

ThinkCentre M90s Gen 3

This small form factor PC saves space and energy and runs at a speed that modern professionals can only imagine. Powered by up to 12th Gen Intel Core i9 processors and up to 128GB DDR5 memory support, it delivers state-of-the-art computing experiences while handling demanding software and complex applications. With Intel UHD graphics integrated into the processor and discrete Intel Iris Xe as well as discrete AMD Radeon, users can choose the graphics card that supports industry-specific imaging equipment.

MAINSTREAM COMPUTING FOR A
VARIETY OF BUSINESS USES

The ThinkCentre M9 Series offers more expansion and performance capabilities than any other desktop in our portfolio; perfect for users who need higher computing performance than average.

REASONS TO BUY

Though small, it's packed with a wallop of expandability features, such as up to 4 expansion slots and up to 4 storage drives that include ultra-fast M.2 SSD drives up to 2TB. Plus, it has plentiful onboard and optional ports to help expand its functions as the businesses expand.

Security features include a self-healing BIOS which can restore itself in the event of a BIOS update failure or if maliciously attacked. Smart USB protection helps prevent data breaches by restricting access to external storage drives.

Optimized to reduce power consumption with optional Energy Star 8.0 and optional EPEAT Gold & Silver energy efficiency certifications.
