1. Click “WIDGETS”.

2. Long-press a widget and drag it to desktop.

3. If you want to remove an icon, long-press the widget and drag it onto “×Remove” at the top of the screen and drop it until it turns light gray.

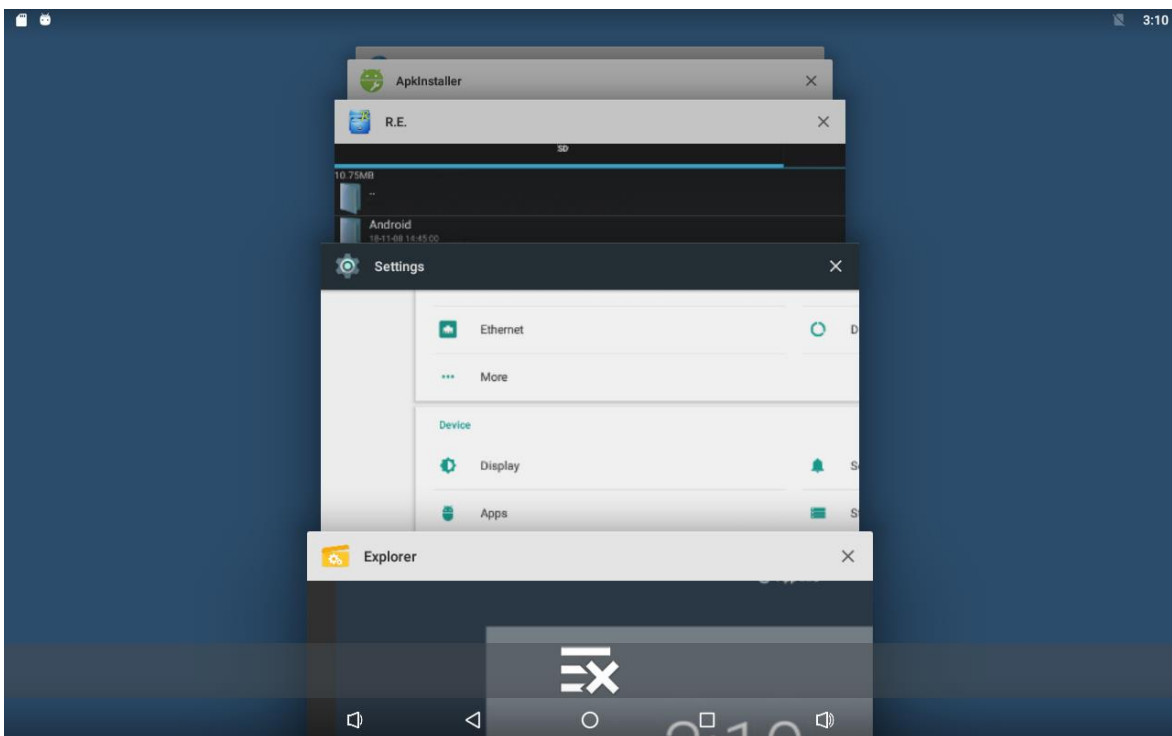

System Bar

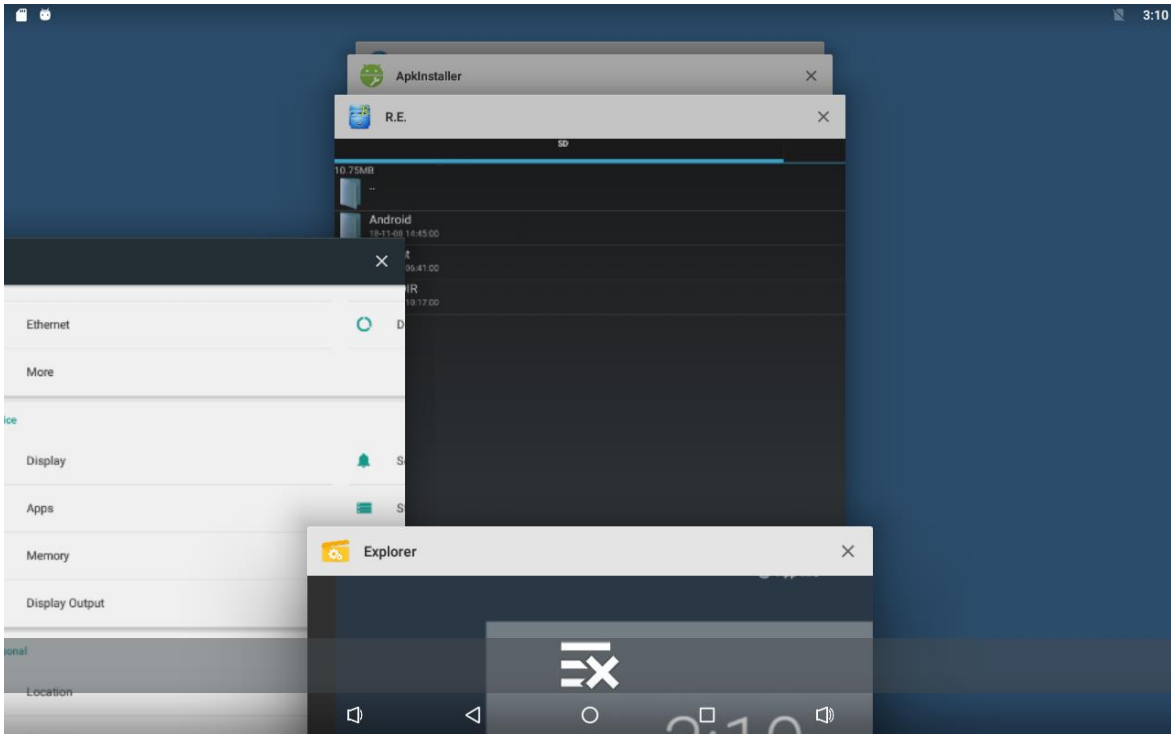

Navigation Buttons

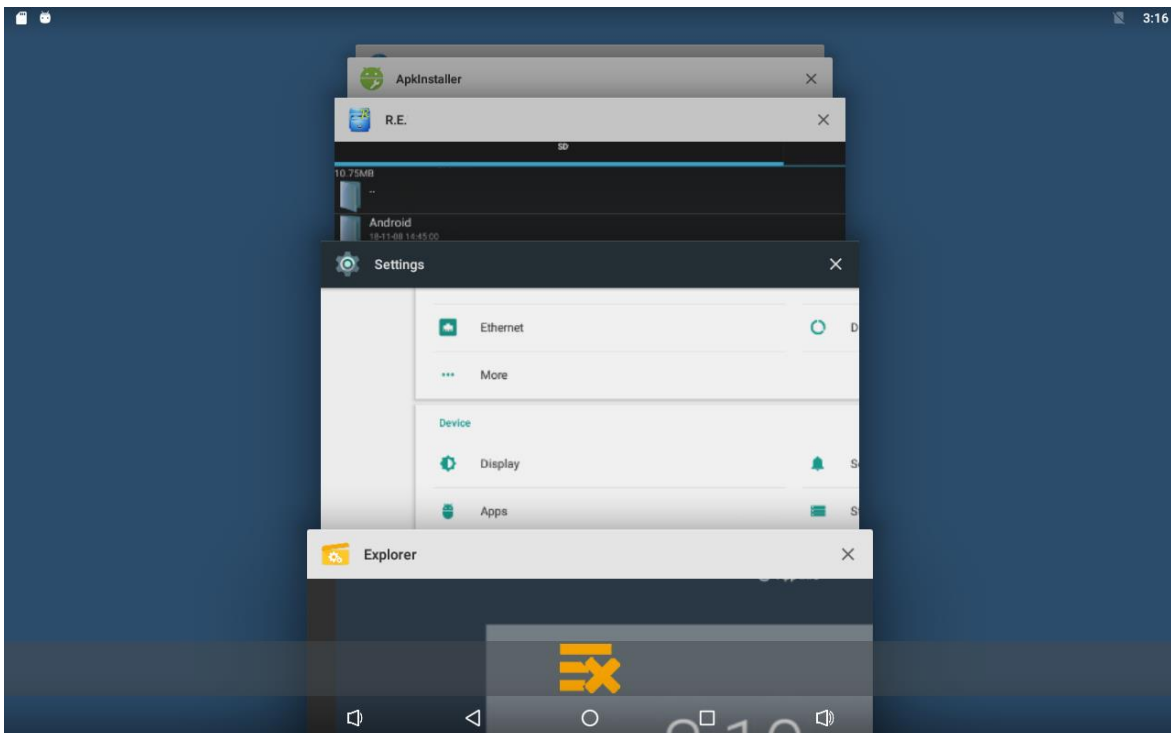

- 1. Volume-:** Decrease the system volume.
- 2. Back:** Return to the previous page.
- 3. Home:** Return to the home screen.
- 4. Recents:** Switch between recently used apps.

To delete an application from the list, you can delete the application by clicking on the "X" icon in the upper right corner or Left and right removal.

Click on the middle of the three to delete the X Icon.

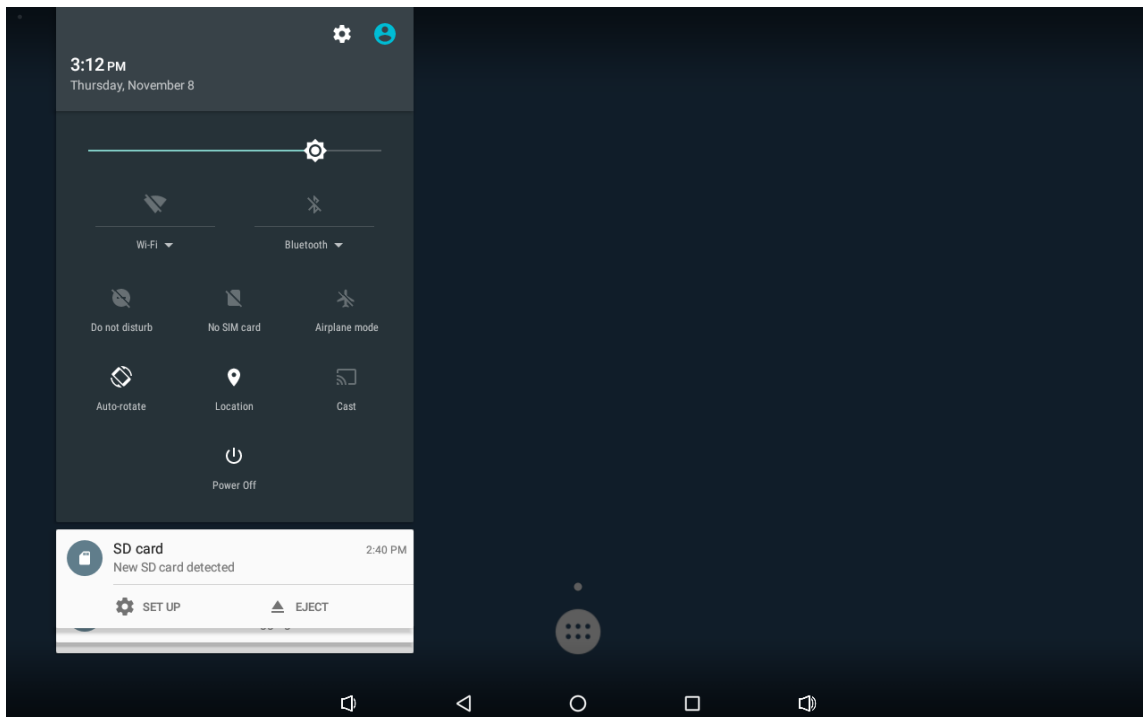

5. Volume+: Increase the system volume.

Status Notifications

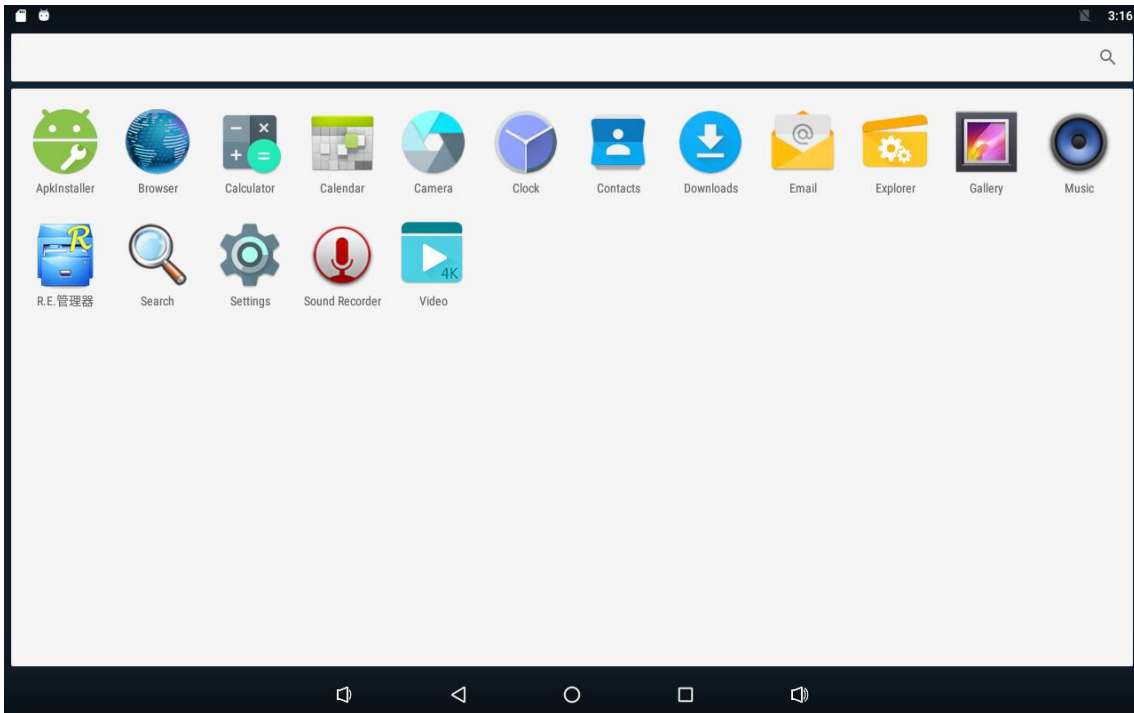

Status bar at top of the screen displays system status, such as time, Wi-Fi, and USB connection etc.

Pull down the upper left corner or the upper right corner to open the state window and shortcut windows, including brightness adjustment, Wi-Fi, automatic rotation, Bluetooth, projection, aircraft mode and position switch, and system settings entry

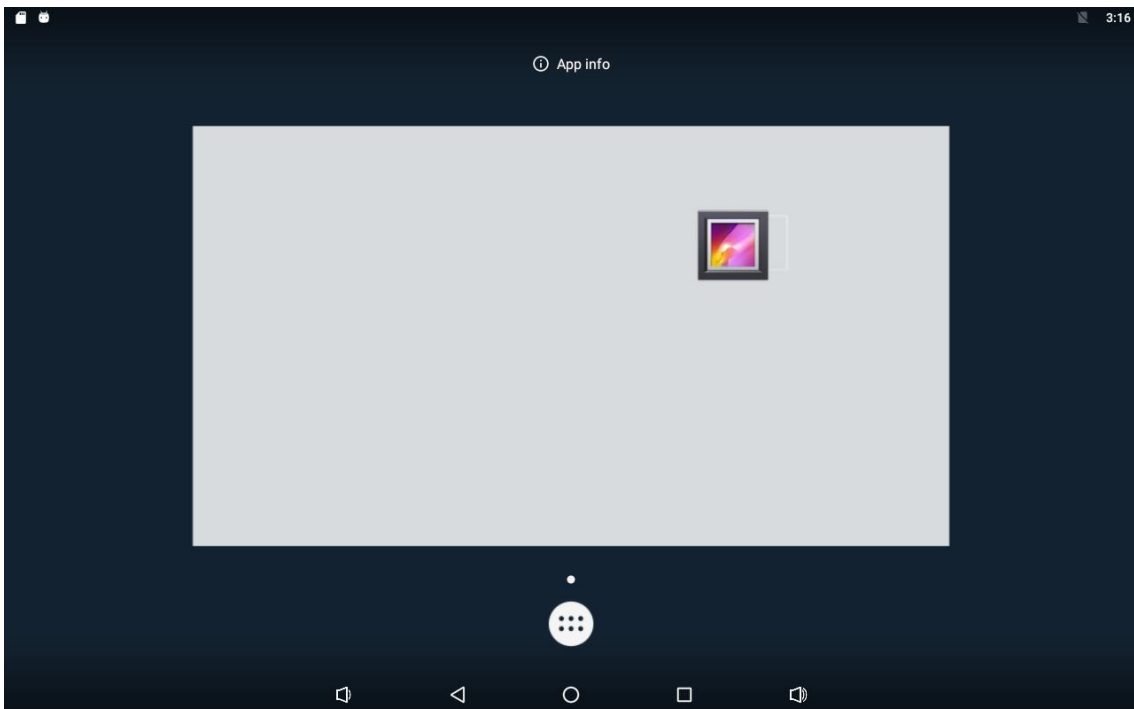

Applications

Click  at the bottom of home screen to enter the applications page.

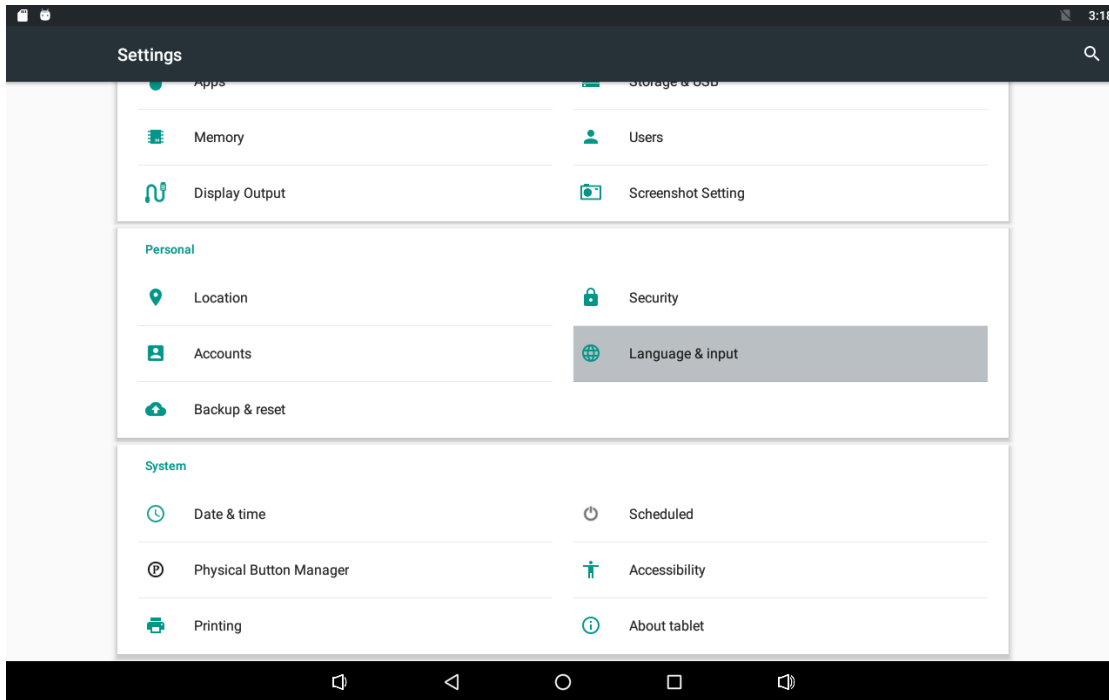

The installed applications will be shown here and you can open an app by clicking its icon.

To find an app easily, you can create a shortcut by long-pressing of the icon and drag it to the home screen.

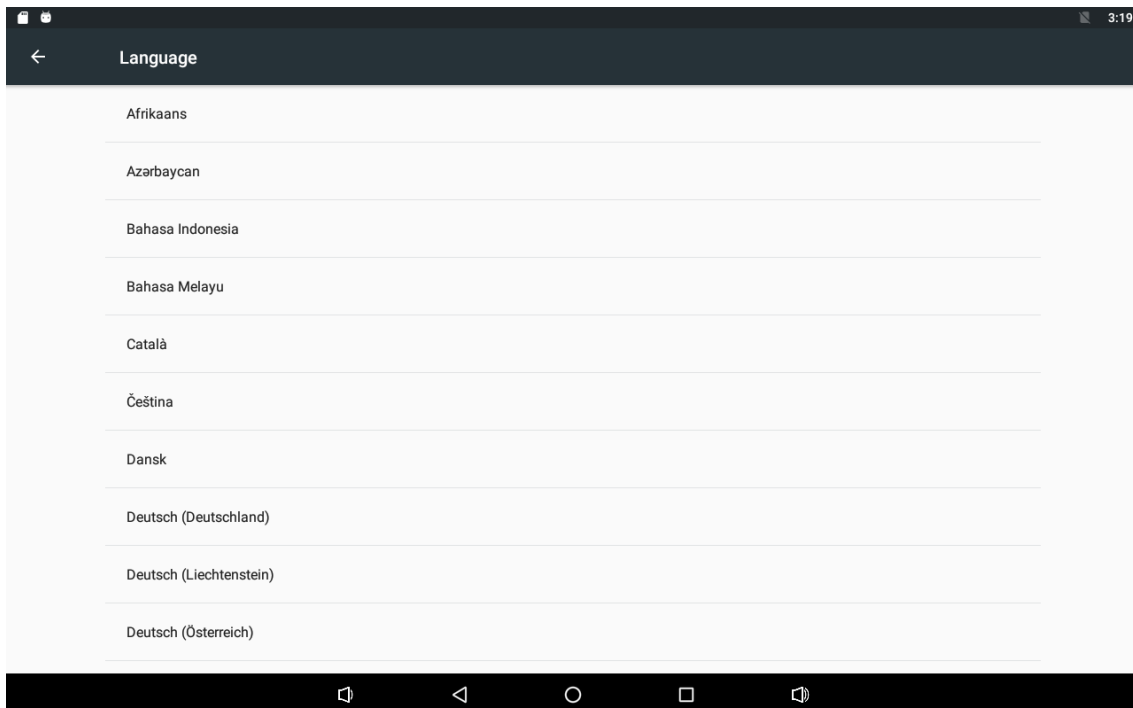

Language

In the App list, click “**Settings**”  to open the system setting app, and select the option “**Language & input**”.

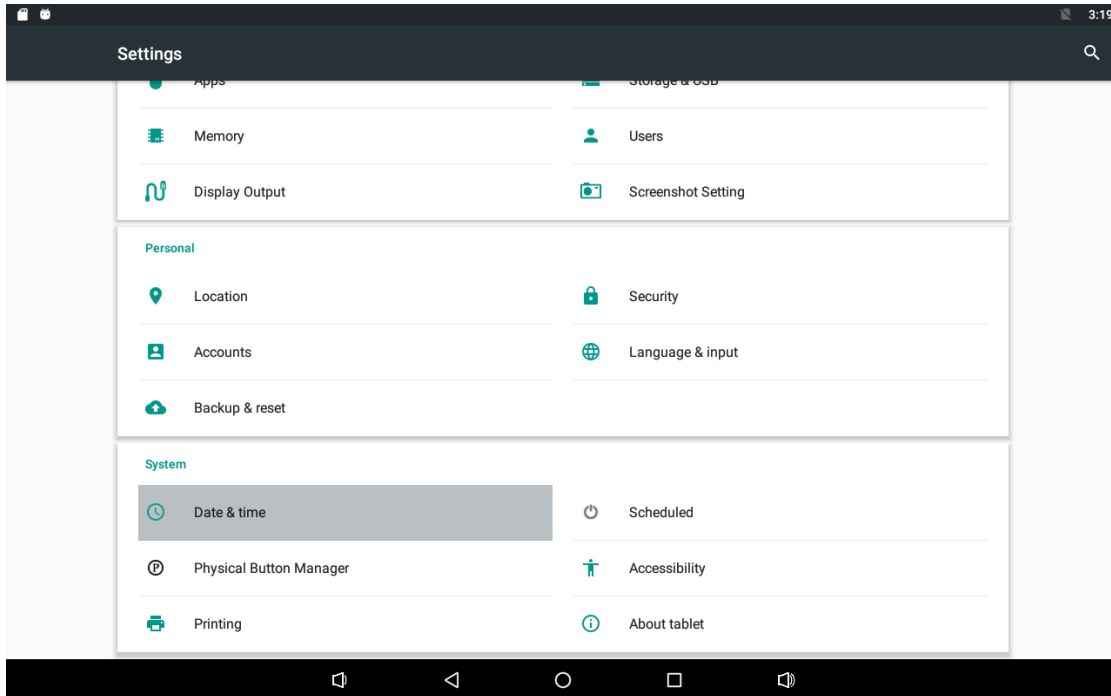

Click the first option “**Language**” under “**Language & input**”, and then you can change the system language according to your preference.

Date & Time

In the App list, click “**Settings**”  to open the system setting app, and select the option “**Date & time**”.

If you enabled the option “**Automatic date & time**” under “**Date & time**”, system date and time will be synchronized automatically with network time when you connected a Wi-Fi network.

If you want to set the time manually, you need to disable “**Automatic date & time**” and “**Automatic time zone**”.

In this option, you can also set time zone, time notation and date format.

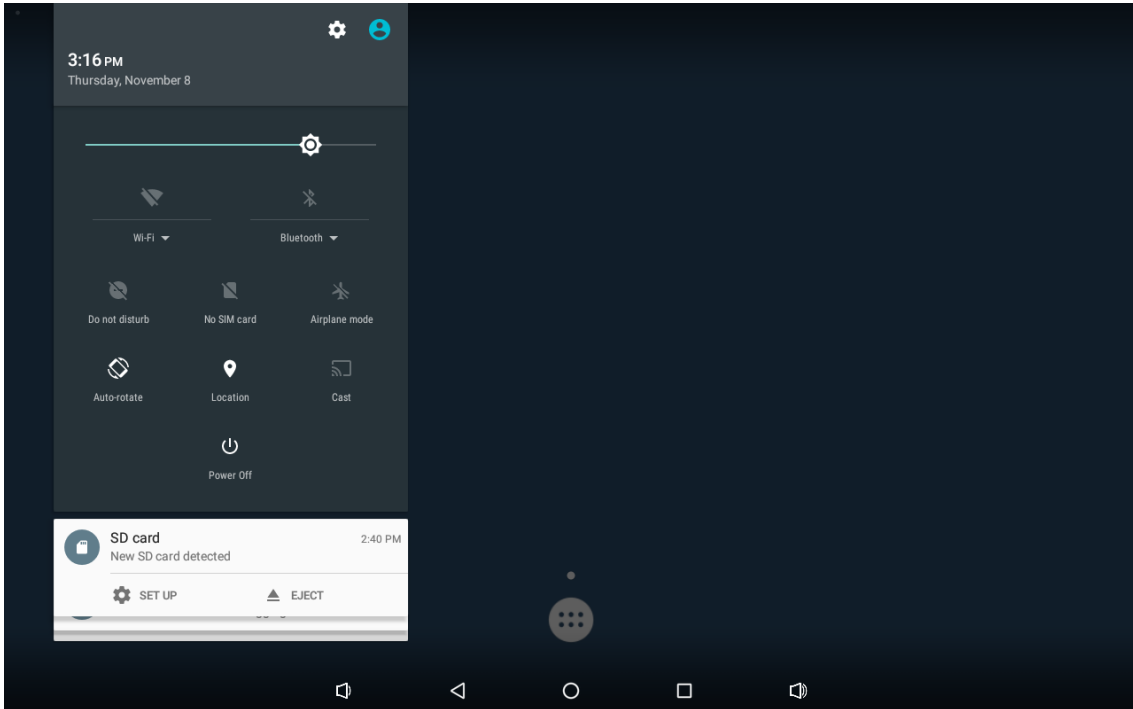

Volume

On the system bar, click the **Volume-** icon  to decrease the system volume, and click the **Volume+** icon  to increase the system volume.

Or you can press the function keys (#5 in [Product Instruction](#)) on the top of the product to adjust the volume.

Brightness

Pull down the screen and open the shortcut window, then click "brightness".

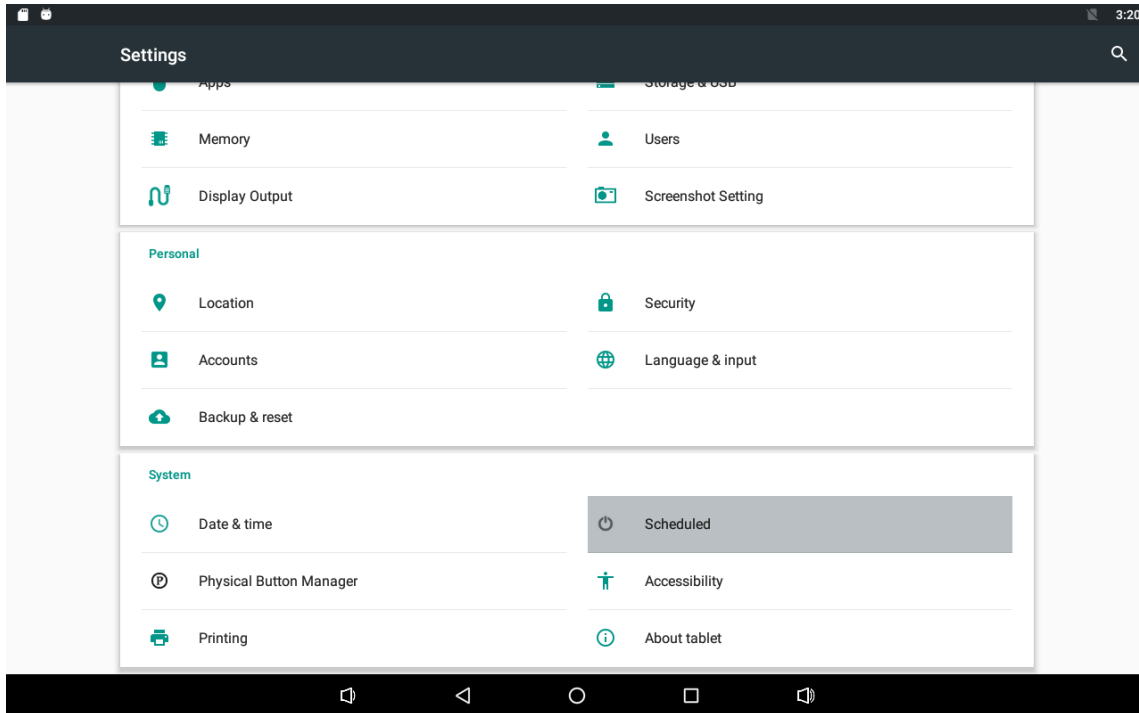

Left and right sliding brightness bar to adjust brightness.

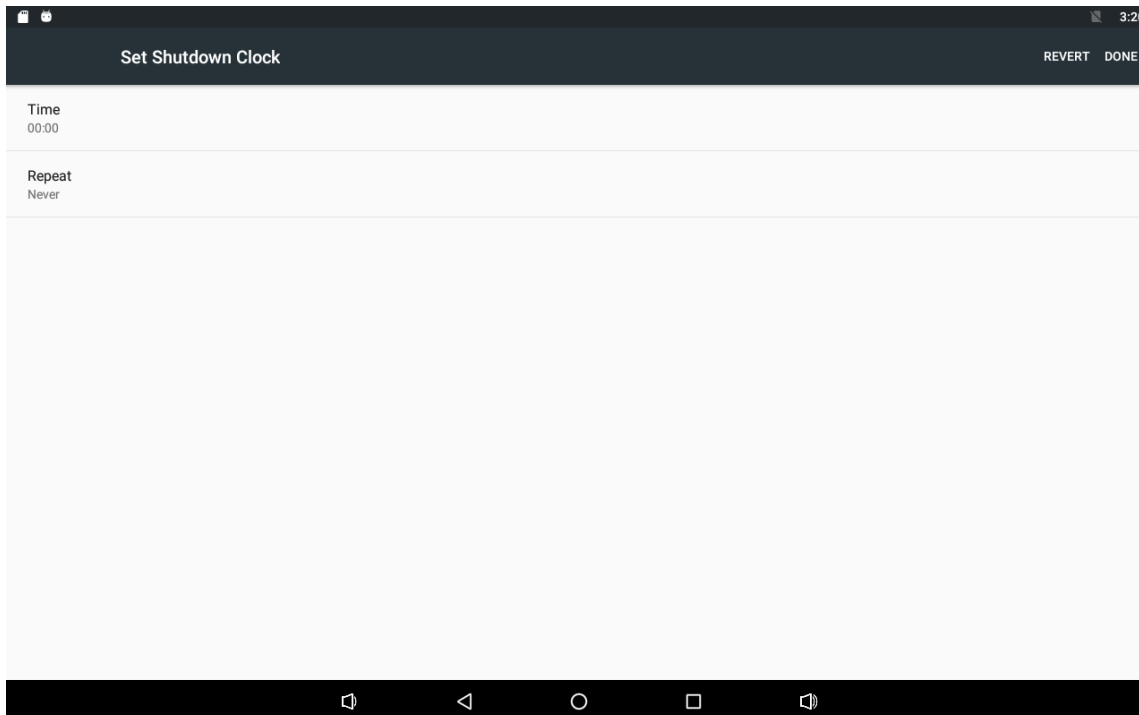

Scheduled

This function is used to power the device on and off automatically at the set time.

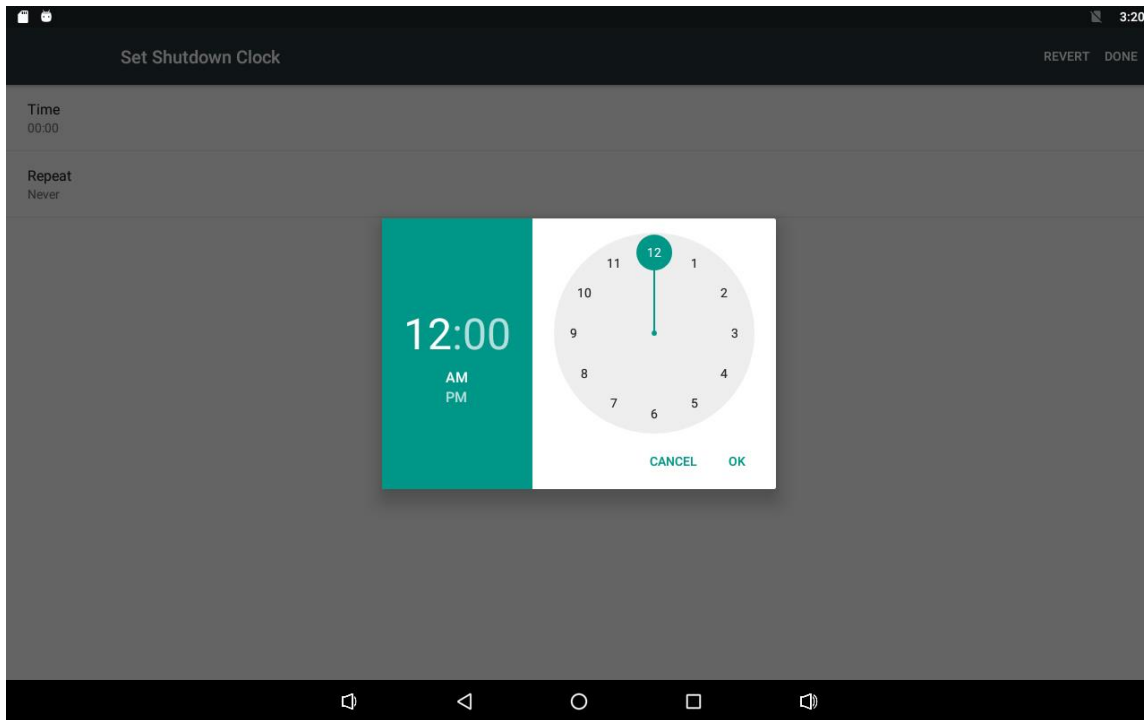

In the App list, click “**Settings**”  to open the system setting app, and select the option “**Scheduled**”.

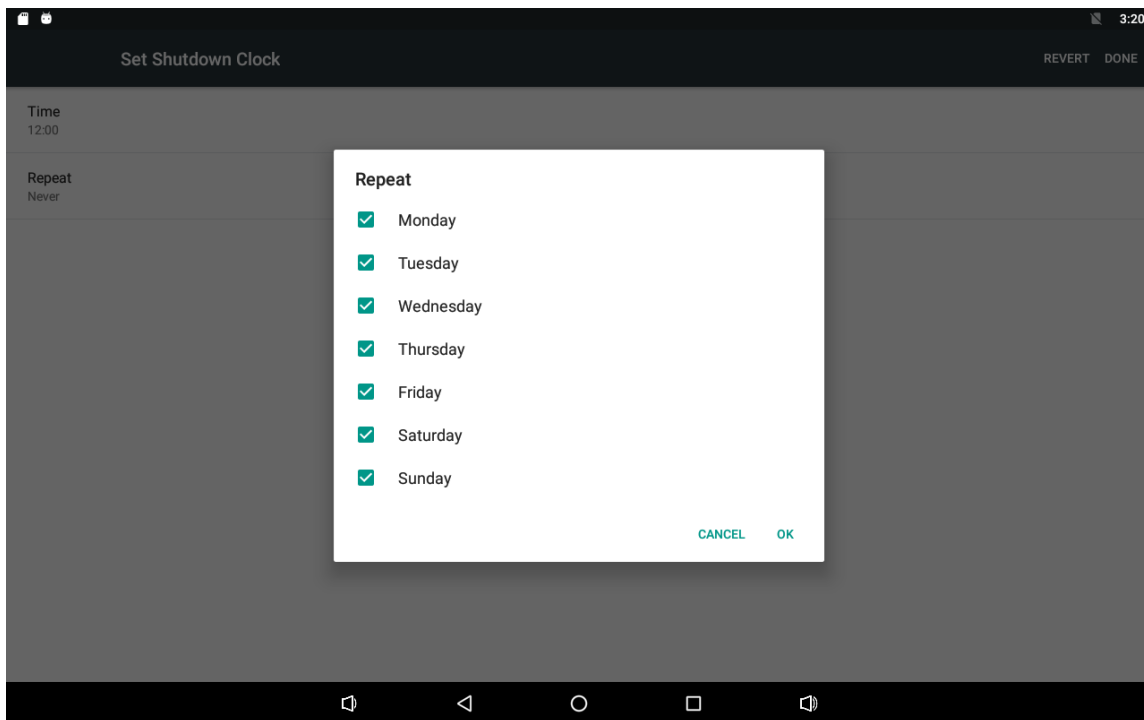

Click the single option “**Set Scheduled Shutdown Clocks**”.

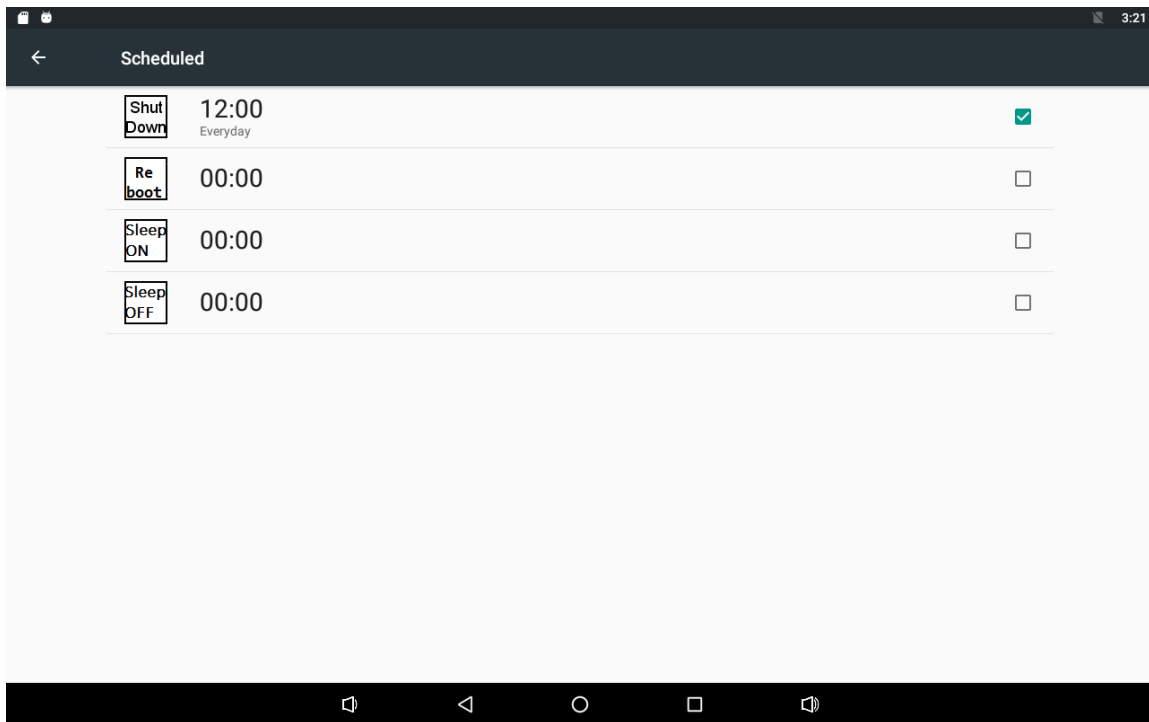

Click the option “**Time**” to set the power off time of this device.

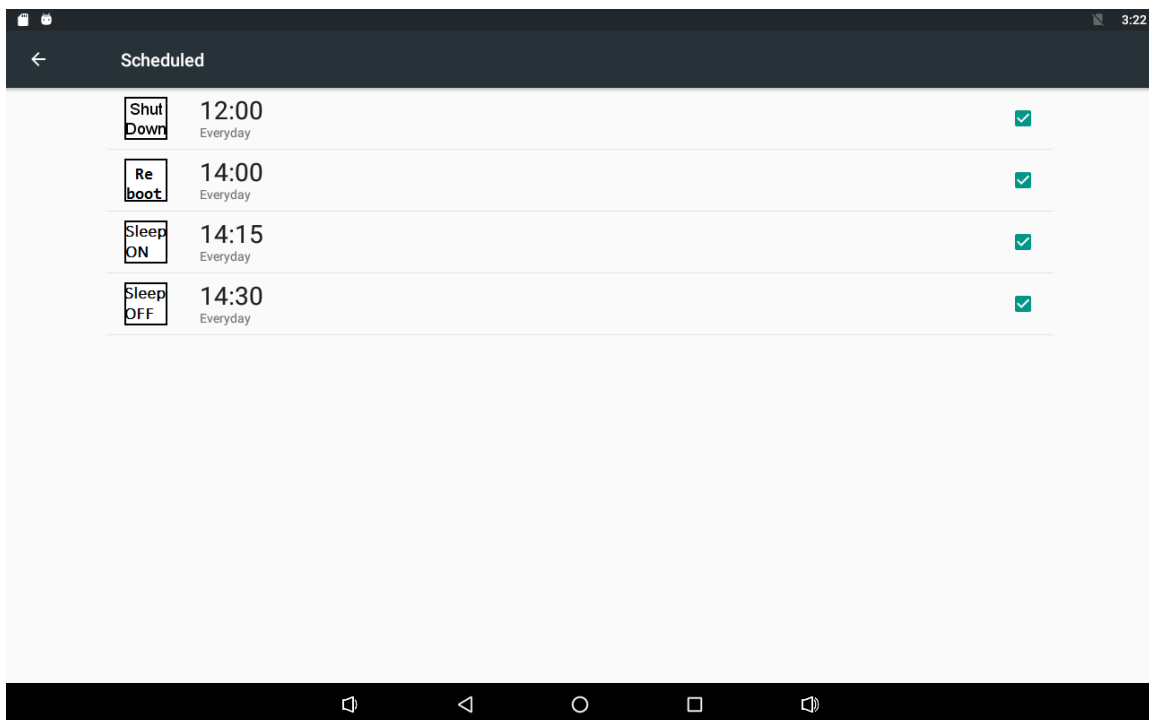

Click the option “**Repeat**” to select the days which will power off this device at the set time.

After setting, click **“Done”** at the upper-right corner of the screen to save them.

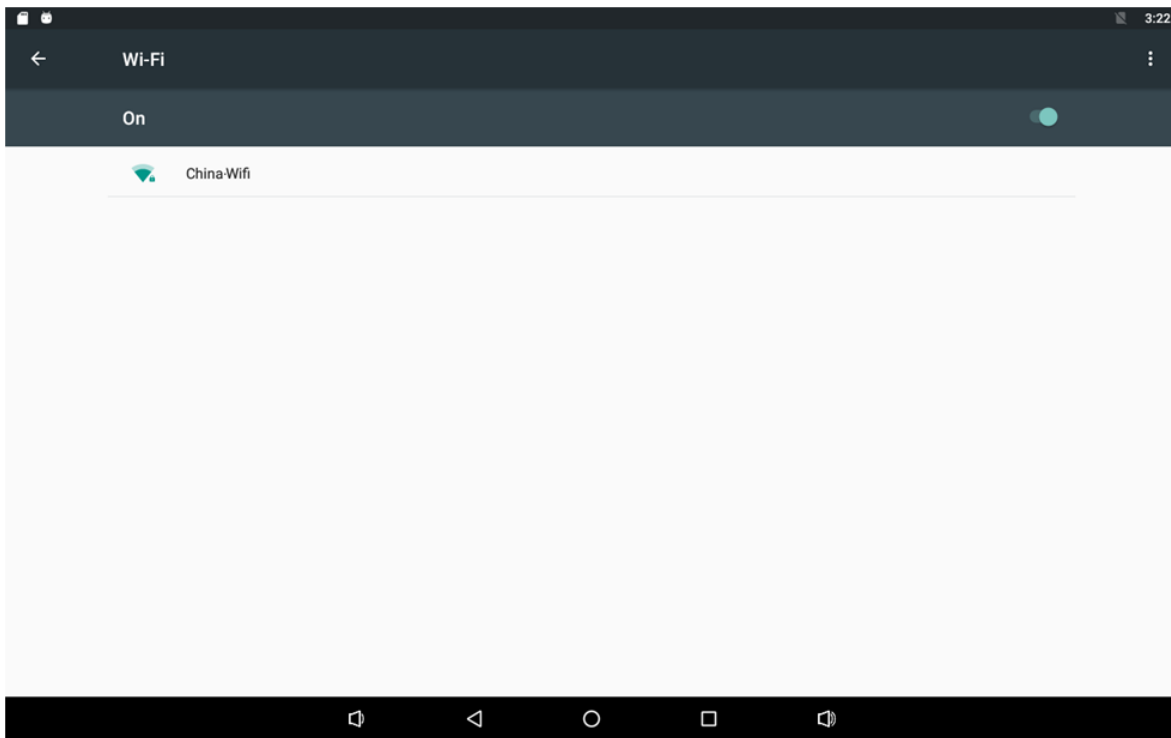

Follow the above steps to set the "Reboot", "Sleep ON" and "Sleep OFF" times.

The above operation will be performed at a specified time; (Sleep off time is greater than Sleep on time)

Wi-Fi

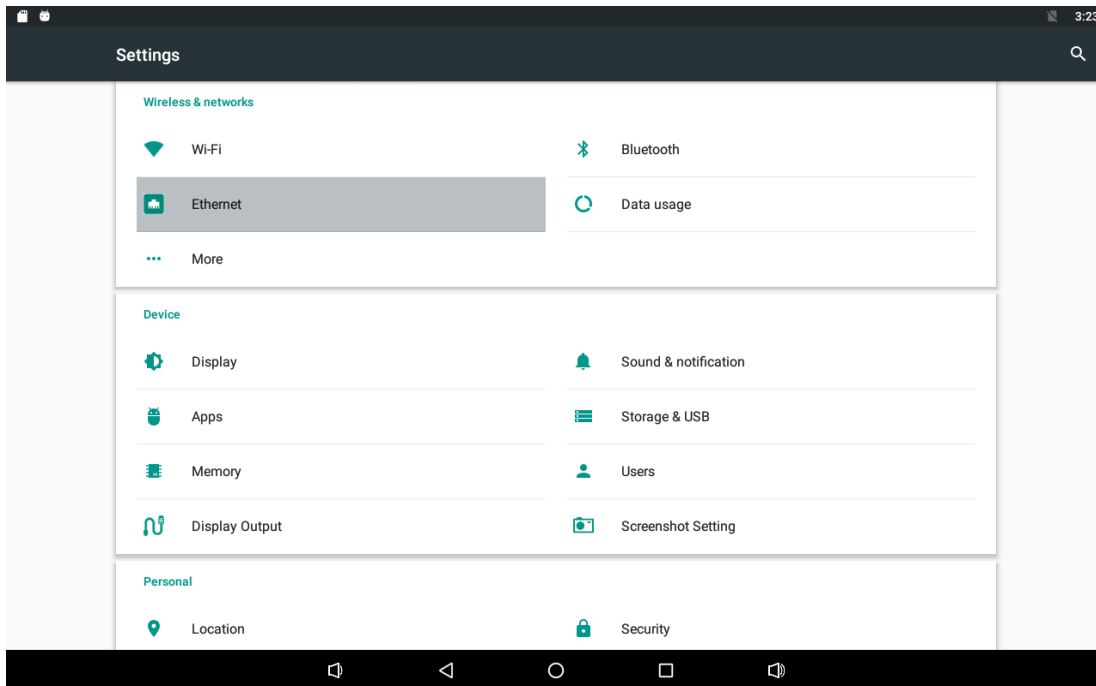

In the App list, click “**Settings**”  to open the system setting app, and select the option “**Wi-Fi**”.

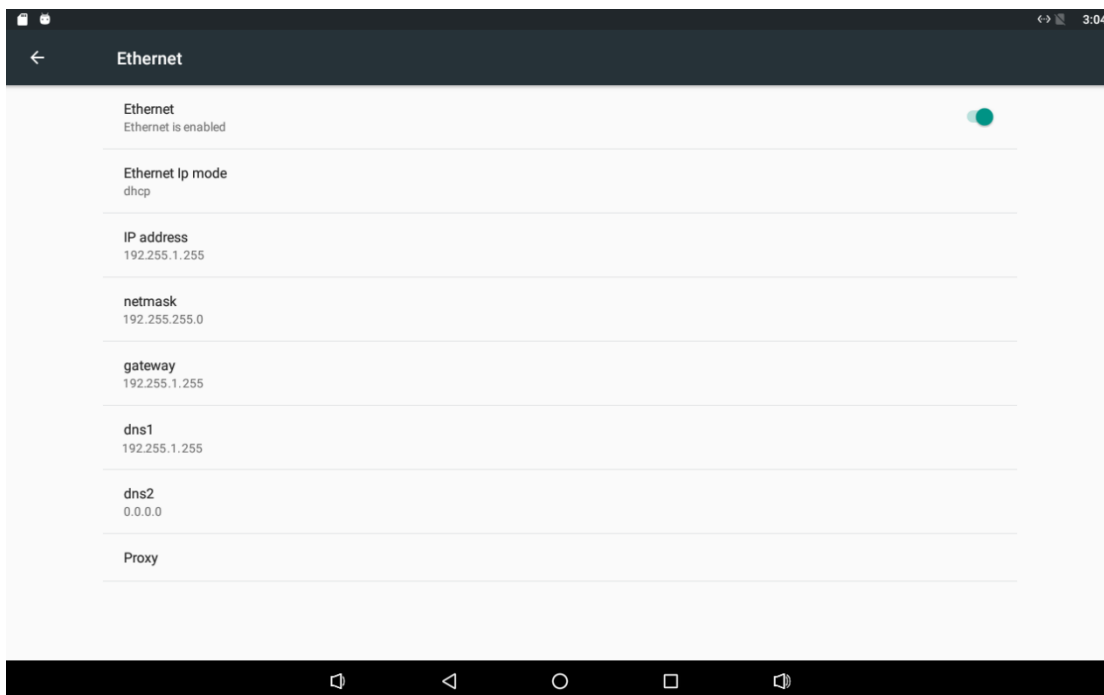

Switch the Wi-Fi button to **ON**. The product will scan available wireless networks automatically. Select a network under Wi-Fi networks and input the password to connect.

Ethernet

In the App list, click “**Settings**”  to open the system setting app, select “**Ethernet**” at the left side.

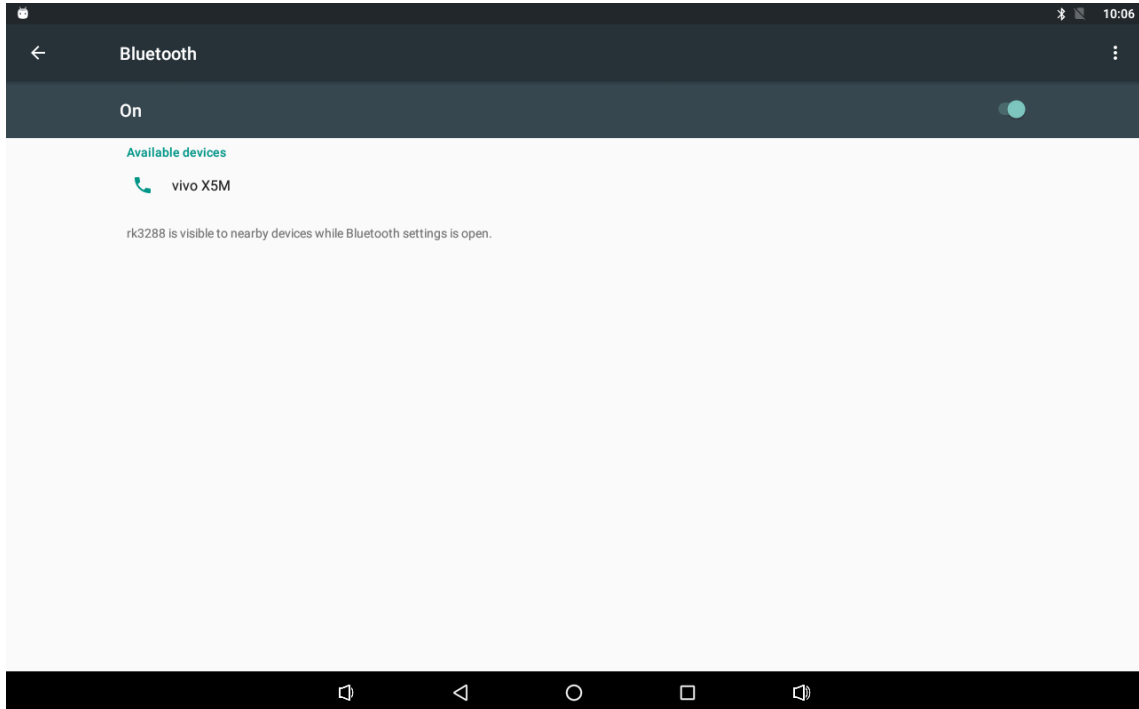

Check “Use Ethernet” and plug the Internet cable into the Ethernet port (**#13 in Product Instruction**). If Wi-Fi is on, please turn off Wi-Fi to allow Ethernet working.

If you are Static IP user, please set the configurations manually.

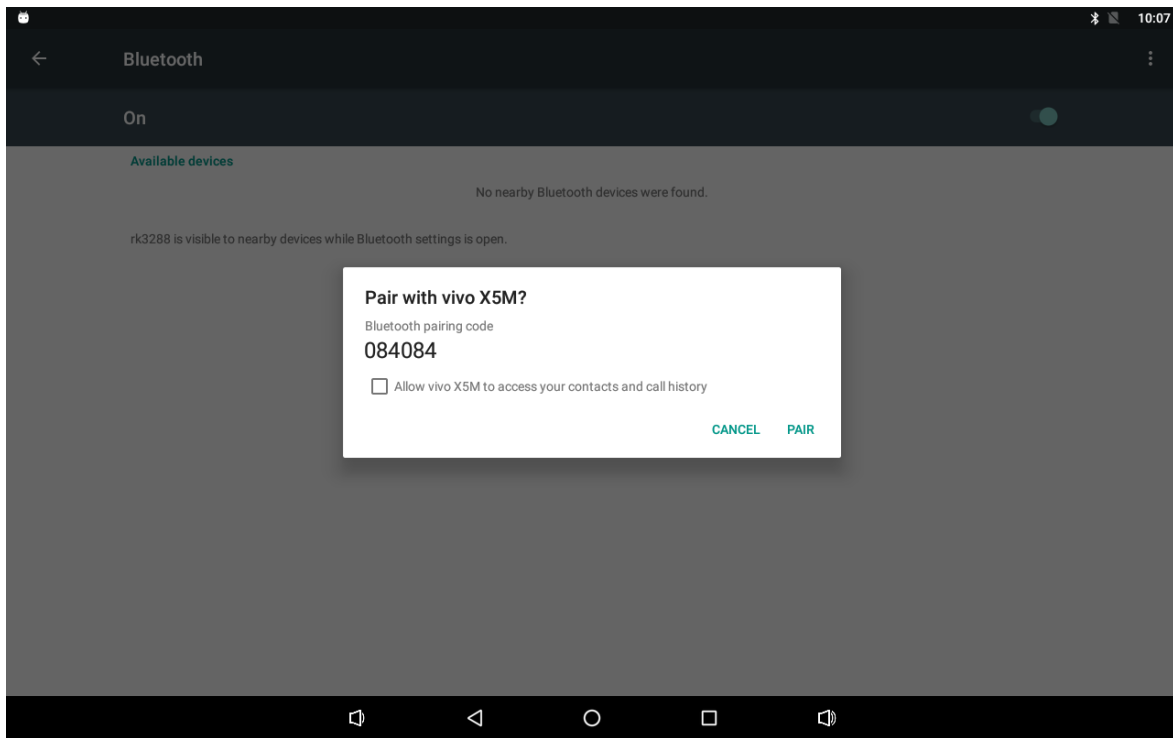

Bluetooth

In the App list, click “Settings”  to open the system setting app, and select the option “Bluetooth”.

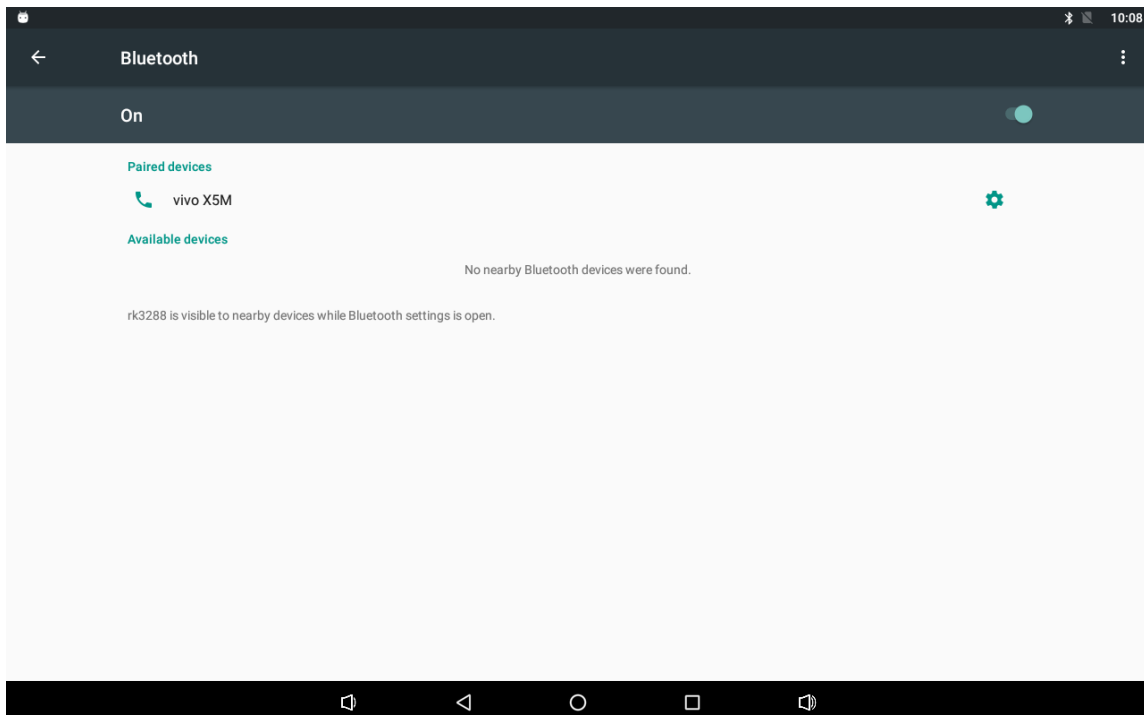

Switch the Bluetooth button to **ON**. The product will scan ambient available Bluetooth devices automatically.

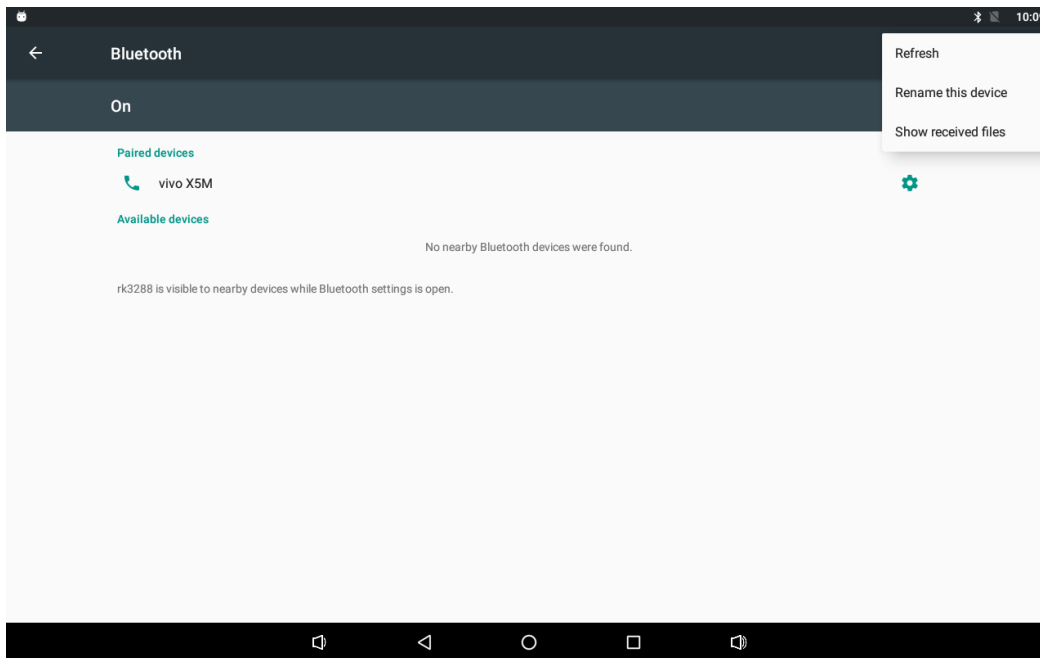

If you want to pair another Bluetooth device, select it from the “Available Devices” list, and then click “Pair” in the pop-up window. At the same time, click “Pair” in the pop-up window of the Bluetooth device to be paired.

After pairing, the paired device will be moved to the “Paired Devices” list.

Click the three point icon in the upper right corner to pop up the setting interface, and select refresh、 rename this device and show received files.

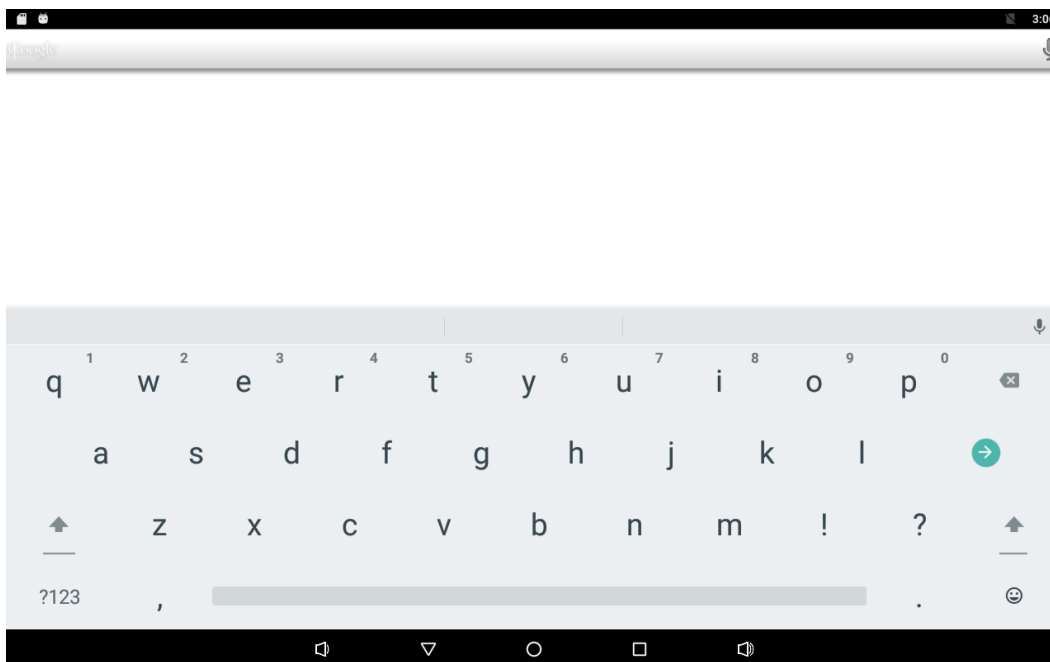

Virtual Keyboard

The device provides a virtual keyboard for typing. You can use it as a real one.

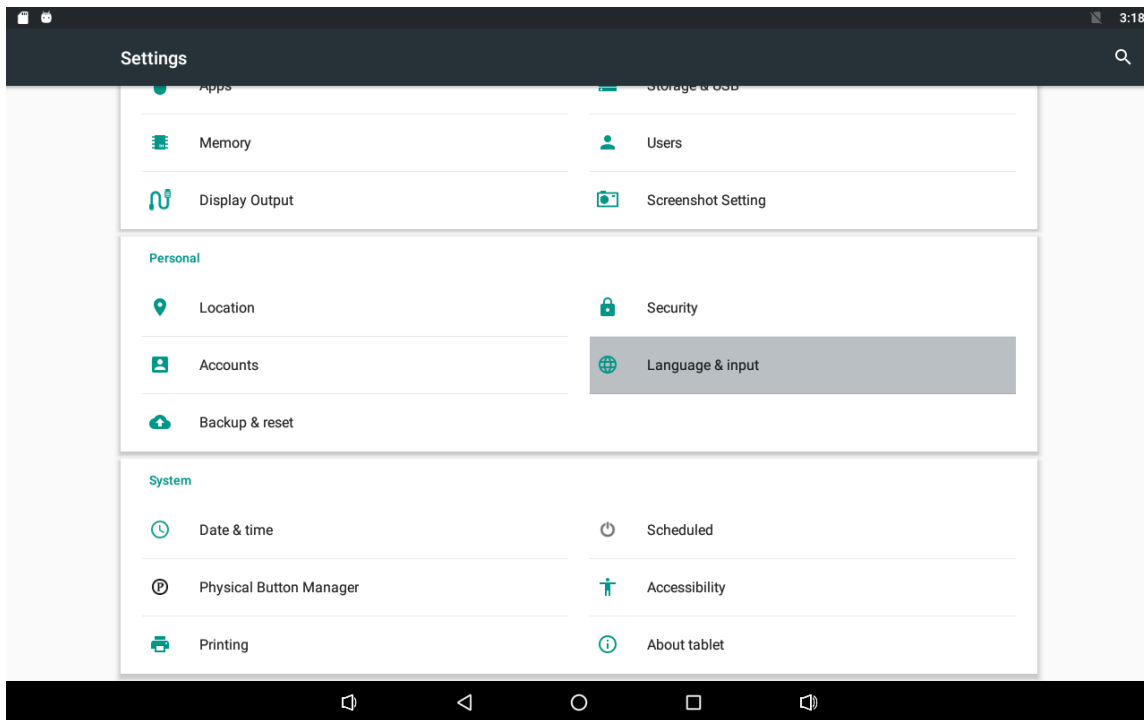

When you click in a text input box, the virtual keyboard will appear at the bottom of the screen.

To collapse the virtual keyboard, you can click the icon  in the system bar.

Switch Input Methods

If the keyboard icon is invisible, please check whether the installed input method is selected in the “**Language & input**” option under the system setting app.

Select the current keyboard option to bring up the change keyboard dialog box.
