

HyperX Pulsefire Mat - RGB Gaming Mousepad - Cloth (XL)

ROLL OUT STUNNING RGB LIGHTING AND PRECISION TRACKING.

The HyperX Pulsefire Mat RGB Mouse Pad is built for the gamer that loves extra flair, but still needs their mouse pad to provide a smooth, precise mouse surface. Give your setup an extra pop of eye-catching style with 2 zones of customizable lighting, and a convenient touch selector to switch between lighting profiles. With a durable, densely-woven precision surface and an anti-slip rubber underside, Pulsefire Mat ensures that your mouse pad will enhance both your gaming and glamour. The flat surface provides a smooth, consistent mouse glide and it rolls up for easy portability. Customize lighting and smooth lighting effects with HyperX NGENUITY software, and save you profiles directly to the onboard memory.

Key features

Dynamic RGB lighting effects

Customize stunning, smooth 2-zone lighting effects and bring your setup to life!

Densely woven cloth surface tuned for precision

Get a smooth, consistent glide thanks to the precision surface. It's designed to be durable, rollable, and portable.

Seamless, anti-fray stitching

The seamless anti-fray stitched edges provide resistance to daily wear and tear.

Conveniently swap onboard profiles with built-in touch sensor

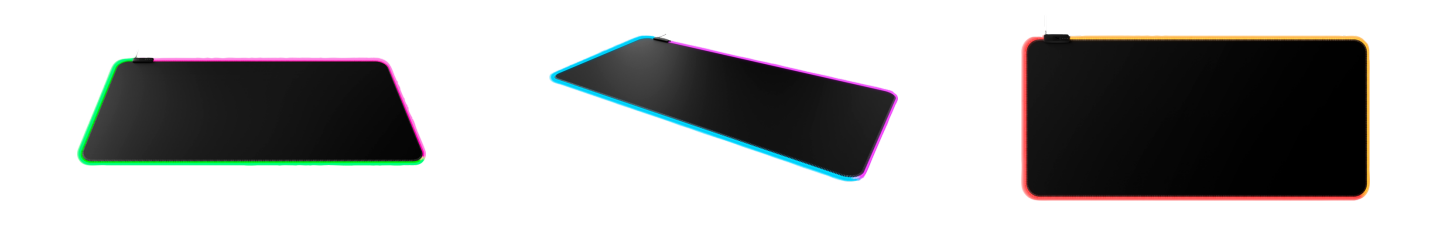

Switch between your stylish setups at the touch of a button.

Anti-slip rubber base

The textured rubber underside grips tight so you won't lose control when the action heats up.

Customizable with HyperX NGENUITY Software

Set up lighting to give your mouse pad a personalized touch, and save it directly to the onboard memory so you have access to your profiles no matter where you game.
