Neomounts®

We are committed to making product choices that are sustainable and rely on the recyclability of our products. Investing in a circular economy where sustainability is at the heart of everything we do. A sustainable approach is essential in

Environmental footprint

addressing global climate change.

Greenhouse gasses emitted into the environment during production of a product contribute directly to our planet's global warming.

Using LCA software¹ we are able to calculate² the (potential) environmental footprint, measured in kilograms CO₂-equivalent. This enables us to evaluate a product's footprint and support the design of sustainable products.

By recycling our products the impact on the environment can be reduced as the recycled material replace the need to produce virgin materials.

Neomounts

Steel Aluminium PE 90,4% 8,4% 1.2%

Emitted carbon dioxide

To illustrate the effect of a kilogram carbon dioxide, we converted it to kilometres driven by a car.

Without recycling

12 kg CO₂ 36 km* With recycling

7,3 kg CO₂ 22 km*

FPMA-D800							
	Steel	Aluminium	PE				Total
Material weight (g)	2301,2	214,5	30,2				2545,9
Kilograms CO₂-equivalent							
Without recycling	8,59	3,29	0,12				12,01
Recycling reduction %							39%
With recycling	5,24	1,94	0,12				7,30
