Galaxy Watch4 Classic

Your style, your health

Your style. Your health. Look good and feel great with your smart new companion, Samsung Galaxy Watch4 Classic. Make a stylish statement with an iconic silhouette and stainless-steel casing, while your watch keeps you in tune with your health and pushes you to go further. Make the most of every run with advanced coaching and oxygen-level monitoring[1] that help you exercise smarter while increasing endurance. Leave your phone behind while staying connected. You can call, text and stream music all from your wrist with LTE connectivity. Galaxy Watch4 Classic is health, evolved.

LTE connectivity

In a no-Wi-Fi zone? No problem. With LTE, you're always connected on your Galaxy Watch4 Classic.[2] Call, text, stream music, and receive notifications just like you would with Wi-Fi.

Advanced sleep/continuous SpO₂

Wake up feeling refreshed and recharged every day with advanced sleep tracking. When you go to bed, the sleep tracker on your Galaxy Watch4 Classic starts monitoring your sleep and SpO_2 levels continuously.[3] This info is combined with snoring assessments captured on your smartphone[4] to help you figure out how to improve your overall sleep quality.

Extension of your phone

Galaxy Watch4 Classic works as an extension of your phone so you can do more while on the go. Talk, text, stream music and more just by tapping the watch on your wrist.[5]

Luxurious design

Show off your style with a luxurious watch design that's great for any occasion. Galaxy Watch4 Classic offers a wide range of stylish watch faces so realistic they hardly look digital. You'll always be perfectly dressed for any occasion, from a formal evening with coworkers to a casual lunch with friends. Mix up your look even more by choosing from a collection of interchangeable bands for an on-point look that's totally you.[6]

SAMSUNG

[1]Accurate VO₂ max reading requires running outdoors for at least 20 minutes with GPS on. Consult user manual before use. VO₂ max software functions are not intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment or prevention of disease. [2]4G LTE stand-alone voice calling and stand-alone text messaging require initial pairing with an eligible Android 6.0 or later smartphone device and separate qualifying wireless plan. Your carrier may not support stand-alone voice calling, or support may be available only in certain areas. Please check with your carrier for more information. Stand-alone functionality limited if paired phone is not powered on or connected to a wireless network. [3]The SpO₂ measurement software is not intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment or prevention of disease. [4]The snoring measurement requires smartphone with Android 6.0 or later, 1.5GB of RAM, phone within 2 feet of user, with snore detection enabled through Samsung Health app version 6.18 or higher. [5]Compatible with select Bluetooth-capable smartphones running Android 6.0 or higher and RAM above 1.5GB. Galaxy Watch4 Classic supported features may vary by carrier and compatible device. For a list of compatible smartphones and features, please visit samsung.com/global/galaxy/galaxy-watch/devicecompatibility. For best results, connect with compatible Samsung Galaxy smartphones. [6]Select interchangeable watch bands sold separately.
