HP 32GB 4800MHz DDR5 Memory

Upgrade memory. Boost performance

If you are using a lot of memory-intensive applications and notice your laptop is running slow or crashing, consider adding 32GB 4800MHz DDR5 Memory. It's an easy way to boost the performance and user experience from your current HP laptop PC.

Get more done

Do more with the HP laptop you already have. Add 32GB 4800MHz DDR5 Memory so you can run multiple applications concurrently and multitask like a pro.¹

Experience super-fast speed

Adding 32GB 4800MHz DDR5 Memory will increase the computing speed of your HP laptop. Plus adding super-fast, power-efficient laptop memory will address those annoyingly slow start-up times.

Memory you can trust

Buying generic laptop memory is risky because it is not always compatible. Leave uncertainty behind with genuine HP-branded memory that's tested and certified for HP laptops and comes with a standard 1-year warranty.

1. Due to the non-industry standard nature of some third-party memory modules, we recommend HP branded memory to ensure compatibility. If you mix memory speeds, the system will perform at the lower memory speed.
