Premium Performance

Many HDMI 2.0 cables don't provide the full 18Gbps bandwidth of a Premium High Speed HDMI Cable, meaning they can't support 4K resolutions at refresh rates above 30Hz. ALOGIC Elements series Premium High Speed HDMI Cables support double the frame rate, delivering silky smooth, lag free video. The Elements' high frame rates on supported monitors ensures users enjoy the smoothest video possible, and optimal gaming set ups.

User-Friendly Cables for Home and Business

Engineered with professional applications in mind, the HDMI Cable with 4K Support utilises highly flexible cable – 30AWG (0.5 –5m) and 28AWG (7.5 –10m) cable – for reliable performance and easy installation at home or in business settings. It's PVC-moulded, low-profile connectors are comfortable to grip, simple to insert, and robust enough to standup to use in high traffic environments.

User Interface

Input HDMI Video Connector (Male)

Output HDMI Video Connector (Male)

Video Support

HDMI 2.0, 18Gbps, Premium High Speed class cable (Backwards compatible with all previous HDMI standards)

- Supports up to 4K/UHD 4096x2160 at 60Hz
- Refresh rates to 240Hz at 1080p
- Supports 3D video

Compliance

RoHS, REACH

Package Includes

1x HDMI to DVI Cable
