as a bookcase or closet.

- An increased internal temperature may cause a fire.

Install the product at least 10 cm away from the wall to allow ventilation.

- An increased internal temperature may cause a fire.

Keep the plastic packaging out of the reach of children.

- Children may suffocate.

Do not install the product on an unstable or vibrating surface (insecure shelf, sloped surface, etc.)

- The product may fall and become damaged and/or cause an injury.
- Using the product in an area with excess vibration may damage the product or cause a fire.

Do not install the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke.

- A fire or electric shock may result.

Do not expose the product to direct sunlight, heat, or a hot object such as a stove.

- The product lifespan may be reduced or a fire may result.

Do not install the product within the reach of young children.

- The product may fall and injure children.
- As the front is heavy, install the product on a flat and stable surface.

Edible oil, such as soybean oil, can damage or deform the product. Do not install the product in a kitchen or near a kitchen counter.

CAUTION

Do not drop the product while moving.

- Product failure or personal injury may result.

Do not set down the product on its front.

- The screen may become damaged.

When installing the product on a cabinet or shelf, make sure that the bottom edge of the front of the product is not protruding.

- The product may fall and become damaged and/or cause an injury.
- Install the product only on cabinets or shelves of the right size.

Set down the product gently.

- Product failure or personal injury may result.

Installing the product in an unusual place (a place exposed to a lot of fine dust, chemical substances, extreme temperatures or a significant presence of moisture, or a place where the product will operate continuously for an extended period of time) may seriously affect its performance.

- Be sure to consult Samsung Customer Service Centre if you want to install the product at such a place.

Operation

WARNING

There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.

- A fire or electric shock may result.
- Contact Samsung Customer Service Centre for repairs.

Before moving the product, turn off the power switch and disconnect the power cable and all other connected cables.

- Damage to the cord may result in a fire or electric shock.

If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact Samsung Customer Service Centre.

- An electric shock or fire may result.

Do not let children hang from the product or climb on top of it.

- Children may become injured or seriously harmed.

If the product is dropped or the outer case is damaged, turn off the power switch and disconnect the power cord. Then contact Samsung Customer Service Centre.

- Continued use can result in a fire or electric shock.

Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product.

- The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.

During a lightning or thunderstorm, power off the product and remove the power cable.

- A fire or electric shock may result.

Do not drop objects on the product or apply impact.

- A fire or electric shock may result.

Do not move the product by pulling the power cord or any cable.

- Product failure, an electric shock or fire may result from a damaged cable.

If a gas leakage is found, do not touch the product or power plug. Also, ventilate the area immediately.

- Sparks can cause an explosion or fire.

Do not lift or move the product by pulling the power cord or any cable.

- Product failure, an electric shock or fire may result from a damaged cable.

Do not use or keep combustible spray or an inflammable substance near the product.

- An explosion or fire may result.

Ensure the vents are not blocked by tablecloths or curtains.

- An increased internal temperature may cause a fire.

Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product.
Then contact Samsung Customer Service Centre.
- Product failure, an electric shock or fire may result.

Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product.
Then contact Samsung Customer Service Centre.
- Product failure, an electric shock or fire may result.

CAUTION

Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.

- Activate power saving mode or a moving-picture screen saver if you will not be using the product for an extended period of time.

Disconnect the power cord from the power socket if you do not plan on using the product for an extended period of time (vacation, etc).

- Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.

Use the product at the recommended resolution and frequency.

- Your eyesight may deteriorate.

Do not hold the product upside-down or move it by holding the stand.

- The product may fall and become damaged or cause an injury.

Looking at the screen too close for an extended period of time can deteriorate your eyesight.

Do not use humidifiers or stoves around the product.

- A fire or electric shock may result.

Rest your eyes for more than 5 minutes for every 1 hour of product use.

- Eye fatigue will be relieved.

Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.

Store small accessories out of the reach of children.

Exercise caution when adjusting the product angle or stand height.

- Your hand or finger may get stuck and injured.
- Tilting the product at an excessive angle may cause the product to fall and an injury may result.

Do not place heavy objects on the product.

- Product failure or personal injury may result.

When using headphones or earphones, do not turn the volume too high.

- Having the sound too loud may damage your hearing.

Be careful that children do not place the battery in their mouths when removed from the remote control. Place the battery in a location that children or infants cannot reach.

- If children have had the battery in their mouths, consult your doctor immediately.

When replacing the battery, insert it with the right polarity (+, -).

- Otherwise, the battery may become damaged or it may cause fire, personal injury or damage due to leakage of the internal liquid.

Use only the specified standardized batteries, and do not use a new battery and a used battery at the same time.

- Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.

The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling.

- The customer can return used or rechargeable batteries to a nearby public recycling centre or to a store selling the same type of the battery or rechargeable battery.

Storage

Due to the characteristics of high-glossy products, using a UV humidifier nearby may create white-coloured stains on the product.

Contact Customer Service Centre if the inside of the product needs cleaning (service fee will be charged).

Cleaning

Exercise care when cleaning as the panel and exterior of advanced mirror glass are easily scratched.

Take the following steps when cleaning.

- 1 Power off the product and computer.
- 2 Disconnect the power cord from the product.
 - Hold the power cable by the plug and do not touch the cable with wet hands. Otherwise, an electric shock may result.
- 3 Wet a soft and dry cloth in water and wring thoroughly.
 - Do not use detergents that contain alcohol, solvent or surface-active agents.
 - Do not spray water or detergent directly on the product.
- 4 Wipe the product with a clean, soft and dry cloth.
- 5 Connect the power cord to the product when cleaning is finished.
- 6 Power on the product and computer.

Cleaning the mirror glass

Usable cleaning cloth (Material)	<ul style="list-style-type: none"> • Superfine fibers (Provided accessory: CLOTH-CLEAN(BN63-01798B)) • 100% cotton 	
Cleaning solution	Water	None
Cleaning method	Clean with wet cloth first and then wipe with dry cloth	Wipe with dry cloth
Status after cleaning	All fingerprints and stains are gone	
Deformation or alteration of the glass	No	No

Precautions when handling the panel

Do not stand the product upright on the floor. The panel is fragile and can get damaged.

Lay the product down to handle it (the packaging can be used).

Ensure you use the handles on the back when moving the product.

Do not hold or grasp any area of the product within 15 mm from the front.

Device setup

Installation

What's Included

- Components may differ in different locations.
- Contact the vendor where you purchased the product if any components are missing.
- The appearance of the components may differ from the images shown.
- A stand is not provided with the product. To install a stand, you can purchase one separately.
- The RS232C adapter can be used to connect to another monitor using the D-SUB (9-pin) type RS232C cable.

Quick Setup Guide

Warranty card (Not available in some locations)

Regulatory guide

Power cord

Batteries (Not available in some locations)

Screw (M3L8, 1 piece)

Cleaning cloth

Control panel

The colour and shape of parts may differ from what is shown.

Panel key

Buttons	Description
	<p>Press and hold for one second to turn on the display.</p> <p>Selects a desired item.</p> <p>If you press the  button when the display is turned on, the control menu will be displayed.</p> <ul style="list-style-type: none"> To exit the OSD menu, press and hold the panel key for at least one second.

Buttons	Description
	<p>Move to the upper or lower menu. You can also adjust the value of an option.</p>
	<p>Move to the left or right menu.</p> <ul style="list-style-type: none"> You can adjust the volume by moving the panel key left or right when the control menu is not displayed.

Control menu

Buttons	Description
	<p>Source</p> <p>Select the connected input source.</p> <p>Move the panel key right to select Source, and then press the panel key. The list of input sources appears. Move the panel key left or right to select the desired source, and then press the panel key.</p>
	<p>Menu</p> <p>Display the OSD menu.</p> <p>Move the panel key left to select Menu, and then press the panel key. The OSD menu appears.</p> <p>To select a menu, move the panel key up or down, and then press or move the panel key to the right.</p> <p>To adjust settings, select the desired menu, and then press the panel key. Adjust the settings by moving the panel key left or right.</p>
	<p>Home</p> <p>Enter Go to Home mode.</p> <p>Move the panel key up to select Home, and then press the panel key.</p>

Buttons	Description
 Power off	Turn off the display. Move the panel key down to select Power off , and then press the panel key.
 Return	To return to a previous menu or exit the control menu, press the panel key.

Remote sensor and spacer logo (optional)

Remote sensor

Press a button on the remote control pointing at the sensor on the front of the product to perform the corresponding function.

- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.

Use the remote control within 7 m to 10 m from the sensor on the product at an angle of 30° from the left and right.

WARNING

Store used batteries out of reach of children and recycle.

- Do not use a new and used battery together. Replace both batteries at the same time.
- Remove batteries when the remote control is not to be used for an extended period of time.

Spacer logo (optional)

Do not pull on the spacer logo using force. The logo may tear or break off.

Reverse side

- The colour and shape of parts may differ from what is shown.

Port	Description
RS232C OUT	Connects to MDC using an RS232C adapter.
RS232C IN	
IR OUT	Outputs the remote control signal.
IR IN	Receives the remote control signal.

Port	Description
USB	Connect to a USB memory device.
USB PROXIMITY SENSOR	Connects to a USB device or proximity sensor. PROXIMITY SENSOR: This must be connected to the cable if the Proximity Sensor is in use.
DVI / MAGICINFO IN	DVI IN: Connects to a source device using a DVI cable or HDMI-DVI cable. MAGICINFO IN: Use the (dedicated) DP-DVI cable when connecting a network box (sold separately).
DP IN	Connects to a source device using a DP cable.
HDMI IN	Connects to a source device using an HDMI cable.
DP OUT	Connects to another product using a DP cable.
DVI / HDMI AUDIO IN	Receives sound from a source device via an audio cable.
AUDIO OUT	Connects to the audio of a source device.
RJ45	Connects to MDC using a LAN cable.

Proximity sensor

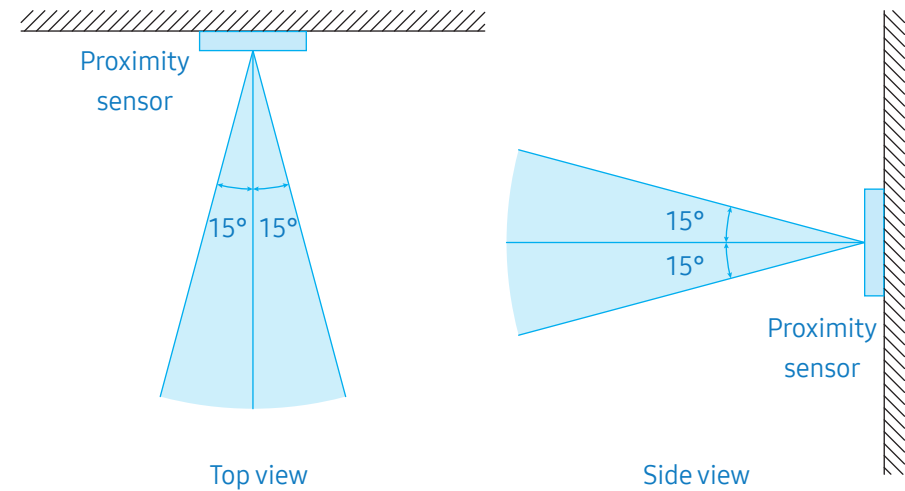

With the Proximity sensor you can choose to have the screen display content when the sensor detects object.

The colour and shape of parts may differ from what is shown.

Detection range

Refer to the image and install accordingly.

Maximum detection distance: 1.5 m (However, this distance may vary depending on the environment, object and existence of any obstacles within the detection range.)

The sensor cannot detect objects outside of the detection range.

After installing the proximity sensor, go to **MENU** → **System** → **Proximity sensor**, and then set desired settings.

External sensor kit (sold separately)

The external sensor kit is integrated with the remote control sensor and power indicator. If mounting the display onto a wall, you can move the External sensor kit to the side of the display.

The colour and shape of parts may differ from what is shown.

No.	Parts	Description
1	Remote Control Sensor	Aim the remote control towards this spot. <ul style="list-style-type: none"> Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
2	Power indicator	The power indicator will turn off when the product is turned on. It will blink in power saving mode.

Use the remote control within 7 m to 10 m from the sensor on the product at an angle of 30° from the left and right.

- Store used batteries out of reach of children and recycle.
- Do not use a new and used battery together. Replace both batteries at the same time.

- Remove batteries when the remote control is not to be used for an extended period of time.
- If you disconnect the power cord from the product while it is in standby mode, the product remains in standby mode until it runs out of power. The power indicator turns on or blinks during this time. If you reconnect the power cord, the input source activates and the product resumes normal operation.

Anti-theft lock

An anti-theft lock allows you to use the product securely even in public places.

The locking device shape and locking method depend on the manufacturer. Refer to the user manual provided with your anti-theft locking device for details.

The following images are for reference only. Real-life situations may differ from what is shown in the images.

To lock an anti-theft locking device:

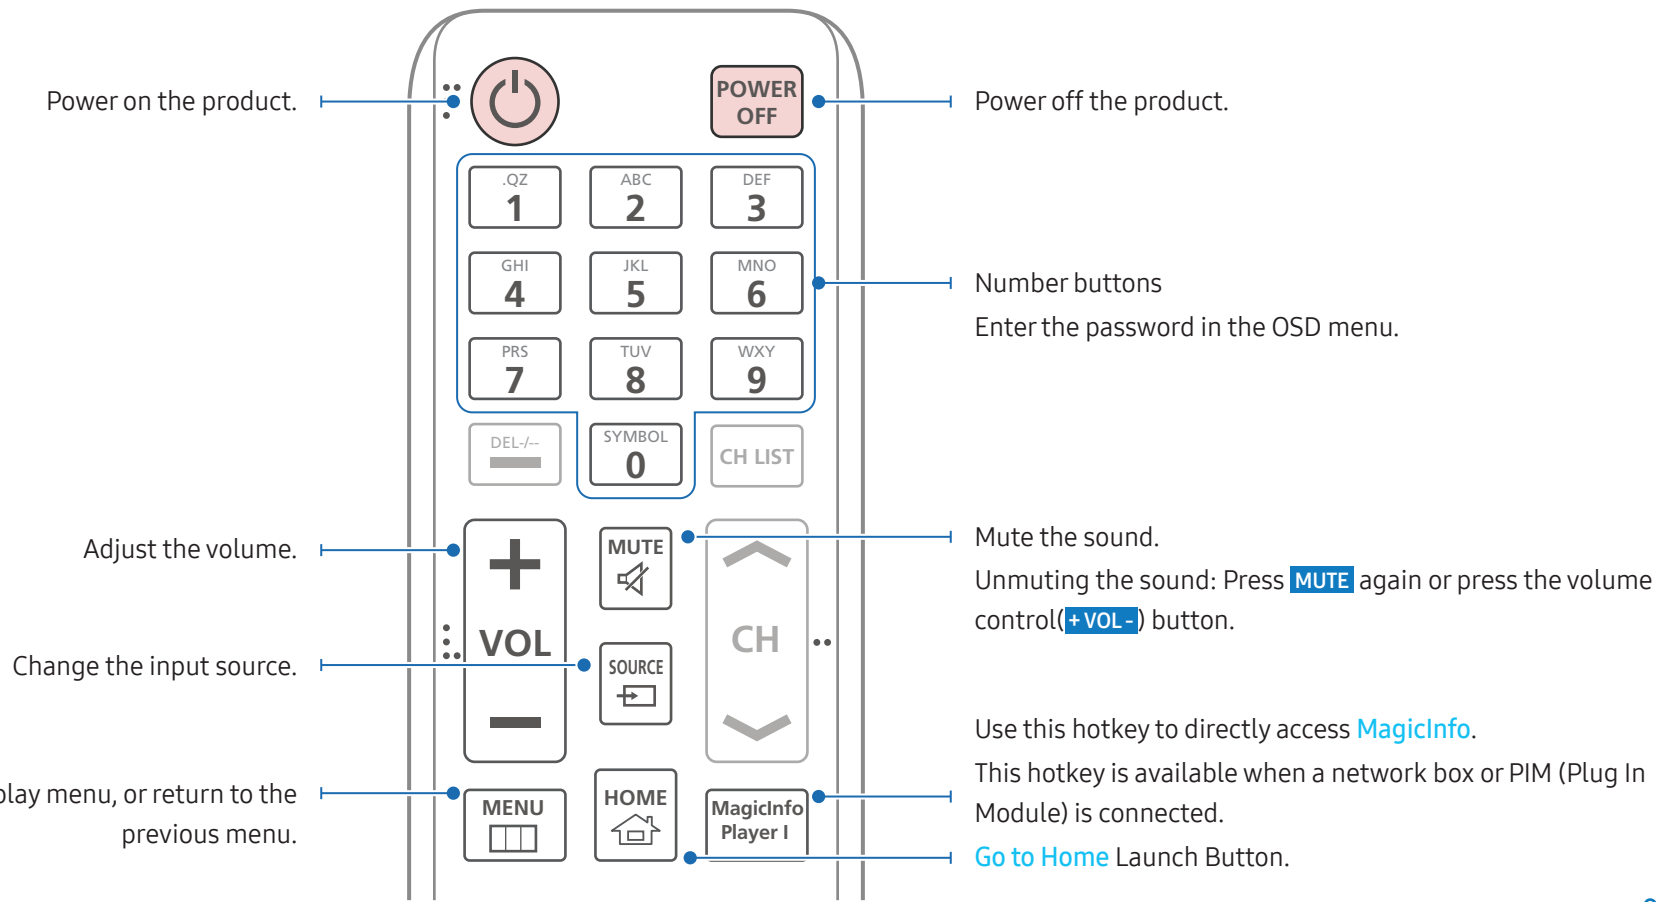

- 1 Fix the cable of your anti-theft locking device to a heavy object such as a desk.
- 2 Put one end of the cable through the loop on the other end.
- 3 Insert the locking device into the anti-theft lock slot at the back of the product.
- 4 Lock the locking device.

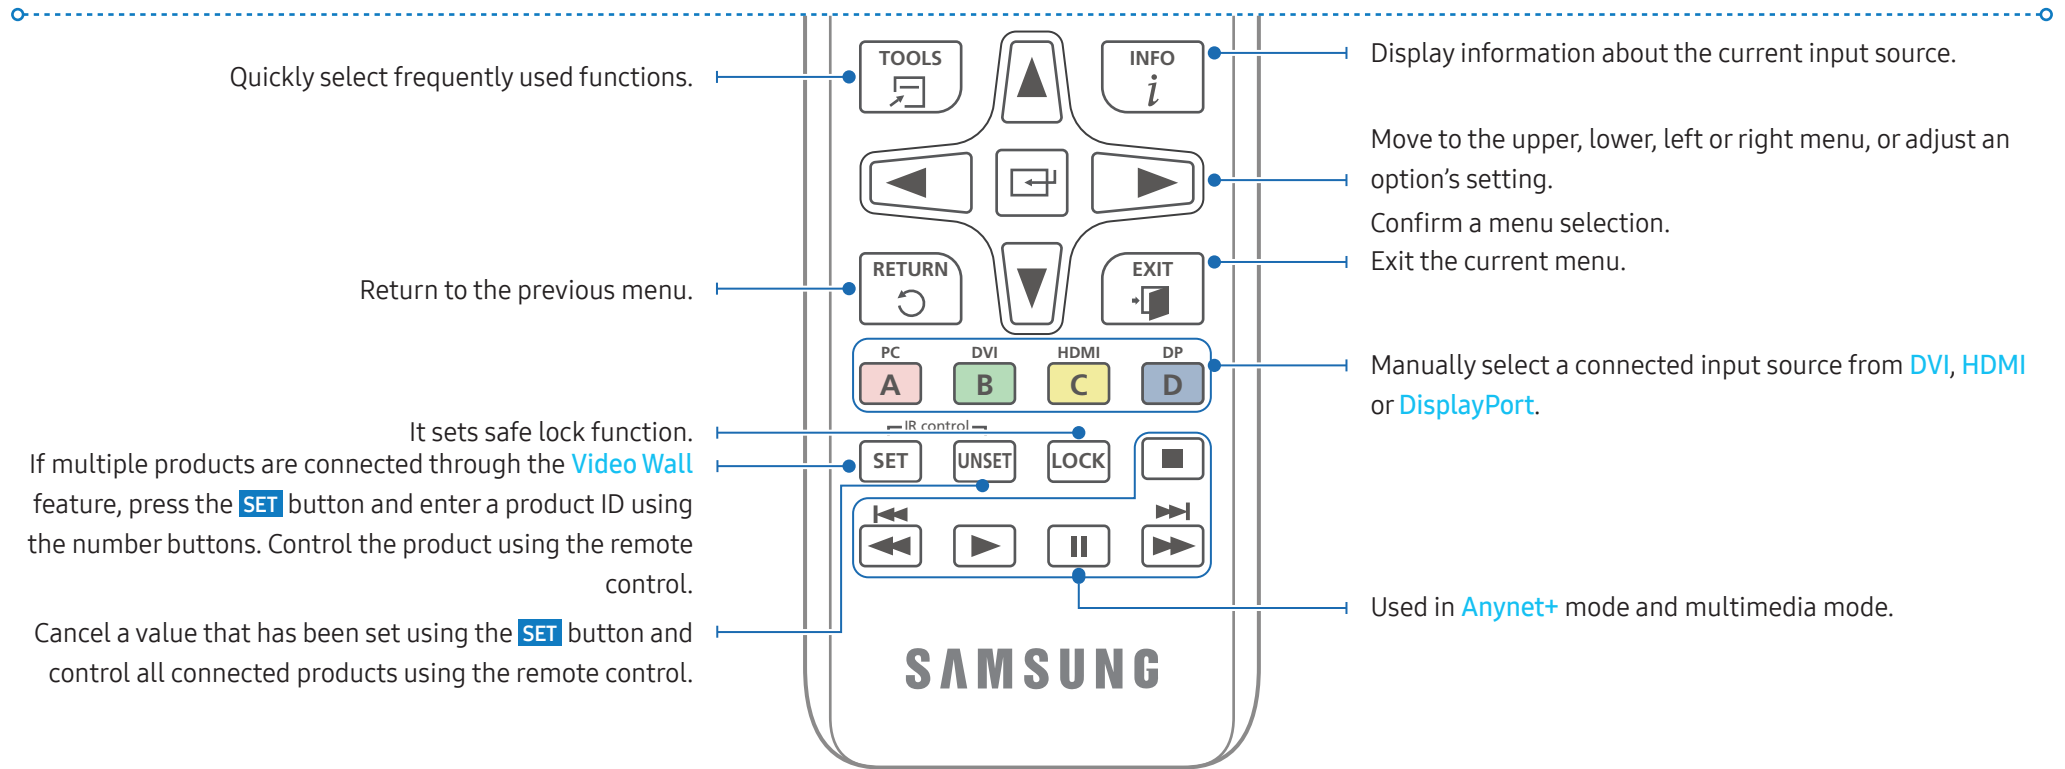

- An anti-theft locking device can be purchased separately.
Anti-theft locking devices can be purchased at electronics retailers or online.
- Refer to the user manual provided with your anti-theft locking device for details.

Remote control

- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
- A button without a description in the image below is not supported on the product.

Remote control button functions may differ for different products.

To place batteries in the remote control

Connection using an IR Stereo cable (sold separately)

- The appearance may differ depending on the product.

Make sure to connect the external sensor kit while the product is powered off. Then, power on the product.

Controlling more than one display product using your remote control

- Connect the **IR OUT** port on the product to the **IR IN** port on the other display product using the dedicated stereo cable.
- A command sent from the remote control pointed at product **1** will be received by both display products **1** and **2**.

Controlling more than one display product using an external sensor kit

- A command sent from the remote control pointed at product **1** (to which the external sensor kit is connected) will be received by both display products **1** and **2**.

Guided installation

WARNING

To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.

- Ensure that an authorized installation company installs the wall mount. Otherwise, it may fall and cause personal injury.
- Make sure to install the specified wall mount.
- Contact Samsung Customer Service Centre for further details.

Ventilation

Installation on a perpendicular wall

Side view

- A** Minimum 40 mm
- B** Ambient temperature: Under 35 °C

When installing the product on a perpendicular wall, allow at least 40 mm of space between the product and wall surface for ventilation and ensure that the ambient temperature is kept below 35 °C.

Installation on an indented wall

Contact Samsung Customer Service Centre for further details.

- A** Minimum 40 mm
- B** Minimum 70 mm
- C** Minimum 50 mm
- D** Minimum 50 mm
- E** Ambient temperature: Under 35 °C

When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35 °C.

Dimensions

Unit: mm

Model name	1	2	3	4	5
ML32E	740.2	698.4	392.85	434.6	57.4
ML55E/ML55E-R	1249.2	1209.6	680.4	720.0	57.4

All drawings are not necessarily to scale. Some dimensions are subject to change without prior notice.

Refer to the dimensions prior to performing installation of your product. Not responsible for typographical or printed errors.

Wall mount installation

Preparing before installing wall mount

To install a wall mount from another manufacturer, use the **Holder-Ring (1)**.

Installing the wall mount

- The wall mount kit (sold separately) allows you to mount the product on the wall.
- For detailed information on installing the wall mount, see the instructions provided with the wall mount.
- We recommend you contact a technician for assistance when installing the wall mount bracket.

WARNING

- Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you elect to install the wall mount on your own.

Wall mount kit specifications (VESA)

Install your wall mount on a solid wall perpendicular to the floor. Before attaching the wall mount to surfaces other than plaster board, please contact your nearest dealer for additional information.

WARNING

If you install the product on a slanted wall, it may fall and result in severe personal injury.

- Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.
- For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.
- Standard dimensions for wall mount kits are shown in the table below.

Unit: mm

Model name	VESA screw hole specs (A * B) in millimeters	Standard screw	Quantity
ML32E	200.0 mm * 200.0 mm	M8	4
ML55E/ML55E-R	400.0 mm * 400.0 mm		

WARNING

- Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.
- Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.

CAUTION

- Always have two people mount the product on a wall.
- Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.
- Do not install your Wall Mount Kit while your product is turned on. It may result in personal injury due to electric shock.

External connection

Checkpoints

- Before connecting a source device, read the user manual provided with it. The number and locations of ports on source devices may differ from device to device.
- Connect the sound ports correctly: left = white and right = red.
- Check the types of ports at the back of the product you want to connect.

The appearance may differ depending on the product.

WARNING

Do not connect the power cable until all connections are completed.
Connecting the power cable during connection may damage the product.

Cable Connection

RS232C Cable

Interface	RS232C (9 pins)
Pin	TxD (No.2), RxD (No.3), GND (No.5)
Bit rate	9600 bps
Data bits	8 bit
Parity	None
Stop bit	1 bit
Flow control	None
Maximum length	15 m (only shielded type)

Pin assignment

Pin	Signal
1	Detect data carrier
2	Received data
3	Transmitted data
4	Prepare data terminal
5	Signal ground
6	Prepare data set
7	Send request
8	Clear to send
9	Ring indicator

RS232C cable

- Connector: 9-Pin D-Sub to Stereo Cable

-P1-		-P1-		-P2-		-P2-
Female	Rx	2	→	3	Tx	STEREO
	Tx	3	←	2	Rx	PLUG
	Gnd	5	—	5	Gnd	(3.5ø)

LAN Cable

Pin assignment

Pin No	Standard Colour	Signal
1	White and orange	TX+
2	Orange	TX-
3	White and green	RX+
4	Blue	NC
5	White and blue	NC
6	Green	RX-
7	White and brown	NC
8	Brown	NC

Direct LAN cable (PC to HUB)

- Connector : RJ45

Signal	P1		P2	Signal

Connection 3

Control Codes

Viewing control state (Get control command)

Header	Command	ID	Data length	Checksum
0xAA	Command type		0	

Controlling (Set control command)

Header	Command	ID	Data length	Data	Checksum
0xAA	Command type		1	Value	

Command

No.	Command type	Command	Value range
1	Power control	0x11	0~1
2	Volume control	0x12	0~100
3	Input source control	0x14	-
4	Screen mode control	0x18	-
5	Screen size control	0x19	0~255
6	PIP on/off control	0x3C	0~1
7	Auto adjustment control (PC and BNC only)	0x3D	0
8	Video wall mode control	0x5C	0~1
9	Safety Lock	0x5D	0~1
10	Video Wall On	0x84	0~1
11	Video Wall User Control	0x89	-

- All communications take place in hexadecimals. The checksum is calculated by adding up all values except the header. If a checksum adds up to be more than 2 digits as shown below (11+FF+01+01=112), the first digit is removed.

E.g. Power On & ID=0

Header	Command	ID	Data length	Data 1	Checksum
0xAA	0x11		1	"Power"	

Header	Command	ID	Data length	Data 1	Checksum
0xAA	0x11		1	1	12

- To control all devices connected by a serial cable simultaneously irrespective of IDs, set the ID as "0xFE" and transmit commands. Commands will be executed by each device but ACK will not respond.

Power control

Function

- A product can be powered on and off using a PC.

Viewing power state (Get Power ON / OFF Status)

Header	Command	ID	Data length	Checksum
0xAA	0x11		0	

Setting power ON/Off (Set Power ON / OFF)

Header	Command	ID	Data length	Data	Checksum
0xAA	0x11		1	"Power"	

"Power": Power code to be set on a product.

- 1: Power ON
- 0: Power OFF

Ack

Header	Command	ID	Data length	Ack/ Nak	r-CMD	Val1	Checksum
0xAA	0xFF		3	'A'	0x11	"Power"	

"Power": Power code to be set on a product.

Nak

Header	Command	ID	Data length	Ack/ Nak	r-CMD	Val1	Checksum
0xAA	0xFF		3	'N'	0x11	"ERR"	

"ERR" : A code showing what error has occurred.

Volume control**Function**

- The volume of a product can be adjusted using a PC.

Viewing volume state (Get Volume Status)

Header	Command	ID	Data length	Checksum
0xAA	0x12		0	

Setting the volume (Set Volume)

Header	Command	ID	Data length	Data	Checksum
0xAA	0x12		1	"Volume"	

"Volume": Volume value code to be set on a product. (0-100)

Ack

Header	Command	ID	Data length	Ack/ Nak	r-CMD	Val1	Checksum
0xAA	0xFF		3	'A'	0x12	"Volume"	

"Volume": Volume value code to be set on a product. (0-100)

Nak

Header	Command	ID	Data length	Ack/ Nak	r-CMD	Val1	Checksum
0xAA	0xFF		3	'N'	0x12	"ERR"	

"ERR" : A code showing what error has occurred.

Input source control**Function**

- The input source of a product can be changed using a PC.

Viewing input source state (Get Input Source Status)

Header	Command	ID	Data length	Checksum
0xAA	0x14		0	

Setting the input source (Set Input Source)

Header	Command	ID	Data length	Data	Checksum
0xAA	0x14		1	"Input Source"	

"Input Source": An input source code to be set on a product.

0x14	PC
0x18	DVI
0x0C	Input source
0x08	Component
0x20	MagicInfo
0x1F	DVI_video
0x30	RF(TV)
0x40	DTV
0x21	HDMI1
0x22	HDMI1_PC
0x23	HDMI2
0x24	HDMI2_PC
0x25	DisplayPort

DVI_video, HDMI1_PC and HDMI2_PC cannot be used with the Set command. They only respond to "Get" commands.

- This model does not support HDMI1, HDMI1_PC, HDMI2 and HDMI2_PC ports.
- [MagicInfo](#) is only available with models that contain the [MagicInfo](#) function.
- RF(TV), DTV are only available with models that include a TV.

Ack

Header	Command	ID	Data length	Ack/ Nak	r-CMD	Val1	Checksum
0xAA	0xFF		3	'A'	0x14	"Input Source"	

"Input Source": An input source code to be set on a product.

Nak

PC connection

- Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
- A PC can be connected to the product in a variety of ways. Select a connection method suitable for your PC.
- Connecting parts may differ in different products.

Connection using a DVI cable (Digital type)

The appearance may differ depending on the product.

You can use the DVI port on the product as an HDMI port by using a DVI-HDMI adapter.

Connection using an HDMI-DVI cable

The appearance may differ depending on the product.

After connecting a computer to the product with an HDMI-DVI cable, make sure to configure the settings as shown below to enable the video and audio from the computer.

- **Sound** → set **HDMI Sound** to **PC(DVI)**
- **Picture** → set each screen mode to **Text** under **Picture Mode**
- **System** → **General** → set **HDMI Hot Plug** to **Off**

Connection using an HDMI cable

The appearance may differ depending on the product.

Connection using an DP cable

The appearance may differ depending on the product.

Precautions for using DP

- To increase the standby power capacity, the product stops DP communication when it is turned off or in power saving mode.
If the product in dual monitor mode is turned off or goes into power saving mode, monitor setting changes may not be updated. As a result, screen output may not be displayed properly.
In the occurrence of this issue, set **Max. Power Saving** to **Off** before using the product.
- Some graphics cards that are not compliant with the DP standard may prevent the Windows Booting/Bios screen from being displayed when the product is in power saving mode. If this is the case, make sure to turn on the product first before turning on your PC.
- The DisplayPort interface (**DP IN**) on the product and the provided DP cable are designed based on the VESA standards. Using a DP cable that is not VESA compliant may cause the product to function improperly. Samsung Electronics shall not be held responsible for any issues from using a cable that is not VESA compliant. Make sure to use a DP cable that is VESA compliant.

AV connection

- Do not connect the power cable before connecting all other cables.
Ensure you connect a source device first before connecting the power cable.
- You can connect a video device to the product using a cable.
 - Connecting parts may differ in different products.
 - Press the **SOURCE** button on the remote control to change the source.

Connection using an HDMI-DVI cable

The appearance may differ depending on the product.

- Audio will not be enabled if the product is connected to a video device using an HDMI-DVI cable. To resolve this, additionally connect an audio cable to the audio ports on the product and video device.
- After connecting a video device to the product with an HDMI-DVI cable, make sure to configure the settings as shown below to enable the video and audio from the video device.
 - **Sound** → set **HDMI Sound** to **AV(HDMI)**
 - **Picture** → set each screen mode to **Videos/Images** under **Picture Mode**
 - **System** → **General** → set **HDMI Hot Plug** to **On**

- Supported resolutions include 1080p (50/60Hz), 720p (50/60Hz), 480p, and 576p.

Connection using an HDMI cable (up to 1080p)

The appearance may differ depending on the product.

- For better picture and audio quality, connect to a digital device using an HDMI cable.
- An HDMI cable supports digital video and audio signals, and does not require an audio cable.
 - To connect the product to a digital device that does not support HDMI output, use an HDMI-DVI and audio cables.
- The picture may not display normally (if at all) or the audio may not work if an external device that uses an older version of HDMI mode is connected to the product. If such a problem occurs, ask the manufacturer of the external device about the HDMI version and, if out of date, request an upgrade.
- Be sure to use an HDMI cable with a thickness of 14 mm or less.
- Be sure to purchase a certified HDMI cable. Otherwise, the picture may not display or a connection error may occur.
- A basic high-speed HDMI cable or one with ethernet is recommended. This product does not support the ethernet function via HDMI.

Audio system connection

- The appearance may differ depending on the product.
- Connecting parts may differ in different products.

LAN connection

- The appearance may differ depending on the product.
- Connecting parts may differ in different products.

Use Cat7(*STP Type) cable for the connection.

- *Shielded Twist Pair.

Source selection

Source

SOURCE → Source

Source allows you to select a variety of sources and change source device names.

You can display the screen of a source device connected to the product. Select a source from source list to display the screen of the selected source.

- The input source can also be changed by using the **SOURCE** button on the remote control.
- The screen may not display correctly if an incorrect source is selected for the source device you want to convert to.
- To view detailed information about connected source devices, press the **TOOLS** button from the **Source** page.

- The **MagicWB S** software allows you to play a variety of content on a large touchscreen monitor. Use the software to bring life to your meetings and conferences.

Refer to the touch overlay user manual for details.

The **MagicWB S** user manual can be downloaded from <http://www.samsung.com/displaysolutions>.

Edit Name

SOURCE → Source → **TOOLS** → Edit Name →

Customize the name of a connected external device.

- The list can include the following source devices. Source devices on the list differ depending on the selected source.

PC / **Cable STB** / **Satellite STB** / **PVR STB** / **Game** / **Blu-ray** / **DVD** / **VCR** / **AV Receiver** / **Camcorder** / **DVI PC** / **DVI Devices** / **TV** / **IPTV** / **HD DVD** / **DMA**

Information

SOURCE → Source → **TOOLS** → Information →

You can see detailed information about the selected external device.

PC software (Multiple Display Control)

Multiple display control “MDC” is an application that allows you to easily control multiple display devices simultaneously using a PC.

For details on how to use the MDC programme, refer to Help after installing the programme. The MDC programme is available on the website.

Installation/uninstallation

Installation

- MDC installation can be affected by the graphics card, mother board and network conditions.
- 1 Click the **MDC Unified** installation programme.
 - 2 Select a language for installation. Next, click **“OK”**.
 - 3 When the **“Welcome to the InstallShield Wizard for MDC_Unified”** screen appears, click **“Next”**.
 - 4 In the **“License Agreement”** window displayed, select **“I accept the terms in the license agreement”** and click **“Next”**.
 - 5 In the displayed **“Customer Information”** window, fill out all the information fields and click **“Next”**.
 - 6 In the displayed **“Destination Folder”** window, select the directory path you want to install the programme in and click **“Next”**.
 - If the directory path is not specified, the programme will be installed in the default directory path.
 - 7 In the displayed **“Ready to Install the Program”** window, check the directory path to install the programme in and click **“Install”**.
 - 8 Installation progress will be displayed.
 - 9 Click **“Finish”** in the displayed **“InstallShield Wizard Complete”** window.

- Select **“Launch MDC Unified”** and click **“Finish”** to run the MDC programme immediately.

- 10** The MDC Unified shortcut icon will be created on the desktop after installation.
- The MDC execution icon may not be displayed depending on the PC system or product specifications.
 - Press F5 if the execution icon is not displayed.

Uninstallation

Select **Settings > Control Panel** on the **Start** menu and double-click **Add/Delete Program**.

Select **MDC Unified** from the list and click **Change/Remove**.

Connection

Using the RS-232C cable

The appearance may differ depending on the product.

An RS-232C serial cable must be connected to the serial ports on the PC and monitor.

Using the ethernet cable

Enter the IP for the primary display device and connect the device to the PC. Display devices can be connected to each other using a LAN cable.

Connection using a direct LAN cable

The appearance may differ depending on the product.

Multiple products can be connected using the RJ45 port on the product and the LAN ports on the HUB.

Connection using a cross LAN cable

The appearance may differ depending on the product.

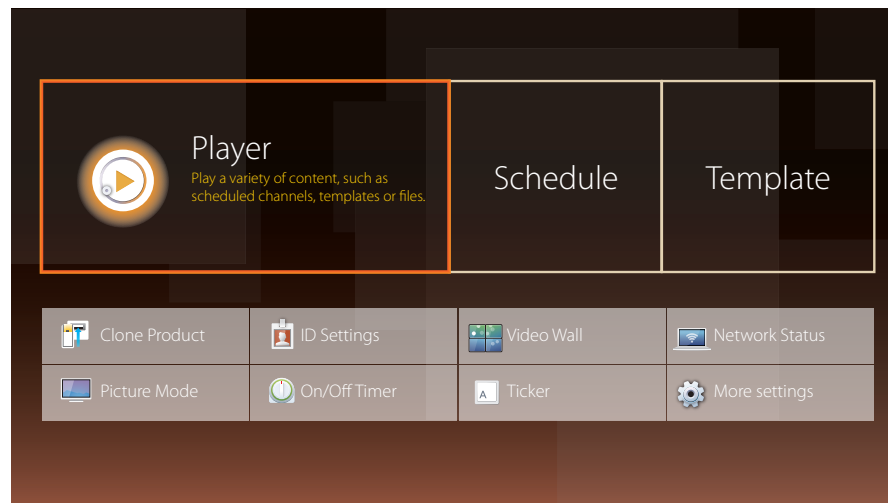

Multiple products can be connected using the RS232C IN / OUT port on the product.

Home screen

Player

HOME → Player → 

- To use the **Player** feature, set **Play via** to **MagicInfo** in **System**.
- The displayed image may differ depending on the model.

Play a range of content such as channels with schedules assigned, templates or files.

Play channels or content using any of the following methods.

- **Network Channel**: Play content using the server.
 - To run **Network Channel**, make sure the product is connected to the server.
- **Local Channel**: Play content in internal memory or from external memory.

Approving a connected device from the server

Approving the Lite server

Set **MagicInfo Mode** to **Lite** in **Server Network Settings**.

Approve and use the **Lite** server now.

First configure **Server Network Settings** before device approval.

- 1 Access the server you have assigned to your device.
- 2 Enter your ID and password to log in.

- 3 Select **Device** from the top menu bar.
- 4 Select **Lite** from the menus on the left.

- 5 Select **Unapproved** from the sub-menus of **Lite**.
- 6 Select the **Approve** button for your device from the list of unapproved Lite devices.

- 7 Enter the information required to approve the device.
 - **Device Name**: Enter the device name.
 - **Device Group**: Select to specify the group.
 - **Location**: Enter the current location of the device.
 - Pressing the **INFO** button on the remote when a network schedule is running will display the details of the schedule. Check that the correct device has been selected by viewing the device ID in the details.

- 8 Select the **All** menu to check that the device has been registered.
- 9 When the device is approved by the server, the schedule registered in the selected group will be downloaded to the device. The schedule will run after it is downloaded.
 - For further details on how to configure a schedule, refer to the “MagicInfo Server user’s manual”.
 - If a device is deleted from the list of devices approved by the server, the device will reboot to reset its settings.

Setting the current time

A schedule may not run if the time set on the device is different from the server's current time.

- 1 Go to the tabs **Device** → **Time**.
- 2 Select your device.
- 3 Select **Clock Set**, and sync the time with the server.
 - When connecting to the server for the first time, the time on the product is set using the GMT time of the region where the server is installed.
 - The time on the product can be changed from the server.
 - Turning the product off and then on again will restore the time setting on the product to the last time that was set from the server.

- For further details on how to manage the time (scheduling, holiday management, etc.), refer to the “MagicInfo Server user’s manual”.

Approving the Premium server

Set **MagicInfo Mode** to **Premium** in **Server Network Settings**.

Approve and use the **Premium** server now.

First configure **Server Network Settings** before device approval.

- 1 Access the server you have assigned to your device.
- 2 Enter your ID and password to log in.

- 3 Select **Device** from the top menu bar.
- 4 Select **Premium** from the menus on the left.

- 5 Select **Unapproved** from the sub-menus of **Premium**.
- 6 Select the **Approve** button for your device from the list of unapproved Premium devices.

- 7 Enter the information required to approve the device.
 - **Device Name**: Enter the device name.
 - **Device Group**: Select to specify the group.
 - **Location**: Enter the current location of the device.
- Pressing the **INFO** button on the remote when a network schedule is running will display the details of the schedule. Check that the correct device has been selected by viewing the device ID in the details.

- 8 Select the **All** menu to check that the device has been registered.
- 9 When the device is approved by the server, the schedule registered in the selected group will be downloaded to the device. The schedule will run after it is downloaded.

- For further details on how to configure a schedule, refer to the “MagicianInfo Server user’s manual”.
- If a device is deleted from the list of devices approved by the server, the device will reboot to reset its settings.

Setting the current time

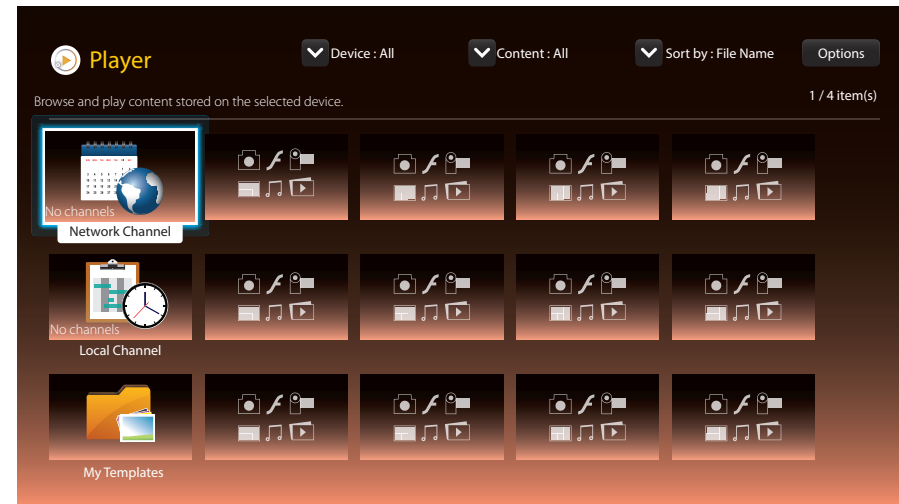

A schedule may not run if the time set on the device is different from the server's current time.

- 1 Go to the tabs **Device** → **Time**.
- 2 Select your device.
- 3 Select **Clock Set**, and sync the time with the server.
 - When connecting to the server for the first time, the time on the product is set using the GMT time of the region where the server is installed.
 - The time on the product can be changed from the server as shown in step 3.
 - Turning the product off and then on again will restore the time setting on the product to the last time that was set from the server.

- For further details on how to manage the time (scheduling, holiday management, etc.), refer to the “MagicInfo Server user’s manual”.

Network Channel

Play content, templates and schedules configured on the server.

- You can view whether the server is connected (approval) in the **Player** menu screen. To view whether the server is connected when a **Network Channel** is running, press **INFO** on the remote.
- 1 Select **Network Channel** from the **Player** menu.
 - The **No channels** message appears if no channel has been registered in **Network Channel**.
 - 2 **Network Channel** will run.

Local Channel

Play a schedule or channel that was configured in the product.

- 1 Select **Local Channel** from the **Player** menu.
 - The **No channels** message appears if no channel has been registered in **Local Channel**.
- 2 **Local Channel** will run.

My Templates

Play a template in [My Templates](#) stored in the internal memory of the product.

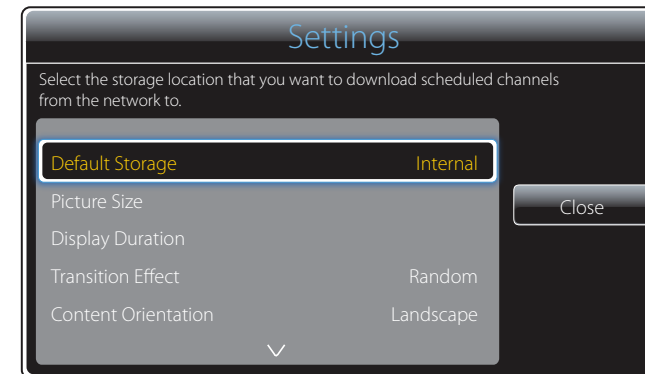

Available features in the Player page

The [Player](#) list page provides the following features.

- **Device**
Select either Internal or [USB](#) to search for a desired device list.
 - [All](#) / [Internal](#) / [USB](#)
- **Content**
Select a content type as criterion to search for a desired content list.
 - [All](#) / [Video](#) / [Image](#) / [PDF](#) / [Flash](#) / [Office](#) / [My Templates](#)
- **Sort by**
Specify the content sort criterion.
 - [File Name](#) / [Recently Played](#)
- **Options**

Option name	Operations
Play Selected	Select and play desired content.
Send	Copy content to another storage device.
Delete	Delete desired content.
Settings	Configure detailed properties of content. <ul style="list-style-type: none"> • See the following page for details on the Settings feature.

Setting the Player page

The displayed image may differ depending on the model.

Default Storage

Select the storage location that you want to download scheduled channels from the network to.

- [Internal](#) / [USB](#)

Picture Size

Set the screen size for content.

If [Picture Size](#) is set to [Video](#) or [Image](#):

- [Full Screen](#) / [Original Size](#) / [Screen Fit](#)

If [Picture Size](#) is set to [PDF](#) or [Office](#):

- [Full Screen](#) / [Original Size](#)

This feature is only available for [Video](#), [Image](#), [PDF](#) and [Office](#) files.

Display Duration

Set the duration for each page in a slideshow.

This feature is only available for [Image](#), [PDF](#), [Flash](#) and [Office](#) files.

Transition Effect

Configure transition effects between pages or scenes in a slideshow or video file.

- [None](#) / [Fade1](#) / [Fade2](#) / [Blind](#) / [Spiral](#) / [Checker](#) / [Linear](#) / [Stairs](#) / [Wipe](#) / [Random](#)

This feature is only available for Image files.

Content Orientation

Switch the orientation of playing content to [Landscape](#) or [Portrait](#) mode.

- [Landscape](#) / [Portrait](#)
 - If [Content Orientation](#) is [Portrait](#) view, it does not support VP8 video codec.
 - [Source](#) is not available when [Content Orientation](#) is set to [Portrait](#).

Default content

This default content will be displayed if you run a channel while no Programmes are scheduled on the channel.

- [None](#) / [My Templates](#)

Safely Remove

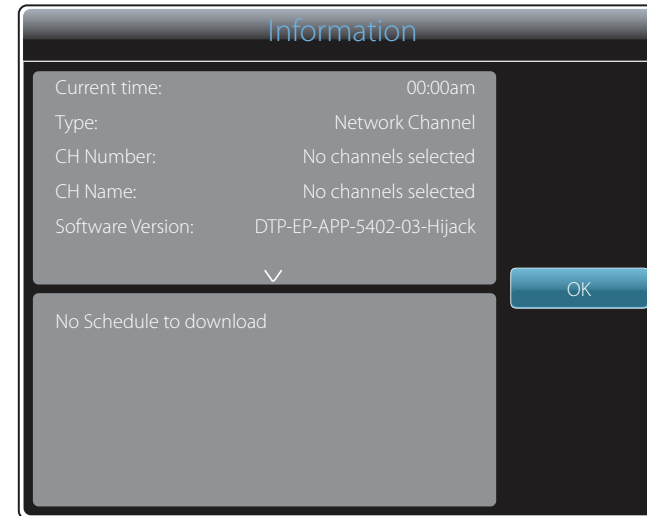

Safely removes USB memory.

Reset

Restore all the values under Settings to the default when the product was purchased.

When content is running

Viewing the details of the content that is running

The displayed image may differ depending on the model.

Press the **INFO** button on the remote control.

- [Current Time](#)
- [Type](#): Type of channel currently playing
 - Only applicable during [Network Channel](#) / [Local Channel](#) playback.
- [CH Number](#): Number assigned to the channel currently playing
 - Only applicable during [Network Channel](#) / [Local Channel](#) playback.
- [CH Name](#): Name of the channel currently playing
 - Only applicable during [Network Channel](#) / [Local Channel](#) playback.
- [Software Version](#): Displays the software version of a device
- [MAC ID](#): Displays the original identification number of a device
- [Tags](#): Tag settings assigned to a device from the server
 - Only applicable during [Network Channel](#) / [Local Channel](#) playback.

- **Server:** Displays the connection status (**Connected**, **Not connected** or **Not approved**) of the server
- **USB:** Displays the connection status of a USB device

Changing the settings for the content that is running

- The displayed image may differ depending on the model.
- This feature is not available when content is playing through **Video Wall**.

Press the **TOOLS** button on the remote control during content playback to configure settings such as **Picture Mode** and **Sound Mode**.

- **Playlist**
View a list of content items currently playing.
- **Music**
Set the background music for the content currently playing.
- **Picture Mode**
Customizes the screen settings for the content currently playing
 - **Shops & Mall** / **Offices & School** / **Terminals & Station** / **Video Wall** / **Calibration**
- **Sound Mode**
Customizes the audio settings for the content currently playing
 - **Standard** / **Music** / **Movie** / **ClearVoice** / **Amplify**

File formats compatible with Player

- Supported file systems include FAT32 and NTFS.
- A file with a vertical and horizontal resolution larger than the maximum resolution cannot be played.
- Check the vertical and horizontal resolution of the file.
- Check the supported video and audio Codec types and Versions.

- Check the supported file versions.
 - Flash player 11.0 and older and Flash Air 3.0 and older versions are supported.
 - PowerPoint version up to 97 – 2007 is supported
- Only the last USB device that was connected is recognized.

Network Schedule Multiframe

Playback restrictions

- A maximum of two video files (**Video**) can be played simultaneously.
- In portrait playback mode, only one video file can be played at a time.
- More than one **Flash** file cannot be played.
- For **Office** files (PPT and Word files) and **PDF** files, only one file type is supported at a time.
- LFD(.lfd) files are not supported.

Sound output restrictions

- More than one sound output cannot be used.
- Playback priority: **Flash** file > network BGM > local BGM > video file in the main frame selected by the user
 - Network BGM: Settings can be configured in step 1 when creating a server schedule.
 - Local BGM: BGM settings can be configured using the tools displayed after the **TOOLS** button is pressed during **Player** playback.
 - User-selected main frame: Main frame settings can be configured in step 2 when creating a server schedule.

Template files and LFD(.lfd) files

Restrictions

- Ensure a distributed folder (content / schedules) exists in **Internal** / **USB** memory.

Playback restrictions

- A maximum of two video (**Video**) files can be played.
- More than one **Flash** file cannot be played.
- For **Office** files (PPT and Word files) and **PDF** files, only one file type is supported at a time.
- Multiple videos (Video) cannot be played on a single display of a video wall simultaneously.

Sound output restrictions

- More than one sound output cannot be used.
- Playback priority: **Flash** file > network BGM > local BGM > video file in the main frame selected by the user

Contents

File extension	Container	Video Codec	Resolution	Frame rate (fps)	Bit rate (Mbps)	Audio Codec

*.mts		VP6	640 x 480			
*.divx					4	

Video

- 3D video is not supported.
- Content with a resolution larger than the resolution specified in the table above is not supported.
- Video content with a Bit rate or Frame rate larger than the rate specified in the table above can cause choppy video during playback.
- Video content will not play, or not play correctly, if there is an error in the content or the container.
- Some USB/digital camera devices may not be compatible with the player.
- Supports up to H.264, Level 4.1
- H.264 FMO / ASO / RS, VC1 SP / MP / AP L4 and AVCHD are not supported.
- For all Video codecs except MVC, VP8, VP6:
 - Below 1280 x 720: 60 frame max
 - Above 1280 x 720: 30 frame max
- GMC 2 or higher is not supported.
- Supports only BD MVC Spec.
- Only one video file can play at a time if video files on the monitor use incompatible codecs or the resolution is 1080 x 1920.
- When a single video file is playing, Seamless mode is not supported under the following conditions:
 - Incompatible codec (MVC, VP3, MJPEG) ↔ Incompatible codec
 - Incompatible codec ↔ Compatible codec
 - The resolution is different from that of the monitor
 - The frequency is different from that of the monitor

Audio

- Audio content with a Bit rate or Frame rate larger than the rate specified in the table above can cause choppy audio during playback.
- Audio content will not play, or not play correctly, if there is an error in the content or the container.
- Some USB/digital camera devices may not be compatible with the player.
- Supports up to WMA 10 Pro 5.1 channel. WMA lossless audio is not supported.

- QCELP, AMR NB/WB are not supported.

Image

- Compatible image file format : JPEG, PNG, BMP
 - 32-bit, 24-bit and 8-bit BMP files are supported.
- Supported maximum resolution : 4096 x 4096
- Supported maximum file size: 20MB
- Supported image effects : 9 effects ([Fade1](#), [Fade2](#), [Blind](#), [Spiral](#), [Checker](#), [Linear](#), [Stairs](#), [Wipe](#), [Random](#))

Flash

- Flash player 11.0 and older and Flash Air 3.0 and older versions are supported.
- Flash Animation
 - Compatible file format : SWF
- Recommended resolution : 960 x 540

CAUTION

- Performance comparable to Flash Player on a Windows operating system cannot be guaranteed.
- Optimization is needed during content creation

- Flash Video
 - Compatible file format : FLV
 - Video
 - Codec : H.264 BP
 - Resolution : 1920 x 1080
 - Audio
 - Codec : H.264 BP
 - F4V file format is not supported
 - Screen Video is not supported

Power Point

- Compatible document file formats
 - Extension : ppt, pptx
 - Version : Office 97 ~ Office 2007

- Functions not supported
 - Animation effect
 - 3D shapes (which will be displayed in 2D)
 - Header and footer (some subitems are not supported)
 - Word Art
 - Align
 - A group alignment error may occur.
 - Office 2007
 - SmartArt is not fully supported. 97 out of 115 subitems are supported.
 - Object insertion
 - Half-width characters
 - Letter spacing
 - Charts
 - Vertical text
 - Some subitems are not supported
 - Slide notes and handout

PDF

- Compatible document file formats
 - Extension : pdf
- Functions not supported
 - Content less than 1 pixel not supported because of performance degradation issue.
 - Masked Image, Tiled Image content not supported.
 - Content with Rotated Text, not supported.
 - 3D Shadow Effects not supported.
 - Some characters not supported (Special characters may be corrupted)

WORD

- Compatible document file formats
 - Extension : .doc, .docx
 - Version : Office 97 ~ Office 2007
- Functions not supported

- Page background effect
- Some paragraph styles
- Word Art
- Align
 - A group alignment error may occur
- 3D shapes (which will be displayed in 2D)
- Office 2007
 - SmartArt is not fully supported. 97 out of 115 subitems are supported.
- Charts
- Half-width characters
- Letter spacing
- Vertical text
 - Some subitems are not supported
- Slide notes and handout

Template files

- Creation/editing/playback are only available in [Template](#).

LFD

- Supported in [Network Channel](#) and [Local Channel](#)
- Compatible document file formats
 - Extension : .lfd

File formats compatible with Video Wall

- For further details, refer to the “MagicInfo Server user’s manual”.

Restrictions

- Only one video (Video) file can be played per client.
 - Different content files can be played on the displays of a video wall.
 - Two video (Video) files cannot be played on a single display of a video wall.

Video

- 3D video is not supported.
- Content with a resolution larger than the resolution specified in the table above is not supported.
- Video content with a bit rate or frame rate larger than the rate specified in the table above can cause choppy video during playback.
- Video content will not play, or not play correctly, if there is an error in the content or the container.
- Some USB/digital camera devices may not be compatible with the player.
- Supports up to H.264, Level 4.1
- H.264 FMO / ASO / RS, VC1 SP / MP / AP L4 and AVCHD are not supported.
- For all Video codecs except MVC, VP8, VP6:
 - Below 1280 x 720: 60 frame max
 - Above 1280 x 720: 30 frame max
- GMC 2 or higher is not supported.

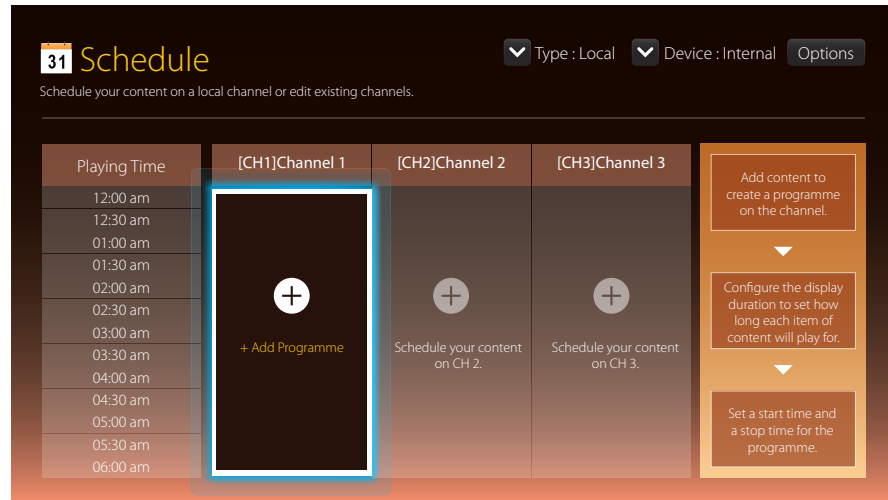

- Supports only BD MVC Spec.
- Some codecs may not be supported in portrait playback mode.

Image

- Compatible image file format : Jpeg, bmp, png
- Supported maximum resolution : 15,360 x 8,640
 - A higher resolution image may take longer to display on the screen.

Schedule

HOME → Schedule → 

Available features in the Schedule page

The Schedule page provides the following features.

- **Type**
 - **Local**: Add or edit schedules.
 - **Network**: View the network schedule configured on the server.
- **Device**
 - Display the name of a connected storage device.
 - This option only activates if **Type** is set to **Local** in **Device**.
- **Options**

Option name	Operations
Send	Send configured schedules to another storage device. This is similar to the “copy” feature on PCs.
Delete	Delete schedules.

Configuring channel schedules

Play media content such as videos, photos and music at a desired time.

- 1 Select a channel to configure.
- 2 Select video, music and photo content you want to apply to the channel schedule.
- 3 Set the time to play the schedule. (**Start Time** ~ **Stop Time**)
- 4 Change the channel schedule name, and then select a destination folder to save to.
- 5 Press the **Save** button.

Only applicable when **Type** is set to **Local**.

Editing a channel schedule

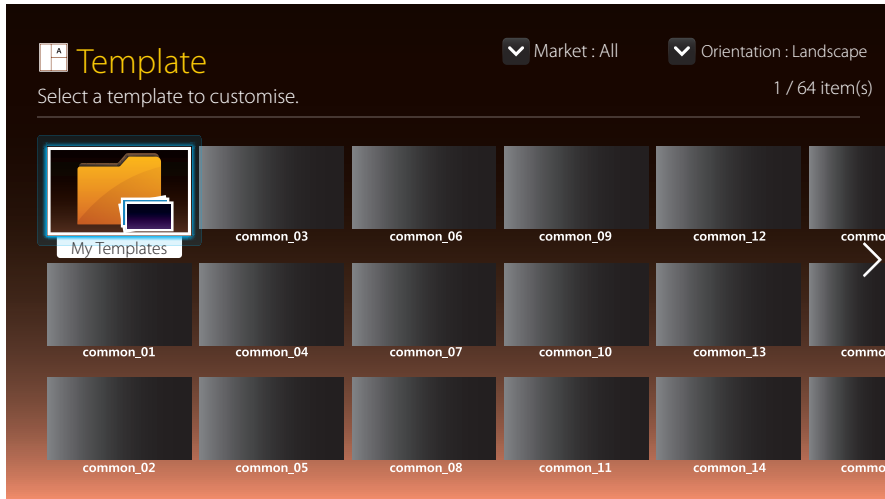

Change settings for a configured channel schedule such as content, the duration and the schedule name.

- 1 Select a channel to edit.
- 2 Select video, photo or music content to edit in the channel schedule.
 - Deleting content: Place the cursor over the desired content and then press the  button to delete it.
 - Move to the far right end of the content list. Click the **+** button to add content or change the playback order of content items.
- 3 Set the time to play the schedule. (**Start Time** ~ **Stop Time**)
- 4 Change the channel schedule name, and then select a destination folder to save to.
- 5 Press the **Save** button.

Only applicable when **Type** is set to **Local**.

Template

HOME → Template → 

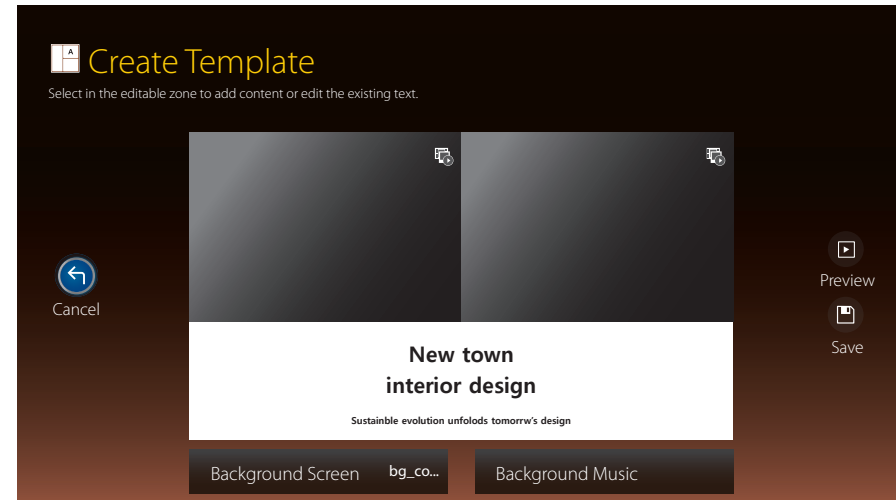

The displayed image may differ depending on the model.

Available features in the Template page

Create unique content using templates. It is easy to create content. Simply change images and text in a template.

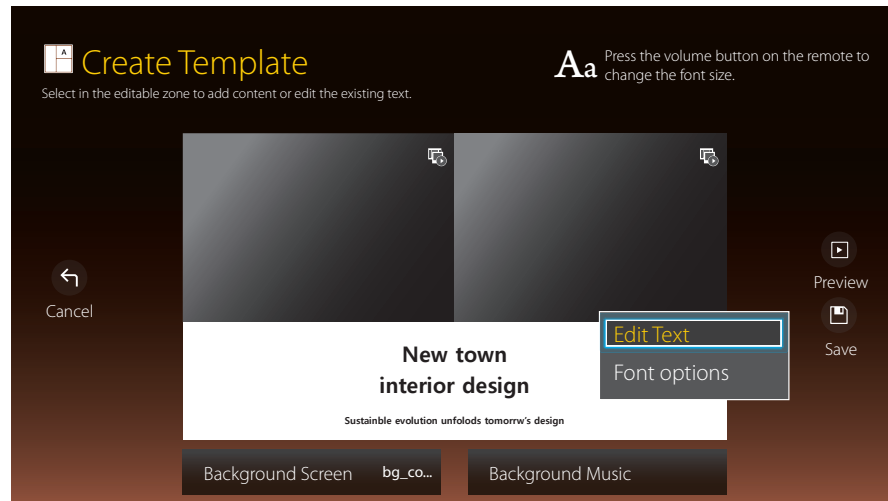

Sort the template list using the following criteria.

- **Market**
- **Orientation**
 - **Landscape**: Select this mode when using the product in landscape orientation.
 - **Portrait**: Select this mode when using the product in portrait orientation.

- 1 Select a template from the provided sample templates.
- 2 Organize a template by inserting text, video, photo, or PDF files as desired.

Entering text

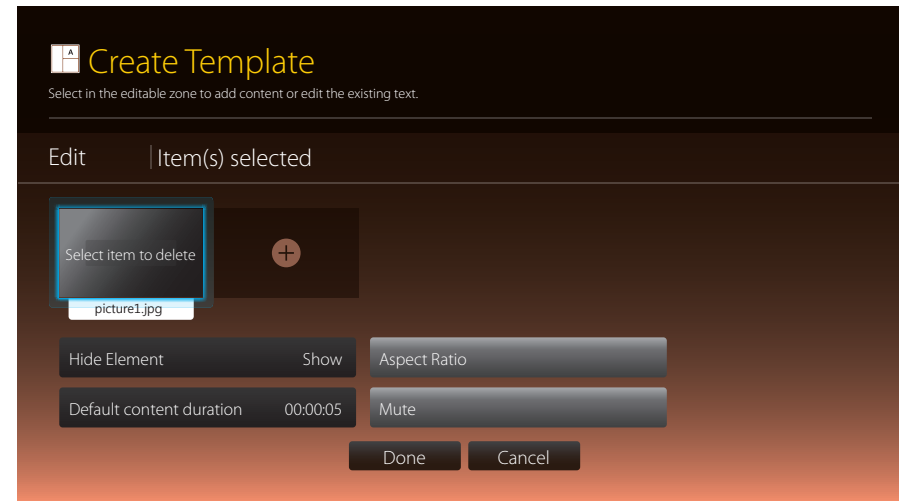

Edit Text

Select the **Edit Text** window to enter text.

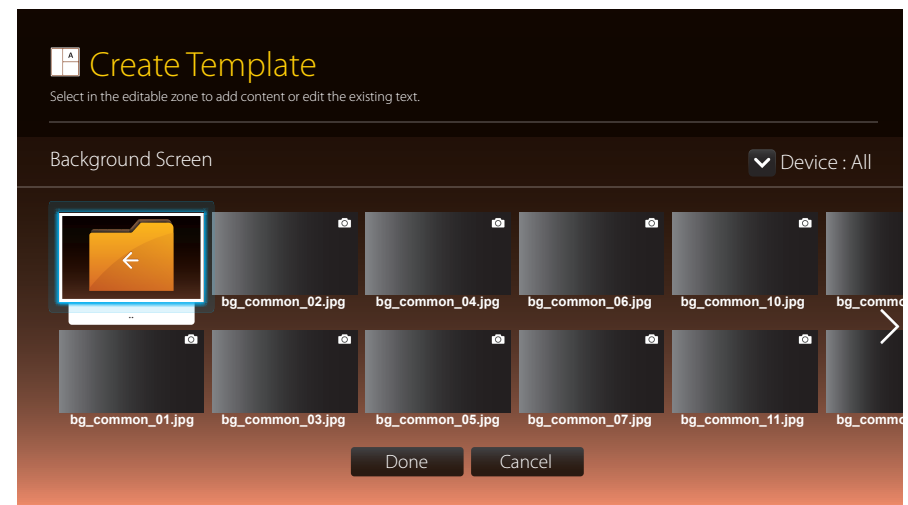

Font options

- **Font Size:** Specify the text size for the message.
- **Font Colour:** Specify the text colour for the message.
- **Background Colour:** Specify the background colour for the message.
- **Background Opacity:** Specify the background transparency for the message.
- **Alignment:** Select a message alignment mode.
- **Scroll:** Specify the scroll direction/speed for the message.
- **Hide Element:** Display or hide a message.
 - Selecting **Hide** does not reset the message settings.
- **Reset:** Reset all settings in **Font options** to default settings.

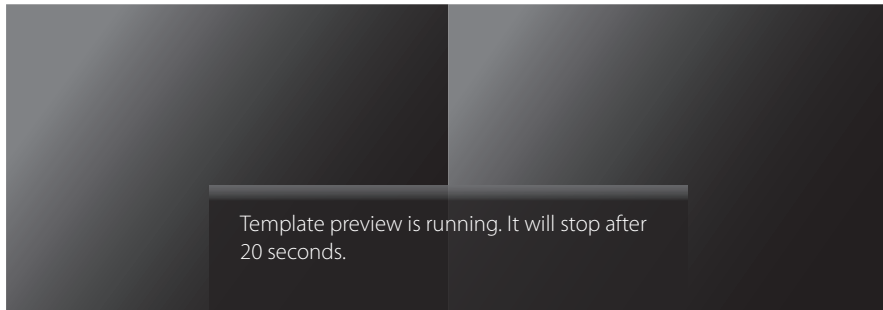

Inserting content such as videos, photos and PDF files

Configuring the background image/background music

Preview

New town interior design

Sustainable evolution unfolds tomorrow's design

- 1 Preview the created template using the [Preview](#) feature.
- 2 To save the template, press the [Save](#) button.

- 3 Configure [Template Name](#) and [Storage](#).
- 4 Press the [Save](#) button to finish creating the content.

Clone Product

[HOME](#) → [Clone Product](#) →

Export settings on the product to an external storage device. You can also import settings from an external storage device.

This option is useful when assigning the same settings to several products.

When a duplicate file is not found on the external storage device

- 1 Connect the external storage device, then run the [Clone Product](#) function.
- 2 The [No cloning file found on the external storage device. Export this device's settings to the external storage device?](#) message appears.

When a duplicate file is found on the external storage device

- 1 Connect the external storage device, then run the [Clone Product](#) function.
- 2 The [Cloning file found. Please select an option.](#) message appears.
Run the [Import from External Storage](#) or [Export to External Storage](#) function.
 - [Import from External Storage](#): Copy settings saved on an external storage device to the product.
 - [Export to External Storage](#): Copy settings on the product to an external storage device.

After configuration is complete, the product is rebooted automatically.

ID Settings

HOME → ID Settings → 

Assign an ID to a set.

Device ID

Enter the ID number of the product connected to the input cable for input signal reception. (Range: 0~224)

- Press ▲/▼ to select a number, and press .
- Enter the number you want using the number buttons on the remote control.

Device ID Auto Set

This feature automatically allots an ID number to a device connected via an RS232C cable.

When multiple devices are connected, enable the feature on either the first or last device.

PC Connection Cable

Select a method to connect to MDC to receive the MDC signal.

- **RS232C cable**
Communicate with MDC via the RS232C-stereo cable.
- **RJ-45 (LAN)**
Communicate with MDC via the RJ45 cable.

DisplayPort Daisy Chain

Video Wall

HOME → Video Wall → 

Assign an ID to a set.

Customize the layout of multiple displays that are connected to form a video wall.

In addition, display part of a whole picture or repeat the same picture on each of the connected multiple displays.

To display multiple images, refer to MDC Help or the MagicInfo user manual. Some models may not support the MagicInfo function.

Apply to

- **Current Source** (screen output from a device connected to Source): Configure video wall features for the screen output from an external device connected to the product.
- **MagicInfo Player S**: Configure video wall features for content saved in the product or content saved on a USB memory or SD card.

Restrictions

Playback may be initially choppy if video files of different resolutions play successively (i.e., 1280x720 content plays after 1920x1080 content) or an image file and a video file play one after the other.

Video

- Supported resolution
 - 1920 x 1080 @ 24p/30p
 - 1280 x 720 @ 24p/30p/60p
- HEVC and 3D images are not supported.

Image

- Compatible image file format: Jpeg, png, bmp
- Supported maximum resolution
 - jpeg: 15360 x 8640
 - png: 4096 x 4096

– bmp: 4096 x 4096

Video Wall

You can activate or deactivate [Video Wall](#).

To organize a video wall, select [On](#).

- [Off / On](#)

Horizontal x Vertical

This feature automatically splits a video wall display based on a video wall matrix configuration.

Enter the video wall matrix.

The video wall display is split based on the configured matrix. The number of vertical or horizontal display devices can be set within the range 1 and 15.

A video wall display can be split into a maximum of 100 screens.

The [Horizontal x Vertical](#) option is only enabled when [Video Wall](#) is set to [On](#).

Screen Position

To rearrange split screens, adjust the number for each product in the matrix using the [Screen Position](#) feature.

Selecting [Screen Position](#) will display the video wall matrix with the numbers assigned to the products that form the video wall.

To rearrange products, use the direction buttons on the remote control to move a product to another desired number. Press the  button.

- [All Displays](#): Assign screen positions to All displays. Then, you don't need to set up video wall for individual displays.
- [Current Displays](#): Only Assign screen position for this first display.

[Screen Position](#) allows you to split the screen into a maximum of 100 views (15x15).

The maximum number of views that can be split when products are connected via DP Loopout is also 100.

- The [Screen Position](#) option is only enabled when [Video Wall](#) is set to [On](#).
- To use the function, make sure [Horizontal x Vertical](#) is configured.

Format

Select how to display images on the video wall display.

- [Full](#): Display images in full screen with no margin.
- [Natural](#): Display images in the original aspect ratio without enlarging or reducing the size.

The [Format](#) option is only enabled when [Video Wall](#) is set to [On](#).

Network Status

[HOME](#) → [Network Status](#) → 

Check the current network and Internet connection.

Picture Mode

HOME → Picture Mode → 

Select a picture mode (**Picture Mode**) suitable for the environment where the product will be used.

Video/Image mode improves the picture quality of the video device. **Text** mode improves the picture quality of the computer.

- **Shop & Mall**

Suitable for shopping malls.

- Select either **Video/Image** or **Text** depending on the picture mode.

- **Office & School**

Suitable for offices and schools.

- Select either **Video/Image** or **Text** depending on the picture mode.

- **Terminal & Station**

Suitable for bus terminals and train stations.

- Select either **Video/Image** or **Text** depending on the picture mode.

- **Video Wall**

Suitable for environments where video wall display are used.

- Select either **Video/Image** or **Text** depending on the picture mode.

- **Calibration**

In this mode, the brightness, colour, gamma and uniformity settings customized using the colour calibration programme **Advanced Colour Management** are applied.

- To apply the **Calibration mode** properly, make sure you configure the picture quality settings, such as brightness, colour, gamma and uniformity, using the colour calibration programme **Advanced Colour Management**.
- To download the **Advanced Colour Management** programme, visit www.samsung.com/displaysolutions.

- **BD Wise**

Provides the optimal picture quality for Samsung DVD, Blu-ray and Home Theatre products which support **BD Wise**.

When **BD Wise** is turned **On**, the picture mode is automatically changed to the optimal resolution.

- Available when you connect Samsung products that support **BD Wise** through an HDMI cable to the product.
- The **BD Wise** function is enabled only when a source device with the **BD Wise** function is connected.

On/Off Timer

HOME → On/Off Timer → 

- You must set [Clock Set](#) before you can use this feature.

On Timer

Set [On Timer](#) so that your product turns on automatically at a time and on a day of your choosing.

The power is turned on with the specified volume or input source.

Set the on timer by making a selection from one of the seven options. Ensure you set the current time first. ([On Timer 1](#) ~ [On Timer 7](#))

- Setup:** Select [Off](#), [Once](#), [Everyday](#), [Mon~Fri](#), [Mon~Sat](#), [Sat~Sun](#) or [Manual](#).
If you select [Manual](#), you can choose the days you want [On Timer](#) to turn on your product.
 - The check mark indicates days you've selected.
- Time:** Set the hour and minute. Use the number buttons or ▲/▼ buttons to enter numbers. Use ◀/▶ buttons to change entry fields.
- Volume:** Set the desired volume level. Use the up and down arrow buttons to change the volume level.
- Source:** Select the input source of your choice.

- If there is no music file on the USB device or you don't select a folder containing a music file, the Timer function does not operate correctly.
- If there is only one photo file in the USB, the [Slide Show](#) will not play.
- If a folder name is too long, the folder cannot be selected. Up to 255 characters are recognizable.
- Each USB you use is assigned its own folder. When using more than one of the same type of USB, make sure the folders assigned to each USB have different names.
- We recommend that you use a USB memory stick and a multi card reader when using [On Timer](#).
- The [On Timer](#) function may not work with USB devices with a built-in battery, MP3 players, or PMPs made by some manufacturers because the product can take too long to recognize these devices.

Off Timer

Set the off timer ([Off Timer](#)) by making a selection from one of the seven options. ([Off Timer 1](#) ~ [Off Timer 7](#))

- Setup:** Select [Off](#), [Once](#), [Everyday](#), [Mon~Fri](#), [Mon~Sat](#), [Sat~Sun](#) or [Manual](#).
If you select [Manual](#), you can choose the days you want [Off Timer](#) to turn off your product.
 - The check mark indicates days you've selected.
- Time:** Set the hour and minute. Use the number buttons or ▲/▼ buttons to enter numbers. Use ◀/▶ buttons to change entry fields.

Holiday Management

Timer will be disabled during a period specified as a holiday.

- Add Holiday:** Specify the period you want to add as a holiday.
Select the start and end dates of the holiday you want to add using the ▲/▼ buttons, and click the [Save](#) button.
The period will be added to the list of holidays.

- **Start Date:** Set the start date of the holiday.
- **End Date:** Set the end date of the holiday.
- **Delete:** Delete selected items from the list of holidays.
- **Edit:** Select a holiday item and then change the date.
- **Set Applied Timer:** Set the **On Timer** and **Off Timer** to not activate on public holidays.
 - Press  to select the **On Timer** and **Off Timer** settings you do not want to activate.
 - The selected **On Timer** and **Off Timer** will not activate.

Ticker

HOME → **Ticker** → 

Input text while a video or image is displayed and display the text on the screen.

- **Off / On**
- **Message:** Enter a message to display on the screen.
- **Time:** Set the **Start Time** and **End Time** to display a **Message**.
- **Position:** Select an orientation to display a **Message**.
- **Scroll:** Specify the scroll **Direction** and **Speed** for the message.
- **Font options:** Specify the text font and colour for the message.
- **Preview:** Preview configured caption settings.

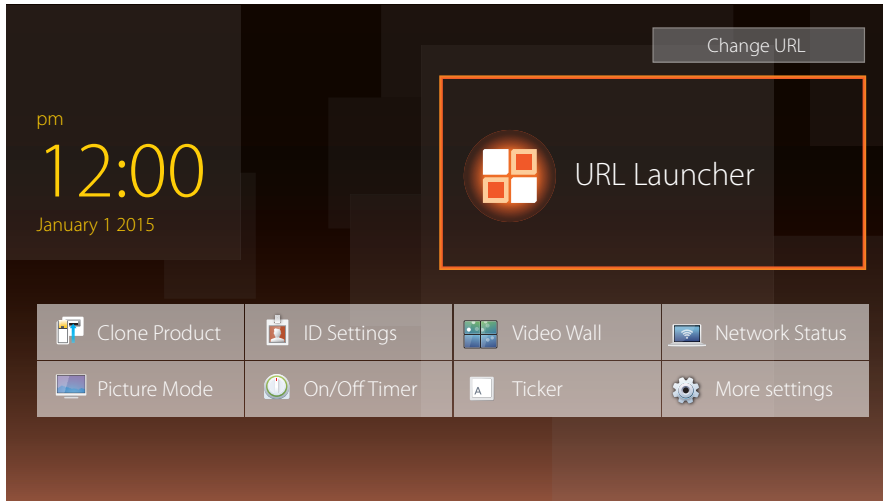

More settings

HOME → **More settings** → 

The menu appears.

URL Launcher

HOME → URL Launcher → 

The displayed image may differ depending on the model.

For details on how to use the [URL Launcher](#) feature, contact the dealer the product was purchased from.

- To use the [URL Launcher](#) feature, set [Play via](#) to [URL Launcher](#) in [System](#).

Description

Speaker Settings

If you are listening to the sound track of a broadcast or movie through an external receiver, you may hear a sound echo caused by the difference in decoding speed between the products speakers and the speakers attached to your audio receiver. If this occurs, set the product to **External**.

- When you set **Speaker Settings** to **External**, the products speakers are turned off. You will hear sound through the external speakers only. When the **Speaker Settings** is set to **Internal**, both the product speakers and the external speakers are on. You will hear sound through both.
 - If there is no video signal, both the product's speakers and the external speakers will be mute.
-

Network

Network ▼		
2nd	3rd	Description
Network Status		You can check the current network and Internet status.
Network Settings		Configure network settings to use various smart hub features such as Internet search, content sharing through a home network and feature updates.
Server Network Settings	Connect to Server	To run Player connect to a network. <ul style="list-style-type: none"> If the SSL option is enabled, the server is configured to use https and data transfer is encrypted. Enter the server IP address and port number. Use 7001 as the port number. (If unable to connect to the server using port number 7001, check with your server administrator to find the correct port number and then change the port number.)
	MagicInfo Mode	Select the appropriate MagicInfo Mode depending on the environment where you are using the product.
	Server Access	Select a method to connect the server network.
	FTP Mode	Specify the FTP operating mode.
Multimedia Device Settings		Allow other devices such as smart phones and tablets on your network, to share content with your product.
Device Name		Select or enter a device name.
		This name can be shown on network remote controls over the network.

Network Settings (Wired)

Connecting to a Wired Network

There are three ways to attach your product to your LAN using cable.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an external modem using a LAN cable. See the diagram below.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an IP Sharer which is connected to an external modem. Use LAN cable for the connection. See the diagram below.

- Depending on how your network is configured, you may be able to attach your product to your LAN by connecting the LAN port on the back of your product directly to a network wall outlet using a LAN cable. See the diagram below. Note that the wall outlet is attached to a modem or router elsewhere in your house.

If you have a Dynamic Network, you should use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS values your product needs to access the Internet so you do not have to enter them manually. Most home networks are Dynamic Networks.

Some networks require a Static IP address. If your network requires a Static IP address, you must enter the IP address, subnet mask, gateway, and DNS values manually on your product Cable Setup Screen when you set up the network connection. To get the IP address, subnet mask, gateway, and DNS values, contact your Internet Service Provider (ISP).

If you have a Windows computer, you can also get these values through your computer.

- You can use ADSL modems that support DHCP if your network requires a Static IP address.
- ADSL modems that support DHCP also let you use Static IP addresses.

Automatic Network Settings (Wired)

Connect to the network using a LAN cable.

Make sure a LAN cable is connected first.

How to set up automatically

- 1 Set **Network type** to **Wired** from the **Network Settings** page.
- 2 Press the **Connect** button to start **Network Settings**.
 - The **Connect** button is only enabled when the LAN cable is properly connected.
- 3 The network test screen appears and verifies the network connection. When the connection has been verified, the “**Wired network and Internet connection completed.**” message appears.
 - If the connection process fails, check the LAN port connection.
 - If the automatic process cannot find the network connection values or if you want to set the connection manually, go to the next section, network setup.

Manual Network Settings (Wired)

Offices may use static IP addresses.

If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

Getting the Network Connection Values

To view the Network connection values on most Windows computers, follow these steps.

- 1 Right click the Network icon on the bottom right of the screen.
- 2 In the pop-up menu that appears, click **Status**.
- 3 On the dialog that appears, click the **Support** tab.
- 4 On the **Support** Tab, click the **Details** button. The Network connection values are displayed.

How to set up manually

- 1 Set **Network type** to **Wired** from the **Network Settings** page.
- 2 Press the **Connect** button to start **Network Settings**.
 - The **Connect** button is only enabled when the LAN cable is properly connected.

- 3 The network test screen appears and the verification process starts. Press **Stop**. The verification process stops.
- 4 Select **IP Settings** on network connection screen. The **IP Settings** screen appears.
- 5 Select the field at the top, press , and then set **IP Settings** to **Enter manually**. Repeat the entry process for each field in the **IP Address**.
 - Setting **IP Settings** to **Enter manually** automatically changes **DNS Setting** to **Enter manually**.
- 6 When done, select **OK** at the bottom of the page, and then press . The network test screen appears and the verification process starts.
- 7 When the connection has been verified, the “**Wired network and Internet connection completed.**” message appears.

Network Setting (Wireless)

Connecting to a Wireless Network

Samsung recommends using IEEE 802.11n. When you play video over a network connection, the video may not play smoothly.

- Select a channel for the wireless IP sharer that is not currently being used. If the channel set for the wireless IP sharer is currently being used by another device nearby, this will result in interference and communication failure.
- Your product supports only the following wireless network security protocols. If you select the Pure High-throughput (Greenfield) 802.11n mode and the Encryption type is set to WEP, TKIP or TKIP AES (WPS2Mixed) on your AP or wireless router, Samsung products will not support a connection in compliance with new Wi-Fi certification specifications.
- If your wireless router supports WPS (Wi-Fi Protected Setup), you can connect to the network via PBC (Push Button Configuration) or PIN (Personal Identification Number). WPS will automatically configure the SSID and WPA key in either mode.
- Connection Methods: You can setup the wireless network connection in three ways. Auto Setup (Using the Auto Network Search function), Manual Setup, **WPS(PBC)**

Automatic Network Setup (Wireless)

Most wireless networks have an optional security system that requires devices that access the network to transmit an encrypted security code called an Access or **Security Key**. The **Security Key** is based on a Pass Phrase, typically a word or a series of letters and numbers of a specified length you were asked to enter when you set up security for your wireless network. If you use this method of setting up the network connection, and have a **Security Key** for your wireless network, you will have to enter the Pass Phrase during the the automatic or manual setup process.

How to set up automatically

- 1 Set **Network type** to Wireless from the **Network Settings** page.
- 2 The **Network** function searches for available wireless networks. When done, it displays a list of the available networks.
- 3 In the list of networks, press the ▲ or ▼ button to select a network, and then press the  button twice.
 - If the desired wireless router does not appear, select **Refresh** to search again.
 - If the router cannot be found after retrying, select the **Stop** button. The **Add Network** button appears.
- 4 If the **Enter password** screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
- 5 If the router has security, enter the **Enter password**. (Security key or PIN).
- 6 When done, use the right arrow button to move the cursor to **Done**, and then press . The network connection screen appears and the verification process starts.
 - If the product cannot connect to the Internet even though it is connected to a router, check if the Internet connection of the router.
- 7 When the connection has been verified, the “**Your wireless network and Internet connection are setup and ready to use.**” message appears.

Manual Network Setup (Wireless)

Offices may use static IP addresses.

If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

Getting the Network Connection Values

To view the Network connection values on most Windows computers, follow these steps.

- 1 Right click the Network icon on the bottom right of the screen.
- 2 In the pop-up menu that appears, click **Status**.
- 3 On the dialog that appears, click the **Support** tab.
- 4 On the **Support** Tab, click the **Details** button. The Network connection values are displayed.

How to set up manually

- 1 Set **Network type** to Wireless from the Network Settings page.
- 2 The **Network** function searches for available wireless networks. When done, it displays a list of the available networks.
- 3 In the list of networks, press the ▲ or ▼ button to select a network, and then press the  button twice.
 - If the desired wireless router does not appear, select **Refresh** to search again.
 - If the router cannot be found after retrying, select the **Stop** button.
- 4 If the **Enter password** screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
- 5 If the router has security, enter the **Enter password**. (Security key or PIN).
- 6 When done, use the right arrow button to move the cursor to Done, and then press . The network connection screen appears and the verification process starts.
- 7 Select **Stop** while network connections are being attempted. This will stop the connection.
- 8 Select **IP Settings** on network connection screen. The **IP Settings** screen appears.
- 9 Select the field at the top, press , and then set **IP Settings** to **Enter manually**. Repeat the entry process for each field in the **IP Address**.

- Setting **IP Settings** to **Enter manually** automatically changes **DNS Setting** to **Enter manually**.

- 10 When done, select **OK** at the bottom of the page, and then press . The network test screen appears and the verification process starts.
- 11 When the connection has been verified, the “**Your wireless network and Internet connection are setup and ready to use.**” message appears.

WPS(PBC)

How to set up using WPS(PBC)

If your router has a WPS(PBC) button, follow these steps.

- 1 Set **Network type** to Wireless from the **Network Settings** page.
- 2 Select **WPS(PBC)**, press .
- 3 Press the **WPS(PBC)** button on your router within 2 minutes. Your product automatically acquires all the network setting values it needs and connects to your network.
- 4 The network connection screen appears, and network setup is done.

Anynet+ (HDMI-CEC)

Anynet+ (HDMI-CEC)

Anynet+ is a function that enables you to control all connected Samsung devices that support Anynet+ with your Samsung product remote. The Anynet+ system can be used only with Samsung devices that have the Anynet+ feature. To be sure your Samsung device has this feature, check if there is an Anynet+ logo on it.

- You can only control Anynet+ devices using the product remote control, not the buttons on the product.
- The product remote control may not work under certain conditions. If this occurs, reselect the Anynet+ device.
- **Anynet+** works when the AV device supporting **Anynet+** is in the standby or on status.
- While in **PIP** mode, **Anynet+** functions only when an AV device is connected as the primary display. It does not work if the AV device is connected as a secondary display.
- **Anynet+** supports up to 12 AV devices in total. Note that you can connect up to 3 devices of the same type.

Anynet+ Menu

The Anynet+ menu changes depending on the type and status of the Anynet+ devices connected to the product.

Press the **TOOLS** button to display the **Anynet+** menu and select a menu you want.

View PC	Changes Anynet+ mode to PC mode.
Select Device	Shows the Anynet+ device list.
(device_name) MENU	Shows the menu of the connected device menus. E.g. if a DVD player is connected, the disc menu of the DVD player will appear.
(device_name) Tools	Shows the tools menu of the connected device. E.g. if a DVD player is connected, the tools menu of the DVD player will appear. <ul style="list-style-type: none"> • Depending on the device, this menu may not be available.
(device_name) Title Menu	Shows the title menu of the disc in the connected device. E.g. If a DVD player is connected, the title menu of the movie in the DVD player will appear. <ul style="list-style-type: none"> • Depending on the device, this menu may not be available.

Auto Turn Off

Setting an Anynet+ Device to turn Off automatically when the product is turned off.

- If Auto Turn Off is set to Yes, running external devices will turn off at the same time as the product powers off.
- May not be enabled depending on the device.

Search for Devices

Switching between Anynet+ devices

- 1 Press the **TOOLS** button, select **Anynet+ (HDMI-CEC)**, and then press **☑**.
- 2 Select **Select Device**, and then press the **☑** button.
If you cannot find a device you want, select **Refresh** to refresh the list.
- 3 Select a device, and then press the **☑** button. You can switch to the selected device.

- The **Select Device** menu appears only when you set **Anynet+ (HDMI-CEC)** to **On** in the **System** menu.
- Switching to the selected device may take up to 2 minutes. You cannot cancel the switching operation while switching is in progress.
- If you have selected an Anynet+ device by pressing the **SOURCE** button and then selecting its input source, you cannot use the **Anynet+** function.
- Make sure to switch to an **Anynet+** device by using the **Select Device**.

Troubleshooting for Anynet+

Problem	Possible Solution
Anynet+ does not work.	<ul style="list-style-type: none"> • Check if the device is an Anynet+ device. The Anynet+ system supports Anynet+ devices only. • Check if the Anynet+ device power cord is properly connected. • Check the Anynet+ device's Video/Audio/HDMI cable connections. • Check whether Anynet+ (HDMI-CEC) is set to On in the System menu. • Check whether the remote control is Anynet+ compatible. • Anynet+ doesn't work in certain situations. (initial setup) • If you have removed and then reconnected the HDMI cable, please make sure to search devices again or turn your product off and on again. • Check if the Anynet+ function of the Anynet device is set on.
I want to start Anynet+.	<ul style="list-style-type: none"> • Check if the Anynet+ device is properly connected to the product and check if the Anynet+ (HDMI-CEC) is set to On in the System menu. • Press the TOOLS button to display the Anynet+ menu and select a menu you want.
I want to exit Anynet+.	<ul style="list-style-type: none"> • Select View PC in the Anynet+ menu. • Press the SOURCE button on the product remote control and select a non- Anynet+ device.

Problem	Possible Solution
The message “Disconnecting Anynet+ device ...” appears on the screen.	<ul style="list-style-type: none">• You cannot use the remote control when you are configuring Anynet+ or switching to a view mode.• Use the remote control after the product has completed Anynet+ configuration or has finished switching to Anynet+.
The Anynet+ device does not play.	<ul style="list-style-type: none">• You cannot use the play function when initial setup is in progress.
The connected device is not displayed.	<ul style="list-style-type: none">• Check whether or not the device supports Anynet+ functions.• Check whether or not the HDMI cable is properly connected.• Check whether Anynet+ (HDMI-CEC) is set to On in the System menu.• Search Anynet+ devices again.• Anynet+ requires an HDMI connection. Make sure the device is connected to your product with an HDMI cable.• Some HDMI cables may not support Anynet+ functions.• If the connection is terminated because there has been a power failure or the HDMI cable has been disconnected, please repeat the device scan.

Reset All		This option returns all the current settings for a display to the default factory settings.

Multimedia content (Media Play)

Play photos, videos or music saved on a storage device.

Play a variety of content using the following methods.

- Using a USB device: Play media content such as videos, photos and music from a USB device.
- Connecting a storage device: Play media content saved on a storage device such as a smartphone, camera, PC or cloud service.

Before you play

CAUTION

- Before connecting a USB device to the product, back up files to ensure your data is not damaged or lost.
Samsung Electronics is not liable for any damage or loss of data.
- Do not remove a USB device while it is loading.
- If a USB device is connected using a USB extension cable, the USB device may not be recognized or files saved on the device may not be able to be read.
- If the product does not recognize a connected USB device, the files on the USB device may be corrupted or may not be able to be played.
If this occurs, connect the USB device to the PC to format the device, then make sure the device is connected properly.
- USB HDD greater than 2TB is not supported.

Compatible devices with media play

- Some USB digital cameras, smartphones and audio devices may not be compatible with the product.
- Media play is only compatible with USB MSC devices.
- MSC device refers to a Mass Storage Class Bulk-Only Transport device.

- Examples of MSC devices include Thumb drives, Flash card readers and USB HDDs. (USB hubs are not supported.)
These MSC devices must be connected directly to a USB port on the product.
- If more than one Picture Transfer Protocol (PTP) device is connected, only one will work at a time.
- If multiple MSC devices are connected, some devices may not be recognized. USB devices that require high power (higher than 500mA or 5V) may not be supported.
- If an overheating warning message appears when a USB device is connected or used, the USB device may not be recognized or function properly.
- The screensaver activates if the product is left idle for a period of time specified in Auto Protection Time.
- Power saving mode on some external hard disk drives may automatically deactivate after connecting to the product.

File system and formats

- Media play may not function properly with unlicensed multimedia files.
- Media Transfer Protocol (MTP) is not supported.
- Supported file systems include FAT16, FAT32 and NTFS (read only).
- Media play supports the sequential JPEG format.
It does not support the progressive JPEG format.
- Images with a higher resolution take longer to be displayed on the screen.
- The maximum JPEG resolution supported is 15360x8640 pixels.
- If a file is incompatible or corrupted, a message Not Supported File Format. appears.
- When sorting files in folder view mode, a maximum of 1000 files can be displayed in each folder.
- If a USB device contains 8000 files and folders or more, some files and folders may not open.

- DRM MP3 files downloaded from websites that charge a fee cannot be played. Digital Rights Management (DRM) refers to a system for protecting the copyrights of data circulated via the Internet or other digital media by enabling secure distribution and/or disabling illegal distribution of the data.

Using a USB device

Connecting a USB device

- 1 Turn on your product.
- 2 Connect a USB device containing photo, music and/or movie files to the USB port on the back or side panel of the product.
- 3 The **Player** page automatically appears as soon as a USB device connects to the product.
 - If only one USB device is connected, files saved on the USB device are displayed automatically.
 - To view content saved on a USB device, connect the USB device to a USB port on the product.

It is recommended to use a USB HDD that has a power adapter.

Removing a USB device

Removing a USB device from Source

- 1 Press **SOURCE** on the remote control. Alternatively, go to **Source** using the OSD menu.
- 2 Select **USB** from **Source**, and then press the **TOOLS** button on the remote control. The **Options** menu is displayed.
- 3 Select **Remove USB** and wait until the USB device is disconnected. The USB device is disconnected.

It is recommended to remove a USB device using the **Remove USB** function.

Playing multimedia content

Approving a PC/mobile device connection

Play photos, videos or music saved on a PC or mobile device.

To play media content from a PC or mobile device on the product, the connection with the PC or mobile device must be approved.

- The media playback feature is available on any devices that support DLNA DMC. The DLNA DMC feature allows you to search media content and control content playback from a product after connecting a PC or mobile device to the product.
- 1 Press **SOURCE** on the remote control. Alternatively, go to **Source** using the OSD menu.
 - 2 Select **Network** from **Source**. The **Network Device** menu appears.
 - 3 Select **Options** from the screen, and then select **Multimedia Device Settings**. A list of devices connected to the product will appear.
 - 4 Select a device and approve the device connection. Playback is only available on devices that are permitted to connect.
 - Sending a media content playback request from a PC or mobile device displays a prompt asking if connection with the product is permitted. Conveniently connect the devices using the prompt.

- For details on how to configure a network, refer to the section **Network Settings**.
- Ensure the product and PC are connected to the same network subnet. All IP addresses are made up of four parts separated by dots. (E.g. IP address 111.222.333.444) The product should have the same IP address as the PC, except for the fourth part of the address, if they are connected to the same subnet. (E.g. 111.222.333.***)

When connected to a home network (DLNA)

Play content saved on a device connected to a home network.

- Playing media content using a non-Samsung DLNA server may result in a compatibility issue.
 - Playback of some media content shared with a PC or mobile device may not be possible depending on the content encoding type or the content file format. Some functions may not be available.
 - Media content may not play properly if there is network congestion. If this is the case, use a USB device.
- 1** Press **SOURCE** on the remote control. Alternatively, go to **Source** using the OSD menu.
 - 2** Select **Network** from **Source**. The **Network Device** menu appears.
 - 3** Select a device connected via the home network (DLNA). A list of files and folders shared with the selected device will appear.
 - 4** Select media content to play from the list. Play the selected media content.

Multimedia content list

SOURCE → Source → USB

The media content list page on a storage device provides the following features.

- **Sort by**
Rearrange the media content list under the selected file format in a desired view mode.
This menu item is not available if **Filter** is set to **All**.
- **Filter**
Among **Photos**, **Videos** and **Music** content saved on a storage device, view content files under a desired file format only.
- **Options**
This menu item is not available if **Filter** is set to **All**.

Option name	Operations	Photos	Videos	Music
Slide Show	Start a slideshow. <ul style="list-style-type: none"> • This menu item is not available if Sort by is set to Folder. 	✓		
Encoding	Select an encoding language if the title of media content appears corrupted.			✓
Add to Playlist	Add files to a playlist or create a new playlist.			✓
Play Selected	Select and play desired content from the media content list.	✓	✓	✓
Send	Send media content to another storage device. This is similar to the “copy” feature on PCs.	✓	✓	✓
Index	Select an index to conveniently locate media content if a storage device contains a lot of media content. <ul style="list-style-type: none"> • Provided indices include dates and alphanumeric characters. • This menu item is not available if Sort by is set to Folder. 	✓	✓	✓

Menus available

Photo

Pressing the **☰** or **TOOLS** button displays the following buttons. The **RETURN** button makes the buttons disappear.

- Pressing the **INFO** button while a device name is selected will display information about the selected device.
- Pressing the **INFO** button while a file is selected will display information about the selected file.

- **Pause / Play**

Start or stop a slideshow. Using a slideshow, it is possible to play all photos in a folder.

- **Previous / Next**

View the previous or next photo.

- **Settings**

Option name	Operations
Slideshow Settings	<ul style="list-style-type: none"> • Speed: Change the slideshow speed. • Effects: Apply transition effects between photos.
Rotate	Rotate photos.
Zoom	Zoom in on photos up to 4x.
Picture Mode	Change the Picture Mode .
Background Music	Play background music while viewing photos. <ul style="list-style-type: none"> • Make sure a music file is saved on the same device. • The mini player is displayed while background music (Background Music) is playing. Using the mini player, pause the music currently playing or change to another music. • Previous BGM track / Pause BGM / Play BGM / Next BGM track
Sound Mode	Change the Sound Mode . <ul style="list-style-type: none"> • This menu item is only available when background music (Background Music) is playing.
Select Speakers	Select a speaker that will output the background music (Background Music). <ul style="list-style-type: none"> • This menu item is only available when background music (Background Music) is playing.

Option name	Operations
Send	Send open photos to another storage device. This is similar to the “copy” feature on PCs.
Information	View information about a file.

Video

Pressing the  or **TOOLS** button displays the following buttons. The **RETURN** button makes the buttons disappear.

- **Pause / Play**

Pause or play a video.

The following features are available in pause mode. Note that sound cannot be heard in pause mode.

- **Rewind / Fast Forward**

Rewind or fast forward a video. Speed up playback up to 3x, if required.

To change the playback speed to the original speed, select .

- **Previous / Next**

To play the previous video, select  twice. Selecting  once will play the current video from the beginning.

To play the next video, select .

- **Settings**

Option name	Operations
Select Scene	<ul style="list-style-type: none"> • Thumbnails: Select a scene and play the video from the scene. <ul style="list-style-type: none"> – Thumbnails is not available if 1) the thumbnail of the video is not extracted yet, 2) the video contains audio only or 3) the video play time is shorter than 60 seconds. • Chapter Titles: Select and play another video in the same folder. • Time Bar: You can use the  and  buttons to scan through the file in 10-second intervals or enter a specific time value to jump to that point in the video.
Subtitle	Language / Sync / Reset Sync / Size / Encoding <ul style="list-style-type: none"> • If the subtitle is displayed incorrectly, change Encoding options.
Repeat	Configure Repeat. <ul style="list-style-type: none"> • Off • Repeat One: Play the current video repeatedly. • Repeat All: Play all videos in a folder repeatedly.

Option name	Operations
Rotate	Rotate an image.
Picture Size	Change the screen size (Picture Size). Supported screen sizes vary depending on the image.
Picture Mode	Change the Picture Mode .
Sound Mode	Change the Sound Mode .
Select Speakers	Select a speaker that will output sound from the product.
Audio Language	Play a video using a desired language. This feature only activates when a streaming file that supports multiple audio formats is playing.
Information	View information about a file.

Music

- **Pause / Play**
Pause or play music.
- **Rewind / Fast Forward**
Rewind or fast forward music. Speed up playback up to 3x, if required. To play the previous music file, select .
- **Previous / Next**
To play the previous music file, select  twice. Selecting  once will play the current music from the beginning.
To play the next music file, select .
- **Repeat**
Configure **Repeat** mode. **Repeat One** plays the current music file repeatedly. **Repeat All** plays all files in a folder repeatedly.
- **Shuffle**
Enable or disable shuffle playback mode.
- **Select Speakers**
Select a speaker that will output sound from the product.
- **Sound Mode**
Change the [Sound Mode](#).

Subtitles and supported file formats

Subtitle

External	Internal
<ul style="list-style-type: none"> • MPEG-4 timed text (.ttxt) • SAMI (.smi) • SubRip (.srt) • SubViewer (.sub) • Micro DVD (.sub or .txt) • SubStation Alpha (.ssa) • Advanced SubStation Alpha (.ass) • Powerdivx (.psb) 	<ul style="list-style-type: none"> • Xsub Container: AVI • SubStation Alpha Container: MKV • Advanced SubStation Alpha Container: MKV • SubRip Container: MKV • MPEG-4 timed text Container: MP4

Supported image resolutions

File extension	Type	Resolution
*.jpg, *.jpeg	JPEG	15360 x 8640
*.png	PNG	1920 x 1080
*.bmp	BMP	1920 x 1080
*.mpo	MPO	15360 x 8640

Supported music file formats

File extension	Type	Codec	Comments
*.mp3	MPEG	MPEG1 Audio Layer 3	
*.m4a, *.mpa, *.aac, *.3ga	MPEG4	AAC	

File extension	Type	Codec	Comments
*.flac	FLAC	FLAC	<ul style="list-style-type: none"> The Seek (jump) function is not supported. Supports up to 2 channel.

Supported video formats

- Video content will not play, or not play correctly, if there is an error in the content or the container.
- Sound or video may not work if the contents have a standard bitrate/frame rate above the compatible Frame/sec listed in the table above.
- If the Index Table is in error, the Seek (Jump) function is not supported.
- You may experience file stuttering while playing a video through a network connection.
- The menu may take longer to appear if the video's bit rate exceeds 10Mbps.
- Some USB/digital camera devices may not be compatible with the player.

Video Decoder	Audio Decoder
<ul style="list-style-type: none"> • Supports up to H.264, Level 4.1 • H.264 FMO / ASO / RS, VC1 SP / MP / AP L4 and AVCHD are not supported. • For all Video codecs except MVC, VP8, VP6: <ul style="list-style-type: none"> – Below 1280 x 720: 60 frame max – Above 1280 x 720: 30 frame max • GMC 2 over is not supported. • Supports only BD MVC Spec. 	<ul style="list-style-type: none"> • Supports up to WMA 10 Pro 5.1 channel. • WMA lossless audio is not supported. • QCELP, AMR NB/WB are not supported. • If Vorbis is only in Webm container, supports up to 2 channel.

Troubleshooting

Before you contact us

Before calling Samsung Customer Service Centre, test your product as follows. If the problem persists, contact Samsung Customer Service Centre.

Diagnosis

Check if your product is operating normally by using the product test function.

If the screen remains blank while the power LED blinks even when the product is correctly connected to a PC, perform product testing.

- 1 Power off both the PC and product.
- 2 Disconnect all the cables from the product.
- 3 Power on the product.
- 4 If **No Signal** is displayed, the product is operating normally.

If the screen remains blank, check the PC system, video controller and cable.

Screen Resolution

Not Optimum Mode will briefly be displayed if a mode that exceeds a supported resolution is selected (refer to Supported Resolutions).

Checkpoints

Installation issue (PC mode)

The screen keeps switching on and off.	Check the cable connection between the product and PC, and ensure the connection is secure.
Blank spaces are found on all four sides of the screen when an HDMI or HDMI-DVI cable is connected to the product and PC.	The blank spaces found on the screen have nothing to do with the product.
	Blank spaces on the screen are caused by the PC or graphics card. To resolve the problem, adjust the screen size in the HDMI or DVI settings for the graphics card.
	If the graphics card settings menu does not have an option to adjust the screen size, update the graphics card driver to the latest version. (Please contact the graphics card or computer manufacturer for further details about how to adjust the screen settings.)
PC is shown in Source when a PC is not connected.	PC is always shown in Source irrespective of whether or not a PC is connected.

Screen issue

The power LED is off. The screen will not switch on.	Check the cable connection between the product and PC, and ensure the connection is secure.
No Signal is displayed on the screen.	Check that the product is connected correctly with a cable.
	Check that the device connected to the product is powered on.
Not Optimum Mode is displayed.	This message is displayed when a signal from the graphics card exceeds the product's maximum resolution and frequency.
	Refer to the Standard Signal Mode Table and set the maximum resolution and frequency according to the product specifications.
The images on the screen look distorted.	Check the cable connection to the product.
The screen is not clear. The screen is blurry.	Adjust Coarse and Fine .
	Remove any accessories (video extension cable, etc) and try again.
	Set the resolution and frequency to the recommended level.

The screen appears unstable and shaky.	Check that the resolution and frequency of the PC and graphics card are set within a range compatible with the product. Then, change the screen settings if required by referring to the Additional Information on the product menu and the Standard Signal Mode Table.
There are shadows or ghost images left on the screen.	Check that the resolution and frequency of the PC and graphics card are set within a range compatible with the product. Then, change the screen settings if required by referring to the Additional Information on the product menu and the Standard Signal Mode Table.
The screen is too bright. The screen is too dark.	Adjust Brightness and Contrast .
Screen colour is inconsistent.	Go to Picture and adjust the Colour Space settings.
White does not really look white.	Go to Picture and adjust the White Balance settings.
There is no image on the screen and the power LED blinks every 0.5 to 1 second.	The product is in power saving mode. Press any key on the keyboard or move the mouse to return to the previous screen.
The product will turn off automatically.	Go to System and make sure Sleep Timer is set to Off. If a PC is connected to the product, check the power status of the PC. Make sure the power cable is connected properly to the product and power outlet. If the signal from a connected device is not detected, the product automatically turns off after 10 to 15 minutes.
Picture quality of the product is different from the dealer shop where it was purchased.	Use an HDMI cable to obtain high-definition (HD) picture quality.
The screen display does not look normal.	Encoded video content may cause the display to appear corrupted in scenes featuring fast moving objects such as in a sports event or action video. Low signal level or low picture quality may cause the display to appear corrupted. This does not mean the product is defective. A cell phone within a distance of one-meter radius may cause static on analogue and digital products.
The brightness and colour do not look normal.	Go to Picture and adjust the screen settings such as Picture Mode , Colour , Brightness and Sharpness . Go to System and adjust the Energy Saving settings. Reset the screen settings to the default settings.
Broken lines are displayed on the edges of the screen.	If Picture Size is set to Screen Fit , change the setting to 16:9 .
Lines (red, green or blue) are displayed on the screen.	These lines are displayed when there is a defect in DATA SOURCE DRIVER IC on the monitor. Contact a Samsung Service Centre to resolve the issue.

The display looks unstable and then freezes.	The screen may freeze when a resolution other than the recommended resolution is used or if the signal is not stable. To resolve the issue, change the PC resolution to the recommended resolution.
The screen cannot be displayed in full screen.	A scaled SD (4:3) content file can cause black bars on both sides of an HD channel screen.
	A video with an aspect ratio different from the product can cause black bars at the top and bottom of the screen.
	Change the screen size setting to full screen on the product or source device.

Sound issue

There is no sound.	Check the connection of the audio cable or adjust the volume.
	Check the volume.
The volume is too low.	Adjust the volume.
	If the volume is still low after turning it up to the maximum level, adjust the volume on your PC sound card or software programme.
Video is available but there is no sound.	If an HDMI cable is connected, check the audio output settings on the PC.
	Go to Sound and change Speaker Settings to Internal .
	If a source device is used
	<ul style="list-style-type: none"> • Make sure the audio cable is properly connected to the audio input port on the product. • Check the audio output settings for the source device. (For example, if an HDMI cable is connected to the monitor, the audio setting for the cable box may need to be changed to HDMI.)
	If a DVI-HDMI cable is used, a separate audio cable is required.
	If the product has a headphone port, make sure nothing is connected to it.
Reconnect the power cable to the device and then reboot the device.	
There is static coming from the speakers.	Check the cable connection. Make sure a video cable is not connected to an audio input port.
	Check the signal strength after connecting a cable.
	Low signal level can cause corrupted sound.

There is audible sound when the volume is muted.	<p>When Speaker Settings is set to External, the volume button and mute function are disabled. Adjust the volume for the external speakers.</p> <p>Audio settings for main speakers are separate from the internal speakers on the product. Changing or muting the volume on the product does not affect an external amplifier(decoder).</p>
Sound from the monitor does not change after Sound Mode is changed.	<p>Audio settings for main speakers are separate from the internal speakers on the product. Audio settings on a source device do not affect the internal speaker settings on the product.</p>
There is an echo sound coming from the speakers.	<p>Different decoding speeds between the product speakers and external speakers can cause an echo. In this case, set Speaker Settings to External.</p>

Remote control issue

The remote control does not work.	<p>Make sure that the batteries are correctly in place (+/-).</p> <p>Check if the batteries are flat.</p> <p>Check for power failure.</p> <p>Make sure that the power cord is connected.</p> <p>Check for any special lighting or neon signs switched on in the vicinity.</p>
-----------------------------------	---

Source device issue

A beeping sound is heard when my PC is booting.	If a beeping sound is heard when your PC is booting, have your PC serviced.
---	---

Other issue

The product smells like plastic.	The plastic smell is normal and disappears over time.
The monitor appears tilted.	Remove and then attach the stand again to the product.
Audio or video cuts out intermittently.	<p>Check the cable connection and connect it again if required.</p> <p>Using a very hard or thick cable may corrupt audio and video files. Make sure cables are flexible enough to ensure durability. When mounting the product onto a wall, it is recommended to use right-angle cables.</p>

Small particles are found on the edges of the product.	The particles are part of the product design. The product is not defective.									
The PIP menu is not available.	The menu is enabled or disabled depending on the Source mode.									
When I try to change the PC resolution, a message “The defined resolution is not supported.” appears.	The message “The defined resolution is not supported.” appears if the input source resolution exceeds the maximum resolution of the display. To resolve the issue, change the PC resolution to a resolution supported on the display.									
There is no sound from the speakers in HDMI mode when a DVI-HDMI cable is connected.	DVI cables do not transmit sound data. Make sure to connect the audio cable to the correct input jack to enable audio.									
HDMI Black Level is not functioning properly on an HDMI device with YCbCr output.	This function is available only when a source device, such as a DVD player and STB, is connected to the product via an HDMI (RGB signal) cable.									
There is no sound in HDMI mode.	<p>Displayed picture colours may not look normal. Video or sound may not be available. This can occur if a source device that only supports an older version of the HDMI standard is connected to the product. If these issues occur, connect an audio cable along with the HDMI cable.</p> <p>Some PC graphics cards may not automatically recognize HDMI signals that do not include sound. In this case, manually select a sound input.</p> <table border="1"> <thead> <tr> <th></th> <th>Sound input</th> <th>Screen mode</th> </tr> </thead> <tbody> <tr> <td>PC</td> <td>Auto</td> <td>PC settings</td> </tr> <tr> <td>DVI PC</td> <td>Audio In (Stereo ports)</td> <td>PC settings</td> </tr> </tbody> </table>		Sound input	Screen mode	PC	Auto	PC settings	DVI PC	Audio In (Stereo ports)	PC settings

<p>The IR sensor is not functioning.</p>	<p>Make sure the sensor light turns on when a button is pressed on the remote control.</p> <hr/> <p>If the sensor light does not turn on, turn the power switch off and then on again on the back of the product. (The power LED lights up red when the screen is switched off.)</p> <p>If the sensor light still does not turn on after the power switch is turned off and then on again, an internal jack may be disconnected.</p> <p>Contact your nearest service centre to have the product serviced.</p> <hr/> <p>If the sensor light that is on does not flash red when a button is pressed on the remote control, the IR sensor may be defective.</p> <p>Contact your nearest service centre to have the product serviced.</p> <hr/> <p>This function is available only when a source device, such as a DVD player and STB, is connected to the product via an HDMI (RGB signal) cable.</p>
<p>The proximity sensor is not functioning.</p>	<p>Make sure you are in the proper detection range.</p> <hr/> <p>Make sure the proximity sensor is on.</p> <hr/> <p>Change the detection range.</p> <hr/> <p>Move any obstacles in front of the sensor.</p> <hr/> <p>Disconnect and then reconnect the proximity sensor.</p> <hr/> <p>Wipe the sensor with a soft, clean cloth.</p> <hr/> <p>Make sure you have removed the sensor protection vinyl.</p>
<p>The proximity sensor only detects at a short range.</p>	<p>Change the detection range.</p> <hr/> <p>Make sure you have removed the sensor protection vinyl.</p> <hr/> <p>Wipe the sensor with a soft, clean cloth.</p>
<p>In power saving mode, when the input source is DisplayPort, PC display settings cannot be saved.</p>	<p>Go to System → General and set Max. Power Saving to Off. Alternatively, configure the PC display output settings again. Ensure the set is turned on.</p>
<p>When booting the PC with the input source set to DisplayPort, the BIOS and booting screens do not appear.</p>	<p>Boot the PC when the set is turned on or when the input source is not DisplayPort.</p>

Frequently asked questions

Refer to the user manual for your PC or graphics card for further instructions on adjustment.

Question	Answer
How can I change the frequency?	<p>Set the frequency on your graphics card.</p> <ul style="list-style-type: none"> • Windows 7: Go to Control Panel → Appearance and Personalization → Display → Adjust resolution → Advanced Settings → Monitor and adjust the frequency in Monitor Settings. • Windows 8: Go to Settings → Control Panel → Appearance and Personalization → Display → Adjust resolution → Advanced Settings → Monitor and adjust the frequency in Monitor Settings. • Windows 10: Go to Settings → System → Display → Advanced display settings → Display adapter properties → Monitor, and adjust Screen refresh rate under Monitor settings.
How can I change the resolution?	<ul style="list-style-type: none"> • Windows 7: Go to Control Panel → Appearance and Personalization → Display → Adjust Resolution and adjust the resolution. • Windows 8: Go to Settings → Control Panel → Appearance and Personalization → Display → Adjust Resolution and adjust the resolution. • Windows 10: Go to Settings → System → Display → Advanced display settings, and adjust the resolution.
How do I set power saving mode?	<ul style="list-style-type: none"> • Windows 7: Set power saving mode in Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings or BIOS SETUP on the PC. • Windows 8: Set power saving mode in Settings → Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings or BIOS SETUP on the PC. • Windows 10: Set power saving mode in Settings → Personalization → Lock screen → Screen timeout settings → Power & sleep or BIOS SETUP on the PC.

Appendix

Specifications

General

Model Name		ML32E	ML55E / ML55E-R
Panel	Size	32 CLASS (31.5 inches / 80.1 cm)	55 CLASS (54.6 inches / 138.7 cm)
	Display area	698.4 mm (H) x 392.85 mm (V) (27.5 inches (H) x 15.5 inches (V))	1209.6 mm (H) x 680.4 mm (V) (47.7 inches (H) x 26.8 inches (V))
Dimensions (W x H x D)		740.2 x 434.6 x 57.4 mm (29.1 x 17.1 x 2.3 inches)	1249.2 x 720.0 x 57.4 mm (49.2 x 28.3 x 2.3 inches)
Weight (without stand)		7.9 kg (17.4 lbs)	25.5 kg (56.2 lbs)
Audio Output		10 W	10 W + 10 W
Power Supply		AC 100 to 240 VAC (+/- 10%), 60 / 50 Hz ± 3 Hz Refer to the label at the back of the product as the standard voltage can vary in different countries.	
Environmental considerations	Operating	Temperature : 0 °C – 40 °C (32 °F – 104 °F), With PIM : 10 °C – 40 °C (50 °F – 104 °F) Humidity : 10% – 80%, non-condensing	
	Storage	Temperature : -20 °C – 45 °C (-4 °F – 113 °F) Humidity : 5% – 95%, non-condensing	

- **Plug-and-Play**

This monitor can be installed and used with any Plug-and-Play compatible systems. Two-way data exchange between the monitor and PC system optimizes the monitor settings. Monitor installation takes place automatically. However, you can customize the installation settings if desired.

- Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may appear brighter or darker on the panel. This does not affect product performance.
- This device is a Class A digital apparatus.

Recommendation - EU only

- Hereby, Samsung Electronics, declares that this Monitor is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
- The official Declaration of Conformity may be found at <http://www.samsung.com/displaysolutions>, go to Support > Search Product Support and enter the model name.
- This equipment may only be used indoors.
- This equipment may be operated in all EU countries.

Recommendation - USA only

- Dispose unwanted electronics through an approved recycler.
- To find the nearest recycling location, go to our website: www.samsung.com/recyclingdirect or call, (877) 278 - 0799

PowerSaver

The power saving function of this product reduces power consumption by switching off the screen and changing the colour of the power LED if the product is not used for a specified period of time. The power is not turned off in power saving mode. To switch the screen back on, press any key on the keyboard or move the mouse. Power saving mode only functions when the product is connected to a PC with a power saving function.

- The displayed power consumption level can vary in different operating conditions or when settings are changed.
- SOG(Sync On Green) is not supported.
- To reduce the power consumption to 0, turn off the switch at the back or disconnect the power cord. Disconnect the power cable if you will not be using the product for an extended period of time (during vacation, etc.).

Preset timing modes

This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your product.

Check the frequency when you exchange a CDT product (connected to a PC) for an LCD product. If the LCD product does not support 85Hz, change the vertical frequency to 60Hz using the CDT product before you exchange it with the LCD product.

Model Name		ML32E / ML55E / ML55E-R
Synchronization	Horizontal frequency	30 - 80 kHz
	Vertical frequency	60 - 75 Hz
Resolution	Optimum resolution	1920 x 1080 @ 60 Hz
	Maximum resolution	1920 x 1080 @ 60 Hz

- **Horizontal frequency**

The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

- **Vertical frequency**

The product displays a single image multiple times per second (like a fluorescent light) to display what the viewer sees. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

The screen will automatically be adjusted if a signal that belongs to the following standard signal modes is transmitted from your PC. If the signal transmitted from the PC does not belong to the standard signal modes, the screen may be blank with the power LED on. In such a case, change the settings according to the following table by referring to the graphics card user manual.

Resolution	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (H/V)
IBM, 720 x 400	31.469	70.087	28.322	-/+
MAC, 640 x 480	35.000	66.667	30.240	-/-
MAC, 832 x 624	49.726	74.551	57.284	-/-
MAC, 1152 x 870	68.681	75.062	100.000	-/-
VESA, 640 x 480	31.469	59.940	25.175	-/-
VESA, 640 x 480	37.861	72.809	31.500	-/-
VESA, 640 x 480	37.500	75.000	31.500	-/-
VESA, 800 x 600	35.156	56.250	36.000	+/+
VESA, 800 x 600	37.879	60.317	40.000	+/+
VESA, 800 x 600	48.077	72.188	50.000	+/+
VESA, 800 x 600	46.875	75.000	49.500	+/+
VESA, 1024 x 768	48.363	60.004	65.000	-/-
VESA, 1024 x 768	56.476	70.069	75.000	-/-
VESA, 1024 x 768	60.023	75.029	78.750	+/+
VESA, 1152 x 864	67.500	75.000	108.000	+/+

Resolution	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (H/V)
VESA, 1280 x 720	45.000	60.000	74.250	+/+
VESA, 1280 x 800	49.702	59.810	83.500	-/+
VESA, 1280 x 1024	63.981	60.020	108.000	+/+
VESA, 1280 x 1024	79.976	75.025	135.000	+/+
VESA, 1366 x 768	47.712	59.790	85.500	+/+
VESA, 1440 x 900	55.935	59.887	106.500	-/+
VESA, 1600 x 900	60.000	60.000	108.000	+/+
VESA, 1680 x 1050	65.290	59.954	146.250	-/+
VESA, 1920 x 1080	67.500	60.000	148.500	+/+

Responsibility for the pay service (Cost to Customers)

When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.

- If a service technician gives instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If customer requests instructions on how to use because of another company's product.
- If customer requests instructions on how to use the network or another company's programme.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through homeshopping or online.

A product damage caused by customer's fault

Product damage caused by customer's mishandling or wrong repair

If a product damage is caused by;

- External impact or drop.
- Use of supplies or separately sold product unspecified by Samsung.
- Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
- Remodeling or repairing the product by customer.
- Using it with incorrect voltage or non-authorized electrical connections.
- Not following the "cautions" in User Manual.

Others

- If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
- If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)

If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.

Optimum picture quality and afterimage burn-in prevention

Optimum picture quality

- Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may be brighter or darker on the panel. This does not affect product performance.
 - The number of sub-pixels by panel type: 6,220,800
- Run **Auto Adjustment** to improve the picture quality. If noise is still found even after auto adjustment, adjust **Coarse** or **Fine**.
- Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.
 - Activate power saving mode or a dynamic screen saver if you will not be using the product for an extended period of time.

Prevention of afterimage burn-in

What is afterimage burn-in?

Afterimage burn-in should not occur when the LCD panel is operating normally. Normal operation refers to a continuously changing video pattern. If the LCD panel displays a fixed pattern for an extended period of time (more than 12 hours), a slight voltage difference may occur between the electrodes in pixels that control the liquid crystals.

Such a voltage difference between electrodes increases with time and makes the liquid crystals thinner. When this occurs, a previous image can remain on the screen when the pattern changes. To prevent this, the accumulated voltage difference should be reduced.

Afterimage burn-in should not occur when an LCD panel is operating in proper conditions.

Preventing afterimage burn-in

The best way to protect the product from afterimage burn-in is switching the power off or setting the PC or system to run a screen saver when not in use. Also, Warranty service may be limited depending on instruction guide.

- Powering Off, Screen Saver and Power Saving Mode
 - Power off the product for 2 hours after using it for 12 hours.
 - Go to Display Properties > Power Supply on your PC and set the product to power off as required.
 - Using a screen saver is recommended.
It is best to use a single-colour or moving-image screen saver.
- Regular colour change
 - Use 2 colours.
Switch between 2 colours every 30 minutes as shown above.

- Avoid combinations of a text colour and background colour of contrasting brightness. (Brightness: refers to the lightness or darkness of a colour which varies depending on the amount of light emitted.)

- Avoid using grey as it may contribute to afterimage burn-in.
- Avoid using colours of contrasting brightness (black and white; grey).

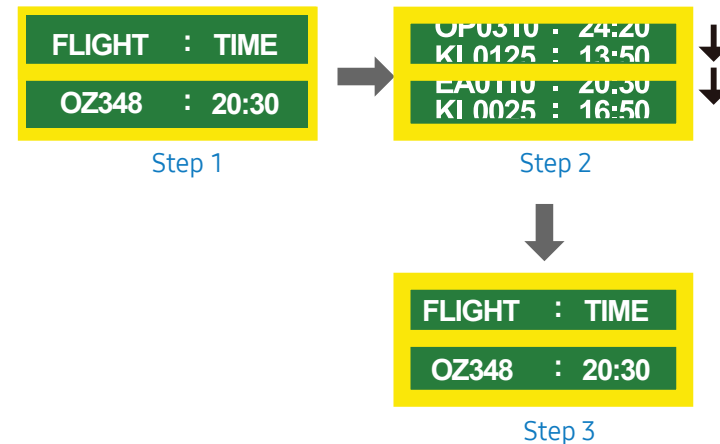

- Regular Text colour Change

- Use bright colours of similar brightness.
Interval: Change text colour and background colour every 30 minutes.

- Move and change text every 30 minutes as shown below.

- Regularly display a moving image along with a logo.
Interval: Display a moving image along with a logo for 60 seconds after using for 4 hours.
