

## MAINSTREAM COMPUTING FOR A VARIETY OF BUSINESS USES

ThinkCentre M8 Series desktops offer enhanced manageability and security features, along with additional configuration and expansion options.

## ThinkCentre M80s

Offers almost the same performance capabilities of a larger desktop, but in a smaller chassis, thanks to the efficient cooling system which improves air-flow. Features 10th Gen Intel Core processors, support for vPro remote manageability to reduce the cost of IT maintenance, space to install up to 3 storage devices (1x M.2 PCIe SSD and 2x HDD), an optical drive and a graphics card.

### REASONS TO BUY

Security features include an optional Chassis eLock which locks the computer from the inside preventing unauthorized removal of components, a cable retention system preventing removal of wired peripherals, and the ability to disable individual USB ports or prevent data transfer through them.

Despite its smaller size, users can connect 3 displays without needing a graphics card - ideal for users multi-tasking across applications.

Optimized to reduce power consumption, saving you money and reducing environmental impact. Features Energy Star and EPEAT Silver certifications. TUV low noise and TCO certified for lower cost of ownership.
