

# Professional desktop document scanner

ADS-4900W

[brother.co.uk/scanners/ads-4900w](https://brother.co.uk/scanners/ads-4900w)

## High-performance wired and wireless network scanner with dedicated user touchscreen

For uninterrupted high-volume, batch scanning. With the simplicity of one-touch scanning, securely capture your documents to easily share and collaborate with colleagues, whether they're at home or in the office.

## ADS-4900W

100 sheet (ADF)

10.9cm touchscreen with 56 configurable shortcuts

Personalised multi-user experience

Secure workgroup sharing

Superspeed USB3.0 and scan directly to USB host

Brother Mobile Connect app

Driver compatibility with TWAIN (Win, macOS), WIA, ISIS, Linux SANE

Supports AirPrint scan

Advanced image processing and batch scanning

Auto start scan, ultrasonic multifeed sensor, separation switch, scan preview, CIS cleaning alarm

Healthcare

Work from home

Retail

SMB head office

Transport and Logistics

Field Services

Education

Legal

# User experience

## Simple and intuitive interface

Set up a dedicated user interface with one-touch scanning and the ability to add up to 56 shortcuts to frequently used destinations.

## Common operation system

The ADS-4900W has the same operation system and interface as Brother printers, making it a simple process to integrate this device into your overall print infrastructure.

## Fast, reliable scanning

With a large 100 sheet automatic document feeder (ADF) capacity and scan speeds up to 60 pages per minute, the ADS-4900W is fast and reliable for demanding scanning needs.

## Increased efficiency of digitising documents

The ADS-4900W is compatible with various types of paper and size. The multi-feed detector can be switched on advising users via a notification if any sheets are misfed without losing time due to the need to rescan documents.

## Work efficiently and productively

Compared to one A3 copier machine on an office floor, balanced deployment of desktop scanners offers quicker access, less risk of unnecessary downtime.

## Optimised document digitisation

A standalone desktop scanner improves document digitisation with the heavy-duty roller system, high scan speeds and mixed media batch scanning.

# Image capture software

Brother scanners include a comprehensive software suite designed to effectively bring hard copies to life - unlocking information and streamlining your workflow.

You have the freedom to search text and imagery, extract information and optimise or share content: transforming your documents into valuable data resources through industry recognised software.

## Brother ScanEssentials

Enjoy effortless and impressive image capture optimisation with our in-built software, ScanEssentials.

As well as straightforward scanning and simple workflows, ScanEssentials provides you with additional features so that you can tailor scanned documents to your business - enabling you to transform them into valuable data resources.

### Simple workflow

With an intuitive user experience you can save frequently used scan settings to create multiple workflows, convenient for everyday tasks.

### Document separation<sup>1</sup>

Capture and create files based on a specific number of single sided images or sheets of paper using Zonal OCR or barcodes even if more documents are set on the ADF.

### Advanced image processing

Image processing features generate clearly legible articles for reading, reduce file size for sharing and clean content for printing.

### Edit and index files<sup>1</sup>

Add scanned pages or change pages in existing files. Along with the scan results, you can export the scan information to an index file in TEXT, CSV, or XML format.

### Digital imprinter

Electronically imprint page counts, dates, times and even custom references onto scanned images to easily reference and locate scanned pages.

### Metadata<sup>1</sup>

Read a barcode or specific string of text to define the metadata for document separation or file naming.

<sup>1</sup> - standard version only

# Industry recognised software

The range comes with industry recognised document management software, that allows you to do much more with your captured document.

## Kofax PaperPort SE™

Kofax PaperPort™ allows individuals and organisations to scan, share, search and organise documents in a simple, integrated solution.

## NewSoft Bizcard

A complete contact management solution that lets you scan, edit and synchronise business card contacts to various contact management software applications.

## Kofax Power PDF standard

Create, convert and assemble editable PDFs from Word, Powerpoint, Excel or images.

## NewSoft image folio

A comprehensive multimedia image-processing programme that processes scanned photographs, graphics, and drawings.

# Upgrade your workflow with Brother solutions

## Personalised touchscreen

Make time consuming and complicated document filing and archiving simple with Custom UI. Create specific workflows for frequent 'scan-to' destinations on the fully customisable touchscreen, enabling your files to be saved to the correct location in one touch.

## Automatically route documents with barcodes

Reduce the labour-intensive task of scanning several documents, saving and then renaming files. Barcode Utility enables documents that have a barcode to be scanned and saved to the required location, automating the separation of a batch of documents and routing each individual file to the designated folder on your network.
