8.1 FAQ

View the full FAQ on Jabra.com/solematemax.

Q Why do I hear crackling noises?

A Bluetooth is a radio technology that is sensitive to objects between the speaker and the connected device. Ensure the speaker and the connected device are within range (up to 10 meters or 33 feet).

Q What is the range of the speaker?

A The Jabra Solemate Max supports the following maximum ranges: 10m/33ft.

Q I am having Bluetooth connecting problems

A You may have deleted your Jabra Solemate pairing connection in Bluetooth device. Reconnect by holding the **On/Off/Pairing** switch in the Up position for 3 seconds to put the Jabra Solemate into pairing mode, and then connect to your Bluetooth device.

Q Why can't I use Reject call or redial?

A These features are dependent on the ability of your phone to support a hands-free profile. Even if the hands-free profile is implemented, reject call and redialing are optional features that are not supported by all devices. Please consult your device manual for details.
