Part No.: 425506

EAN-13: 0766623425506 | UPC: 766623425506

Extra-extra-large LED Gaming Mousepad – Space for the light to carry you

If you already have a great gaming mouse, don't lose precision by using it on a standard desktop. Make it a force to reckon with on an evenly matched foundation: the Manhattan XXL RGB LED Gaming Mousepad. The textured micro-weave cloth surface of this Gaming Mousepad optimizes optical and laser mouse sensors for pixel-precise accuracy and total tracking responsiveness. Its huge area of 800 x 350 mm (32 x 14 in.) covers your entire desk and offers enough space for both keyboard and mouse. This size is perfect for those who use a lower DPI or like to have more mouse-mat area to maneuver.

Designed with the gamer in mind

This LED Gaming Mouse Pad also offers more physical advantages than precise tracking: A liquid-resistant coating protects against spills from coffee, energy drinks and other drinks you enjoy during a game. The rubberized, non-slip backing keeps the pad firmly in place, even in hectic situations.

Full immersion with your preferred ambient light

For just the right gaming atmosphere, especially in dark rooms, you will love the configurable RGB LED edge. Choose between seven different colors and four different modes for a vivid illumination experience based on your mood.

Features:

- Huge 800 x 350 mm (32 x 14 in.) space for both keyboard and mouse
- Micro-textured surface for ultra-high precision with optical and laser mice
- Water-resistant coating to protect against spills from coffee, energy drinks and more
- Rubberized, non-slip back to keep the mouse mat firmly in place
- Multicolored RGB LED light edge with switchable static, pulsating and dynamic modes for an immersive gaming atmosphere
- Braided Micro-USB to USB-A power cable included
- Three-year warranty
